Subject: IP2 SG potential allegation

I talked with Region I today. They are going to have an ARB to discuss this issue relating to the missed SG flaw indication tomorrow, Wednesday, November 15 at 9:30 am. They want to have our technical staff available for their discussion. Please come to room O6D2 to participate in the conference call with the Region I ARB. I expect both Ted and John to attend at a minimum. Others are welcome as needed - please be sure someone familiar with the issue is there to answer the region's questions.
