Mr. David Boergers
Office of the Secretary
Federal Energy Regulatory Commission
Washington, DC 20426

Re: Cove Point LNG Limited Partnership
Docket Nos. CP01-76-000, CP01-77-000,
RP01-217-000 and CP01-156-000
(Not consolidated)

Dear Sir:

As discussed with Mr. Jack Kendall on November 13 and 14, 2001, this is to advise that the staff of the U.S. Nuclear Regulatory Commission will attend the technical conference being convened regarding the subject dockets, on November 16, 2001, pursuant to the FERC Order dated November 9, 2001.

At the conference, the NRC staff will be prepared to respond to questions regarding the nature of NRC reviews of the implications of the Cove Point project on the Calvert Cliffs Nuclear Power Plant, a facility located in Lusby, Maryland, which is licensed by and subject to the regulatory oversight of the NRC. It should be understood that the NRC staff's Safety Evaluation Reports to date evaluated the Cove Point project based on information described in submittals, several years ago, by the licensee; the project described in these submittals does not necessarily correspond to the project currently proposed and pending before the FERC.

Ms. Elinor Adensam, the Project Director responsible for the Calvert Cliffs Nuclear Power Plant, Donna Skay and John Boska, Project Managers, Kazimeras Campe, Senior Reactor Engineer, and Krzysztof Parczewski, Senior Chemical Engineer, Office of Nuclear Reactor Regulation, as well as Steven R. Hom, Senior Attorney, Office of the General Counsel, will attend.

Sincerely,

/RA/

Lawrence J. Chandler
Associate General Counsel for
Hearings, Enforcement & Administration
