**Subject:** Nine Mile Point Unit 2 amendment re. MCPR, **TAC MB3327**

Steve:

We are planning to meet your proposed schedule for this amendment. **Please call me ASAP to arrange a conference call** to discuss:

1. Reference core loading pattern for Cycle 8 and Cycle 9, including bundle name, # in core , and cycle loaded.
2. The difference between reference core loading pattern for the amendment calculation and the real core loading pattern. Also, the procedure to deal with the difference if it occurred.

The information in this e-mail is solely provided to facilitate an upcoming conference call, and does not at this time convey an NRC staff position or a formal request for additional information.

Peter S. Tam, Senior Project Manager  
Project Directorate I-1  
Division of Licensing Project Management  
Office of Nuclear Reactor Regulation
