

December 19, 2001

Mr. Oliver D. Kingsley, President
Exelon Nuclear
Exelon Generation Company, LLC
4300 Winfield Road
Warrenville, IL 60555

SUBJECT: DRESDEN NUCLEAR POWER STATION, UNITS 2 AND 3, AND
QUAD CITIES NUCLEAR POWER STATION, UNITS 1 AND 2 - REQUEST
FOR WITHHOLDING INFORMATION FROM PUBLIC DISCLOSURE
(TAC NOS. MB0844, MB0845, MB0842, AND MB0843)

Dear Mr. Kingsley:

By your letter (RS-01-161) dated August 13, 2001, and affidavit dated August 7, 2001, executed by George B. Stramback of General Electric Company (GE), you provided additional information supporting the December 27, 2000, request for approval of uprated operations at Dresden and Quad Cities Nuclear Power Stations. In your August 13, 2001, letter, you also requested that it be withheld from public disclosure pursuant to 10 CFR 2.790. As a result of a conference call between your staff and the Nuclear Regulatory Commission (NRC) staff on December 7, 2001, regarding the amount of material that should be considered proprietary, a revised submittal was made. The revised submittal was made by letter dated December 17, 2001, and included by proprietary and non-proprietary versions of the information. It also included an affidavit executed by Mr. George B. Stramback on December 12, 2001. A non-proprietary copy of this document has been placed in the NRC public document room and added to the Agency wide Documents Access and Management Systems Publicly Available Records System (ADAMS PARS) Library.

The affidavit stated that the submitted information should be considered exempt from mandatory public disclosure for the following reasons:

- (A) Information that discloses a process, method, or apparatus, including supporting data and analyses, where prevention of its use by General Electric's competitors without license from General Electric constitutes a competitive economic advantage over other companies.
- (B) Information which, if used by a competitor, would reduce his expenditure of resources or improve his competitive position in the design, manufacture, shipment, installation, assurance of quality, or licensing of a similar product.

We have reviewed your application and the material in accordance with the requirements of 10 CFR 2.790 and, on the basis of your statements, have determined that the submitted information sought to be withheld contains proprietary commercial information and should be withheld from public disclosure.

Mr. O. Kingsley

- 2 -

Therefore, the version of the submitted information marked as proprietary will be withheld from public disclosure pursuant to 10 CFR 2.790(b)(5) and Section 103(b) of the Atomic Energy Act of 1954, as amended.

Withholding from public inspection shall not affect the right, if any, of persons properly and directly concerned to inspect the documents. If the need arises, we may send copies of this information to our consultants working in this area. We will, of course, ensure that the consultants have signed the appropriate agreements for handling proprietary information.

If the basis for withholding this information from public inspection should change in the future such that the information could then be made available for public inspection, you should promptly notify the NRC. You also should understand that the NRC may have cause to review this determination in the future, for example, if the scope of a Freedom of Information Act request includes your information. In all review situations, if the NRC makes a determination adverse to the above, you will be notified in advance of any public disclosure.

If you have any questions regarding this matter, I may be reached at (301) 415-2863.

Sincerely,

/RA/

Lawrence W. Rossbach, Project Manager, Section 2
Project Directorate III
Division of Licensing Project Management
Office of Nuclear Reactor Regulation

Docket Nos. 50-237, 50-249,
