EX 6

Wayne,

I would appreciate it if you could e-mail me the issued version of the IP2 inspection report to complete my file for the contract. Working on Day 61 in N. Texas without rain and a predicted temperature of 107 degrees, with no relief in sight.

I am leaving for Spain on Labor Day to participate in a South Texas Project 2-week audit at ENSA, the manufacturer of the STP-2 replacement steam generators. The cooler temperatures will be a relief.

Hope y'all have a nice holiday weekend.

Ian
