Long-Term Contractors							
Short-Term Contractors	1*/4**			1			
Total	2*/5**	2		1			5*/8**

* NRC Required Level

** OPPD Required Level

I. MANAGEMENT ACTIONS

- A. Three (3) contractor employees tested positive during pre-access drug and alcohol testing. OPPD terminated their services and referred them to their respective contractor companies.
- B. Two (2) contractor employees tested positive during random drug and alcohol testing. OPPD terminated their services and referred them to their respective contractor companies.
- C. One full-time employee tested positive on pre-access drug and alcohol testing. The employee was suspended and subsequently elected to retire rather than participate in the return-to-work requirements.
- D. One (1) part-time employee tested positive on pre-access drug and alcohol testing. In accordance with OPPD's Fitness for Duty Program, the employee was terminated.

II. EVENTS REPORTED

- A. A non-licensed supervisory employee tested positive on random drug and alcohol testing. The employee was referred to the Employee Assistance Program (EAP), and the individual's access to the protected area was blocked pending the EAP evaluation. Following notification of compliance with initial procedures from EAP, the individual completed a re-entry drug and alcohol test, signed a Re-Entry Agreement, and returned to work.
- B. A non-licensed supervisory employee was removed from duty and the individual's access was blocked due to the employee's behavior. The employee was referred to the Medical Review Officer (MRO) for evaluation and subsequently to EAP. During the course of medical treatment it was determined that the employee had overused prescribed medication and was diagnosed with polysubstance dependence. The employee completed outpatient treatment and entered an aftercare program. Following notification of compliance by the MRO and EAP, the employee completed a re-entry drug and alcohol test, signed a Re-Entry Agreement and returned to work.
