NEITHER THE NEW MOX PROJECT OR THE DUKE REACTORS HAVE BEEN DESIGNED TO WITHSTAND AN AIR PLANE CRASH LIKE THE WORLD TRADE CENTER. IF A CRASH SHOULD OCCUR, VAST AMOUNTS OF PU COULD BE RELEASED ( CHERNOBYL). THESE PLANTS SHOULD BE RE-DESIGNED BEFORE USE. THESE COSTS SHOULD BE ADDED TO THE PROJECT NOW. IT SHOULD BE RE-ANALYZED TO SEE IF IT WILL BE COST EFFECTIVE WITH THESE CHANGES. WHO WILL PAY -- DOE or DUKE CUSTOMERS?

Alton Beasley  
740 Old Dibble Road  
Aiken, SC 29803
