

December 7, 2001

Mr. David A. Christian
Senior Vice President and
Chief Nuclear Officer
Virginia Electric and Power Company
Innsbrook Technical Center-2SW
5000 Dominion Blvd.
Glen Allen, Virginia 23060-6711

SUBJECT: NORTH ANNA POWER STATION, UNITS 1 AND 2: REQUEST FOR
ADDITIONAL INFORMATION REGARDING SECTION 3.3.1, FUNCTION 6,
DISCUSSION OF CHANGE L.21 OF THE IMPROVED TECHNICAL
SPECIFICATIONS (ITS) (TAC NOS. MB1437 AND MB1432)

Dear Mr. Christian:

The NRC staff reviewed your application dated December 11, 2000, to change the format and content of the Current Technical Specifications to be consistent with NUREG-1431, "Standard Technical Specifications - Westinghouse Plants," Revision 1, and certain generic changes to the NUREG. On the basis of our review of the proposed changes for ITS Section 3.3.1, "Reactor Trip System (RTS) Instrumentation," we find that additional information identified in the paragraph below is required in order for the staff to complete this review.

Please describe in detail how the allowable value for the OT delta T was derived. Include in this description what assumptions were made (including the values that were omitted, and those that were included) and how the values that are included in the calculation are statistically combined.

This inquiry was discussed with Ms. Regina Borsh of your staff on November 20, 2001, who agreed to provide the staff with a response within 45 days of the date of this letter.

Sincerely,
/RA/

Stephen R. Monarque, Project Manager, Section 1
Project Directorate II
Division of Licensing Project Management
Office of Nuclear Reactor Regulation

Docket Nos. 50-338 and 50-339
