Dear Sir or Madam:

By letter dated February 15, 2001, Carolina Power & Light Company (CP&L) requested a revision to the Technical Specifications (TS) for the Harris Nuclear Plant (HNP). The proposed amendment revises Technical Specifications (TS) 3/4.3.2 "Engineered Safety Features Actuation System Instrumentation", 3/4.3.3.1 "Radiation Monitoring Instrumentation", 3/4.6.1.1 "Containment Integrity", 3/4.6.1.7 "Containment Ventilation System", 3/4.6.3 "Containment Isolation Valves", 3/4.9.4 "Containment Building Penetrations", and 3/4.9.9 "Containment Ventilation Isolation System", and associated Bases. Specifically, HNP proposed to revise the applicable TS to clarify and relocate requirements by implementing the guidance of NUREG-1431, Revision 1, TSTF-30, TSTF-45, TSTF-46, and TSTF-269.

The staff determined that a matrix of the changes would facilitate the staff review of the proposed license amendment. Therefore, HNP hereby withdraws the proposed amendment, reference letter HNP-01-035 dated February 15, 2001, but expects to resubmit this change in the future that will include the requested arrangement of the proposal.

In accordance with 10 CFR 50.91(b), CP&L is providing the State of North Carolina with a copy of the proposed license amendment withdrawal.

Please refer any questions regarding this submittal to Mr. J. R. Caves at (919) 362-3137.

Sincerely,
