**Subject:** Fee rule concurrence

Connie,

NRR's concurrence was just delivered to me. They concurred with comment--they want to add a statement at the end of page 6 (response to comment A.1) to the effect that suggestions related to improving efficiencies in the Reactor Oversight Process are being considered . . . . . and staff's evaluation of the initial ROP implementation is being provided as a SECY paper. . . . .

As soon as I have EDO concurrence, I plan to give NRR's comment to Jesse when I give him the rule for signature.
