

December 31, 2001

Mr. H. A. Sepp, Manager
Regulatory and Licensing Engineering
Westinghouse Electric Company LLC
P. O. Box 355
Pittsburgh, Pennsylvania 15230-0355

SUBJECT: REQUEST FOR WITHHOLDING INFORMATION FROM PUBLIC DISCLOSURE
REGARDING THE SEQUOYAH NUCLEAR PLANT, UNITS 1 AND 2
(TAC NOS. MB3435 AND MB3436)

Dear Mr. Sepp:

By your application dated September 29, 2001, and affidavit dated September 28, 2001 (CAW-01-1486), transmitted as Enclosure 9 to the November 15, 2001, Tennessee Valley Authority (TVA) application for license amendments for Sequoyah Units 1 and 2, you requested withholding from public disclosure Topical Report WCAP-15669, Revision 0, "Westinghouse Power Measurement Instrument Uncertainty Methodology for Tennessee Valley Authority Sequoyah Units 1 and 2 (1.3% Uprate to 3467 MWt - NSSS Power)." Your request that the topical report be withheld from public disclosure was made pursuant to Title 10 of the *Code of Federal Regulations* (10 CFR) Section 2.790. A nonproprietary copy of this document (WCAP-15670, Revision 0) was also included in TVA's application as Enclosure 5 and has been placed in the Nuclear Regulatory Commission (NRC) Public Document Room and added to the Agencywide Documents Access and Management Systems Publicly Available Records System (ADAMS PARS) Library under Accession No. ML013470345.

The affidavit stated that the submitted information should be considered exempt from mandatory public disclosure for the following reasons:

- (a) The information reveals the distinguishing aspects of a process (or component, structure, tool, method, etc.) where prevention of its use by any of Westinghouse's competitors without license from Westinghouse constitutes a competitive economic advantage over other companies.
- (b) Its use by a competitor would reduce his expenditure of resources or improve his competitive position in the design, manufacture, shipment, installation, assurance of quality, or licensing a similar product.

We have reviewed your application and the material in accordance with the requirements of 10 CFR 2.790 and, on the basis of your statements, have determined that the submitted information sought to be withheld contains proprietary commercial information and should be withheld from public disclosure.

Therefore, the version of the submitted information marked as proprietary will be withheld from public disclosure pursuant to 10 CFR 2.790(b)(5) and Section 103(b) of the Atomic Energy Act of 1954, as amended.

Withholding from public inspection shall not affect the right, if any, of persons properly and directly concerned to inspect the documents. If the need arises, we may send copies of this

Mr. H. Sepp

information to our consultants working in this area. We will, of course, ensure that the consultants have signed the appropriate agreements for handling proprietary information.

If the basis for withholding this information from public inspection should change in the future such that the information could then be made available for public inspection, you should promptly notify the NRC. You also should understand that the NRC may have cause to review this determination in the future, for example, if the scope of a Freedom of Information Act request includes your information. In all review situations, if the NRC makes a determination adverse to the above, you will be notified in advance of any public disclosure.

If you have any questions regarding this matter, I may be reached at 301-415-2010.

Sincerely,

/RA/

Ronald W. Hernan, Sr. Project Manager, Section 2
