Attn: Document Control Desk  
Washington, DC 20555

RE: St. Lucie Units 1 and 2  
Docket Nos. 50-335 and 50-389  
Regulatory Issue Summary 2001-21

NRC Regulatory Issue Summary (RIS) 2001-21, *Licensing Action Estimates for Operating Reactors*, asked licensees to provide an estimate of the number of licensing actions expected to be submitted in the remainder of fiscal year (FY) 2002 and for FY 2003. To adequately capture the larger resource impact of certain licensing reviews, licensees were asked to identify by brief title those licensing actions that may entail complex reviews.

Pursuant to your previous guidance, licensing actions affecting both units should be counted as two separate licensing actions. FPL estimates there will be 26 licensing action submittals planned for the remainder of FY2002 and 30 licensing action submittals for FY2003. Please contact George Madden at 561-467-7155 if there are any questions about this submittal. As requested, a copy has been forwarded to Donna Skay.

Very truly yours,

  
Donald E. Jernigan  
Vice President  
St. Lucie Plant
