References: 1. Docket No. 50-285  
2. Letter from the Omaha Public Power District (OPPD) (W. G. Gates) to NRC (Document Control Desk), "Application for Amendment of Facility Operating License," dated February 7, 2001 (LIC-01-0010)

**SUBJECT: Supplemental Information Supporting the Alternative Source Term (AST) License Amendment Request**

In Reference 2, the Omaha Public Power District (OPPD) submitted an Application for Amendment of Facility Operating License to revise the Fort Calhoun Station (FCS) Unit No. 1 Technical Specifications (TS). In Attachment D (page 3, item 6) of Reference 2, OPPD committed to review the current vital area access dose calculations with respect to AST to ensure the results of the preliminary evaluation are valid. In response to that commitment, OPPD has analyzed (EA-FC-01-020) the current vital access dose calculations with respect to AST and concluded that the current calculations are bounding. In addition, OPPD verbally communicated the results of the analysis to Mr. A. B. Wang (NRC Project Manager) on November 28, 2001.

Sincerely,

S. K. Gambhir  
Division Manager  
Nuclear Operations

SKG/DLS/dls
