SUBJECT: REQUALIFICATION PROGRAM INSPECTION - LIMERICK GENERATING
 STATION, UNITS 1 AND 2

Dear Mr. Skolds:

In a telephone conversation on March 29, 2002, Mr. John G. Caruso, Examiner/Inspector, and Messrs. Carl E. Rich, Operations Training Manager, and Craig Fritz, LSRO Program Coordinator, made arrangements for the NRC to inspect the Senior Operators Limited to Fuel Handling (LSRO) licensed operator requalification program at the Limerick facility. The inspection is planned for the week of May 20, 2002, which coincides with your regularly scheduled requalification examination cycle. The staff at your facility should prepare and conduct the requalification examinations in accordance with your NRC-approved requalification program.

In accordance with 10 CFR 55.59(c), the NRC may request facility licensees to submit their comprehensive requalification written examinations or annual operating tests as necessary to support the NRC's inspection program needs. In order for the NRC to adequately prepare for this inspection, please furnish the examination schedule, sample plan, written examinations, and operating tests scheduled for the week of the inspection to the NRC by May 3. Messrs. Rich and Fritz have been advised of this request and provided with the name and address of the NRC lead inspector assigned to this inspection.
