Re: St. Lucie Units 1 and 2
Docket Nos. 50-335 and 50-389
Additional Copies of Application for Renewed Operating Licenses

By letter L-2001-258 dated November 29, 2001, Florida Power & Light Company (FPL) applied for the renewal of the Operating Licenses for St. Lucie Units 1 and 2, pursuant to U.S. Nuclear Regulatory Commission (NRC) regulations set forth in 10 CFR 50, 51, and 54. The original and each copy of the Application included an environmental report entitled "Applicant's Environmental Report - Operating License Renewal Stage." In addition to the hardcopies provided to the NRC Document Control Desk, a CD-ROM version of the Application (without reference documents) was also provided.

In order to facilitate NRC review of the St. Lucie Application, FPL hereby submits forty (40) additional copies of the Application in CD-ROM format. Each of these CD copies includes the following:

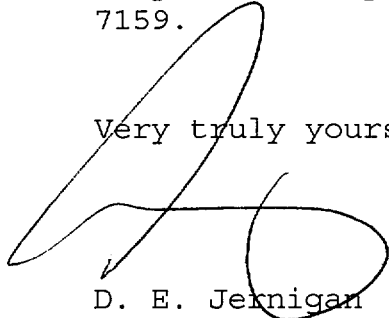

- Application for Renewed Operating Licenses
- Environmental Report - Operating License Renewal Stage
- Reference Documents (not considered part of the application)
 - License Renewal Boundary Drawings (originally transmitted in hard copy form by FPL letter No. L-2001-244 dated November 29, 2001)
 - St. Lucie Unit 1 Updated FSAR, Amendment 18
 - St. Lucie Unit 2 Updated FSAR, Amendment 13

FPL has also provided the Indian River Community College (IRCC) Main Library with a single hardcopy of the Application to be made available for public inspection. The IRCC Main Library is located at 3209 Virginia Avenue, Fort Pierce, Florida 34981. FPL requests that when the St. Lucie Application is noticed in the Federal Register, the notice include a statement that FPL has made a copy of the application (including the Applicant's Environmental Report - Operating License Renewal Stage) available for public inspection at the IRCC Main Library.
