King of Prussia, PA 19406

Subject: Documentation of December 12, 2001, Telephone Conference between Entergy
Nuclear Operations Inc. and NRC

Dear Mr. Lanning:

The purpose of this letter is to document the results of the subject telephone conference regarding actions planned by the NRC to verify the adequacy of the remediation aspects of the licensed operator qualification program at Indian Point 2. To support this effort, Entergy committed to perform the following actions:

1. Those licensed operators that are expected to stand control room watches and who failed the annual qualification examination and subsequently completed remediation, but were not observed by the NRC in a dynamic simulator evaluation, will be made available for an Operational Evaluation by the NRC.
2. Those licensed operators identified in Item 1 above that are not made available for an Operational Evaluation will be administratively restricted from standing control room watches requiring a license until such time as their remediation status is resolved with the NRC.
3. No more than one staff crew licensed operator at a time will be substituted into a position requiring a license on an operating shift crew until the remediation program issues are resolved with the NRC.

It is our understanding that Operational Evaluations for the selected licensed operators will begin on December 17.

Should you or your staff have any questions regarding this matter, please contact Mr. John McCann, Manager, Nuclear Safety and Licensing at (914) 734-5074.

Sincerely,

Fred Dacimo
Vice President - Operations
Indian Point 2
