

OFFICE OF THE  
GENERAL COUNSEL

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D.C. 20555-0001

December 6, 2001

Charles Bechhoefer, Chairman  
Administrative Judge  
Atomic Safety and Licensing Board  
U.S. Nuclear Regulatory Commission  
Washington, DC 20555-0001

Dr. Richard F. Cole  
Administrative Judge  
Atomic Safety and Licensing Board  
U.S. Nuclear Regulatory Commission  
Washington, DC 20555-0001

Dr. Charles N. Kelber  
Administrative Judge  
Atomic Safety and Licensing Board  
U.S. Nuclear Regulatory Commission  
Washington, DC 20555-0001

In the Matter of  
Dominion Nuclear Connecticut, Inc.  
Millstone Nuclear Power Station, Unit No. 3  
Docket No. 50-423-LA-3

Dear Administrative Judges:

The NRC Staff's filing of November 21, 2001, "NRC Staff's Motion Requesting the Licensing Board to Accept Dr. Ronald R. Bellamy's Affidavit Regarding Changes in the Staff's Schedule," attached an affidavit of Dr. Bellamy. Dr. Bellamy's affidavit stated in ¶6 that the Staff planned to conduct a site visit to GE Vallecitos Nuclear Center during the week of December 5, 2001.

This letter forwards Dr. Bellamy's affidavit of December 5, 2001, which clarifies his prior affidavit to reflect that the Staff's current plans do not include a site visit to Vallecitos.

The Board and parties should substitute the affidavit attached hereto for the affidavit filed with the Staff's motion on November 21, 2001.

Sincerely,

*Ann P. Hodgdon*  
Ann P. Hodgdon  
Counsel for NRC Staff

Docket No. 50-423-LA-3

AFFIDAVIT OF DR. RONALD R. BELLAMY CLARIFYING CHANGES IN THE  
NRC STAFF'S SCHEDULE

I, Dr. Ronald R. Bellamy, first being duly sworn, depose and state:

1. I am Chief of the Decommissioning and Laboratory Branch, Division of Nuclear Materials Safety in Region 1, U.S. Nuclear Regulatory Commission.
2. My branch is leading the NRC Staff's inspection review of the Fuel Rod Accountability Project (FRAP) for Millstone Nuclear Power Station, Unit 1.
3. The FRAP Final Report was provided to NRC on October 5, 2001.
4. The Staff's onsite inspection of the FRAP report was conducted at Millstone October 9-19, 2001.
5. The licensee's Root Cause Analysis report was provided to NRC on October 31, 2001.
6. Subsequent to the filing of the NRC Staff's Motion Requesting the Licensing Board to Accept Dr. Ronald R. Bellamy's Affidavit Regarding Changes in the Staff's Schedule, the Staff determined that a site visit to GE Vallecitos Nuclear Center (VNC) was not necessary for the completion of its inspection effort, but that some additional inspection review was required. The Staff plans to continue

2

its inspection review through December 2001.

7. Upon completion of its inspection review, the Staff will formulate its report and make it available to the parties. Based upon the delivery of the Root Cause Analysis Report one month later than anticipated and the need for additional inspection-related activities, I anticipate the Staff's report of the inspection of the FRAP and Root Cause Analysis reports will be completed by approximately the end of January 2002.
8. The matters stated above are true and correct to the best of my knowledge, information and belief.

*Ronald R. Bellamy*

Dr. Ronald R. Bellamy  
Chief, Decommissioning and  
Laboratory Branch  
Division of Nuclear Materials Safety

Subscribed and sworn to before me  
this 5<sup>th</sup> day of December, 2001
