Nuclear Regulatory Commission staff will meet with representatives of Entergy Nuclear on Thursday, March 14, to discuss the results of the agency's annual assessment of safety performance at the Indian Point 2 nuclear power plant. The facility is located in Buchanan, N.Y., and is operated by Entergy Nuclear.

The meeting, which will be open to the public for observation, is scheduled to begin at 7 p.m. in the large meeting room at Crystal Bay on the Hudson, Charles Point Marina, 5 John Walsh Boulevard, Peekskill, N.Y. NRC officials will be available afterwards to answer questions.

The performance period to be discussed is April 1, 2001, to December 31, 2001. In addition, Entergy Nuclear representatives will discuss continuing performance improvement efforts, including specific actions in the area of problem identification/resolution and human performance.
