LaSalle County Station, Unit 2
Facility Operating License No. NPF-18
NRC Docket No. 50-374

Subject: Unit 2 Cycle 9 Core Operating Limits Report (COLR)

Exelon Generation Company (EGC), LLC, in accordance with LaSalle County Station Technical Specifications (TS) Section 5.6.5, "Core Operating Limits Report," is submitting a revision to the Core Operating Limits Report (COLR). The revision is due to a change in minimum critical power ratio (MCPR) operating limits and power-dependent limiting heat generation rate (LHGR) factor multipliers for LaSalle County Station Unit 2 Cycle 9 operations. The new limits are based on nominal control rod scram speeds, and a core exposure limit of 14,000 megawatt-days/metric ton uranium (MWD/MTU). Additionally, associated administrative changes have also been incorporated.

Should you have any questions concerning this submittal, please contact Mr. William Riffer, Regulatory Assurance Manager, at (815) 415-2800.

Respectfully,

George P. Barnes
Site Vice President
