AGENCY: U. S. Nuclear Regulatory Commission (NRC)

ACTION: Notice of pending NRC action to submit an information collection request to OMB and solicitation of public comment.

SUMMARY: The NRC is preparing a submittal to OMB for review of continued approval of information collections under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35).

2. Current OMB approval number: 3150-0013

3. How often the collection is required: NRC Form 241 must be submitted each time an Agreement State licensee wants to engage in or revise its activities involving the use of radioactive byproduct material in a non-Agreement State, areas of exclusive Federal jurisdiction, or offshore waters. The NRC may waive the requirements for filing additional copies of NRC Form 241 during the remainder of the calendar year following receipt of the initial form from a licensee engaging in activities under the general license.
4. Who is required or asked to report: Any licensees who hold a specific license from an Agreement State and want to conduct the same activity in non-Agreement States, areas of exclusive Federal jurisdiction, or offshore waters under the general license in 10 CFR 150.20.
5. The number of annual respondents: 184 respondents from Agreement State licensees
6. An estimate of the total number of hours needed annually to complete the requirement or request: 1,104 hours
7. Abstract: Under the reciprocity provisions of 10 CFR Part 150, any Agreement State licensee who engages in activities (use of radioactive byproduct material) in non-Agreement States, areas of exclusive Federal jurisdiction, or offshore waters, under the general license in Section

150.20, is required to file four copies of NRC Form 241, "Report of Proposed Activities in Non-Agreement States, Areas of Exclusive Federal Jurisdiction, or Offshore Waters," and four copies of its Agreement State license at least 3 days before engaging in such activity. This mandatory notification permits NRC to schedule inspections of the activities to determine whether the activities are being conducted in accordance with requirements for protection of the public health and safety.

1. Is the proposed collection of information necessary for the NRC to properly perform its functions? Does the information have practical utility?
