Describe Follow-up: (Telephone, Internet, Chamber of Commerce, Other) Lummus Corporation, Columbus, Georgia manufactured cotton mills until 1993. ABB Lummus designs and builds (or at least oversees) a variety of industrial facilities. The gauges are gamma backscatter thickness gauges, which could be used to measure the thickness of fibers or of any number of other products. It is likely that one of these companies ordered the gauges from a customer's site in Pittsburgh and installed them there.		
Describe Communication with Registration Vendor: Chris Fitz of NDC Infrared Engineering (626-939-3859)  The vendor could find no distribution records for the zip code in the file (15236) and only one for a Pittsburgh address, that being PPG Industries, Fiberglass Research Center, 201 Zeta Drive, Pittsburgh, Pennsylvania 15238. There is no reason to connect that gauge with this case.

<input type="checkbox"/>	

The name on the file appears to be incorrect. If it is correct, no information about this Lummus Company could be found. We do not have a full street address. Without no more information than is available, there is little hope of tracking the gauges and further effort is not justified.
