**Subject:** Final Decision for the IP2 SG "Red" finding

As requested, I have discussed the following topic with Jim Trapp (SRA) and Rick Urban (OE) and the following sequence is what we believe is achievable in finalizing this action.

- Oct 24 Steve Long - Incorporate final comments from Jim Trapp and complete documentation of final SDP in a manner that is suitable for publishing to the public as an attachment to the final enforcement action. Highlight where the revised NRC calculation used ConEd assumptions and how the results still exceeded the "red" threshold. Carefully consider the "precedent setting" nature of the attachment.
- Oct 25 Forward the attachment in a memo from Rich Barrett to Brian Holian.
- Oct 26 -31 Draft the final enforcement paperwork and incorporate the attachment as the record of NRC's final SDP.
- Oct. 31 Conduct an final SDP meeting for informational purposes (not required by enforcement process). Develop final consensus.
- Nov. 1 Issue final SDP to ConEd and implement communications plan.
