Subject: Oyster Creek Generating Station
Docket 50-219
Request for a Waiver of the Six Month Experience Requirement

The personnel listed in Attachment I to this request are currently enrolled in a licensed operator hot license training class at the Oyster Creek Generating Station (OCGS). Prior to completing this class, the listed personnel will not have completed six months of responsible power plant experience at OCGS. AmerGen Energy Company, LLC, is requesting a waiver of the six month experience requirement specified in NUREG 1021, Revision 8, "Operator Licensing Examination Standards for Power Reactors" for the listed personnel. This will allow them to sit for the Senior Reactor Operator (SRO) exam without having completed the requisite six months of responsible experience at OCGS. This request is being made in accordance with the OCGS licensed operator training program.

None of the personnel on the attached list will request the issuance of an SRO license until the six months of responsible experience has been successfully completed. At that time, a comment will be included on each SRO application documenting this waiver request.

If any further information or assistance is required, please contact Mr. John Rogers of my staff at 609.971.4893.

Very truly yours,

Ron J. DeGregorio, Vice President
Oyster Creek Generating Station
