SUMMARY: The NRC is preparing a submittal to OMB for review of continued approval of information collections under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35).

Information pertaining to the requirement to be submitted:

1. The title of the information collection: 10 CFR Part 20 - Standards for Protection Against Radiation
2. Current OMB approval number: 3150-0014
3. How often the collection is required: Annually for most reports and at license termination for reports dealing with decommissioning.

4. Who is required or asked to report: NRC licensees, including those requesting license termination.
5. The number of annual respondents: The total annual number of NRC licensees responding to this requirement by either reporting or recordkeeping is 5,048.
6. The number of hours needed annually to complete the requirement or request: 141,183.
7. Abstract: 10 CFR Part 20 establishes standards for protection against ionizing radiation resulting from activities conducted under licenses issued by the NRC. These standards require the establishment of radiation protection programs, maintenance of radiation records, recording of radiation received by workers, reporting of incidents which could cause exposure to radiation, submittal of an annual report to NRC of the results of individual monitoring, and submittal of license termination information. These mandatory requirements are needed to protect occupationally exposed individuals from undue risks of excessive exposure to ionizing radiation and to protect the health and safety of the public.

Submit, by (insert date 60 days after publication in the Federal Register), comments that address the following questions:

1. Is the proposed collection of information necessary for the NRC to properly perform its functions? Does the information have practical utility?
2. Is the burden estimate accurate?
3. Is there a way to enhance the quality, utility, and clarity of the information to be collected?
4. How can the burden of the information collection be minimized, including the use of automated collection techniques or other forms of information technology?
