Resubmittal of Electronic Version of BV-2 UFSAR Rev. 12
Ref: Letter L-01-109 dated August 23, 2001

By letter dated August 23, 2001 (L-01-109), three CD-ROM versions containing Revision 12 of the Beaver Valley Power Station, Unit No. 2 Updated Final Safety Analysis Report (UFSAR) were provided. The submittal reflected changes to the facility and procedures as described in the UFSAR that were completed during the reporting period ending October 25, 2000. It has since been determined that the CD-ROM versions provided by the referenced letter are missing certain Appendices of the BV-2 UFSAR. This letter provides the corrected CD-ROM electronic versions of the BV-2 UFSAR, Revision 12. The labels on the CD's have been changed to identify the latest version.
