Millstone Nuclear Power Station, Unit Nos. 1, 2 and 3
2001 Decommissioning Funding Status Report and
Update to Parent Guarantee

This Decommissioning Funding Status Report is being submitted by Dominion Nuclear Connecticut, Inc. (DNC), an indirect, wholly owned subsidiary of Dominion Energy, which is itself wholly owned by Dominion Resources, Inc. (DRI). DNC is the licensed operator of the Millstone Nuclear Power Station, Unit Nos. 1, 2 and 3, and is filing this report on its own behalf and on behalf of the two co-owners of Millstone Unit No. 3, pursuant to the requirements of 10 CFR 50.75(f)(1). Attachment 1 transmits the filing requirements for Millstone Unit No. 1, Attachment 2 transmits the filing requirements for Millstone Unit No. 2, and Attachment 3 transmits the filing requirements for Millstone Unit No. 3.

On March 31, 2001, DNC acquired its ownership interests in the Millstone units, and the licenses previously held by Northeast Nuclear Energy Company (NNECO) and the selling owners were then transferred to DNC. To obtain the Nuclear Regulatory Commission's (NRC) consent to this license transfer, DNC submitted a prior application providing, in part, information on how decommissioning funding requirements would be assured.⁽¹⁾ The NRC issued an Order consenting to the license transfer on March 9, 2001, accompanied by a Safety Evaluation approving the decommissioning funding assurance.⁽²⁾ The Decommissioning Funding Status Report attached to this letter is the first such status report filed since DNC acquired its ownership interests.

⁽¹⁾ J. P. O'Hanlon and B. D. Kenyon letter to U.S. Nuclear Regulatory Commission, "Application for Order and Conforming Amendments for License Transfer," dated August 31, 2000, (B18212).

⁽²⁾ D. S. Collins letter to Northeast Nuclear Energy Company, "Millstone Nuclear Power Station, Unit Nos. 1, 2 and 3 - Order Approving the Transfer of Licenses from Northeast Nuclear Energy Company, et. al., to Dominion Nuclear Connecticut, Inc., and Approving Conforming Amendments (TAC Nos. MA9876, MA9877, and MA9879), dated March 9, 2001.

A001

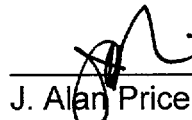

As part of the decommissioning funding assurance for Millstone Unit No. 1, DRI has provided a parent guarantee, in accordance with 10 CFR 50.75(e)(1)(iii)(B) and 10 CFR 30, Appendix A. The NRC Order consenting to the transfer of the Millstone licenses to DNC includes a condition indicating that the parent guarantee is to be updated annually, as required under 10 CFR 50.75(f)(1) and 50.82(a)(8)(iv). Attachment 4 transmits the information necessary to update the parent guarantee.

There are no regulatory commitments contained within this letter.

If there are any questions regarding this submittal, please contact Mr. David A. Smith at (860) 437-5840.

Very truly yours,

DOMINION NUCLEAR CONNECTICUT, INC.

J. Alan Price
Site Vice President - Millstone

Attachment 1

Millstone Nuclear Power Station, Unit No. 1

2001 Decommissioning Funding Status Report

Millstone Unit No. 1

I. Summary

Millstone Unit No. 1 is a 660 MWe Boiling Water Reactor owned in its entirety by Dominion Nuclear Connecticut, Inc. (DNC). By letter dated July 21, 1998, Northeast Nuclear Energy Company, the previous licensed operator of Millstone Unit No. 1, informed the Nuclear Regulatory Commission (NRC) that as of July 17, 1998, Millstone Unit No. 1 had permanently ceased operations and that the fuel had been permanently removed from the reactor vessel.⁽¹⁾ Millstone Unit No. 1 is currently in the process of being decommissioned.

II. Filing Requirements

1. Decommissioning Funding Estimate:

As Millstone Unit No. 1 is permanently shutdown and in the process of being decommissioned, its decommissioning funding requirements are based on a site-specific estimate prepared by TLG, Inc. Furthermore, a substantial amount of work has already been completed. Based on the site-specific cost study and estimates of the work already performed, DNC's Application for License Transfer⁽²⁾ estimated the cost of remaining decommissioning activities to be \$504.5 million at the time of transfer.

DNC's Application for License Transfer included a Decommissioning Funding Worksheet for Millstone Unit No. 1 (Exhibit L to the Application), determining the funding assurance required at the beginning of each year. Based on this worksheet, with earnings at an assumed two percent real rate and annual withdrawals for monitoring costs of approximately \$3 million per year in 2000 dollars,⁽³⁾ the level of decommissioning funding assurance required at the beginning of 2002 to meet the site specific decommissioning cost estimate is \$305,720,175.

2. Total amount accumulated in the decommissioning funds as of the end of 2001:

The value of the Millstone Unit No. 1 decommissioning trust funds, as of December 31, 2001, is \$287.1 million. The value of the parent guarantee remains at \$26 million. The value of the funds combined with the parent guarantee exceeds the

⁽¹⁾ B. D. Kenyon letter to U.S. Nuclear Regulatory Commission, "Millstone Nuclear Power Station Unit No. 1, Certification of Permanent Cessation of Power Operations and that Fuel Has Been Permanently Removed from the Reactor," dated July 21, 1998.

⁽²⁾ J. P. O'Hanlon and B. D. Kenyon letter to U.S. Nuclear Regulatory Commission, "Application for Order and Conforming Amendments for License Transfer," dated August 31, 2000, (B18212).

⁽³⁾ The annual monitoring costs include spent fuel storage costs and are reflected in the Decommissioning Funding Worksheet for Millstone Unit No. 1 as costs in addition to the \$504.5 base estimate.

funding assurance required as of the beginning of 2002 to meet the site specific decommissioning cost estimate.

3. Schedule of the annual amounts remaining to be collected:

This item is not applicable. As described in the Application for License Transfer, DNC is providing decommissioning funding assurance by a combination of prepayment and parent guarantee.

4. Assumptions used regarding rates of escalation in decommissioning costs, rates of earnings on decommissioning funds, and rates of other factors used in funding projections:

The Decommissioning Funding Worksheet for Millstone Unit No. 1 (Exhibit L to the Application for License Transfer) assumes a 4.5 percent inflation rate and a 6.5 percent after tax earning (i.e., a 2 percent real rate of return).

5. Contracts upon which the licensees are relying for assurance:

DNC is not relying on any long-term contracts for purposes of providing decommissioning funding within the meaning of 10 CFR 50.75(e)(1)(v).

6. Modifications to licensees' current method of providing financial assurance occurring since the last submitted report:

The Application for License Transfer described the method of financial assurance that would be provided by DNC for Millstone Unit No. 1 after the license transfer. There have been no modifications to DNC's method of providing financial assurance, as approved by the NRC, since the license transfer.

7. Material changes to the trust agreements:

No material changes have been made to the trust agreements as they were provided to the NRC in connection with the license transfer. Certain administrative amendments were made to the Dominion Nuclear Connecticut, Inc. Qualified Nuclear Decommissioning Trust Agreement and Dominion Nuclear Connecticut, Inc. Nonqualified Nuclear Decommissioning Trust Agreement, as well as to the Master Trust Agreement Reserve Funds for Millstone 3 Nuclear Unit Decommissioning Costs. These amendments allow the decommissioning funds of the Millstone Unit No. 3 minority owners, which are held in trust under the Master Trust Agreement Reserve Funds for Millstone 3 Nuclear Unit Decommissioning Costs, be managed under the terms of the Dominion Nuclear Connecticut, Inc. (DNC) trust agreements.

Attachment 2

Millstone Nuclear Power Station, Unit No. 2

2001 Decommissioning Funding Status Report

Millstone Unit No. 2

I. Summary

Millstone Unit No. 2 is an 870 MWe Pressurized Water Reactor. Unit No. 2 is owned in its entirety by Dominion Nuclear Connecticut, Inc. (DNC). Millstone Unit No. 2 has a license expiration of July 31, 2015.

II. Filing Requirements

1. Decommissioning Funding Estimate:

The Nuclear Regulatory Commission (NRC) minimum formula amount for Millstone Unit No. 2, calculated in accordance with 10 CFR 50.75(b) and (c) and NUREG-1307, Revision 9 guidelines, is \$305 million.

2. Total amount accumulated in the decommissioning fund as of the end of 2001:

The market value of the Millstone Unit No. 2 decommissioning trust funds, as of December 31, 2001, is \$276 million. Crediting an annual two percent real rate of return through the license expiration date, the adjusted value of the funds is \$364.1 million.

3. Schedule of the annual amounts remaining to be collected:

This item is not applicable, because DNC is providing decommissioning funding assurance by prepayment. When the two percent annual real rate of return is credited through the term of the license, as permitted by 10 CFR 50.75(e)(1), the value of the funds exceeds the NRC minimum funding requirements.

4. Assumptions used regarding rates of escalation in decommissioning costs, rates of earnings on decommissioning funds, and rates of other factors used in funding projections:

A two percent real growth rate is assumed in calculating the adjusted value of the funds.

5. Contracts upon which licensees are relying for assurance:

DNC is not relying on any long-term contracts for purposes of providing decommissioning funding within the meaning of 10 CFR 50.75(e)(1)(v).

6. Modifications to licensees' current method of providing financial assurance occurring since the last submitted report:

The Application for License Transfer⁽¹⁾ described the method of financial assurance that would be provided by DNC for Millstone Unit No. 2 after the license transfer. There have been no modifications to DNC's method of providing financial assurance, as approved by the NRC, since the license transfer.

7. Material changes to the trust agreements:

No material changes have been made to the trust agreements as they were provided to the NRC in connection with the license transfer. Certain administrative amendments were made to the Dominion Nuclear Connecticut, Inc. Qualified Nuclear Decommissioning Trust Agreement and Dominion Nuclear Connecticut, Inc. Nonqualified Nuclear Decommissioning Trust Agreement, as well as to the Master Trust Agreement Reserve Funds for Millstone 3 Nuclear Unit Decommissioning Costs. These amendments allow the decommissioning funds of the Millstone Unit No. 3 minority owners, which are held in trust under the Master Trust Agreement Reserve Funds for Millstone 3 Nuclear Unit Decommissioning Costs, be managed under the terms of the Dominion Nuclear Connecticut, Inc. (DNC) trust agreements.

⁽¹⁾ J. P. O'Hanlon and B. D. Kenyon letter to U.S. Nuclear Regulatory Commission, "Application for Order and Conforming Amendments for License Transfer," dated August 31, 2000, (B18212).

Attachment 3

Millstone Nuclear Power Station, Unit No. 3

2001 Decommissioning Funding Status Report

Millstone Unit No. 3

I. Summary

Millstone Unit No. 3 is a 1,150 MWe Pressurized Water Reactor. Millstone Unit No. 3 is owned jointly by Dominion Nuclear Connecticut, Inc. (DNC), Central Vermont Public Service Corporation, and Massachusetts Municipal Wholesale Electric Company. The respective ownership percentages are included in item 2 below. Millstone Unit No. 3 has a license expiration of November 25, 2025.

II. Filing Requirements

1. Decommissioning Funding Estimate:

The Nuclear Regulatory Commission (NRC) minimum formula amount for Millstone Unit No. 3, calculated in accordance with 10 CFR 50.75(b) and (c) and NUREG-1307, Revision 9 guidelines, is \$324 million. The obligations of each of the co-owners is set forth in item 2 below.

2. Total amount accumulated in the decommissioning fund as of the end of 2001:

The market value of the Millstone Unit No. 3 decommissioning trust funds as of December 31, 2001, for each co-owner is set forth below.

Owner	Percent Ownership	NRC Minimum Amount	Trust Fund Balance (in Millions)
DNC	93.47	\$302.84	\$270.9
Central Vermont Public Service Corporation (CVPS)	1.73	5.61	4.3
Massachusetts Municipal Wholesale Electric Company (MMWEC)	4.8	15.55	12.0
Total	100.0	\$324	\$287.2

Crediting two percent real earnings through the license expiration date, the adjusted values of the funds owned by DNC, CVPS, and MMWEC are \$435.7 million, \$6.9 million, and \$19.3 million, respectively.

3. Schedule of the annual amounts remaining to be collected:

Decommissioning funding assurance is provided by prepayment. When the two percent annual real rate of return is credited through the term of the license, as permitted by 10 CFR 50.75(e)(1), the value of the funds exceeds the NRC minimum funding requirements. MMWEC, however, is continuing to collect and deposit an approximate \$59,393 per month towards decommissioning costs.

4. Assumptions used regarding rates of escalation in decommissioning costs, rates of earnings on decommissioning funds, and rates of other factors used in funding projections:

A two percent real growth rate is assumed in calculating the adjusted value of the funds.

5. Contracts upon which the licensees are relying for assurance:

No joint owner relies on any long-term contracts for purposes of providing decommissioning funding within the meaning of 10 CFR 50.75(e)(1)(v).

6. Modifications to licensees' current method of providing financial assurance occurring since the last submitted report:

The Application for License Transfer⁽¹⁾ described the method of financial assurance that would be provided by DNC for Millstone Unit No. 3 after the license transfer. There have been no modifications to DNC's method of providing financial assurance, as approved by the NRC, since the license transfer. CVPS is now also providing decommissioning funding assurance by the pre-payment method. Although the adjusted value of the MMWEC owned funds also exceeds the NRC minimum funding requirements, MMWEC continues to collect and deposit additional funds in this trust.

7. Material changes to trust agreements:

No material changes have been made to the trust agreements as they were provided to the NRC in connection with the license transfer. Certain administrative amendments were made to the Dominion Nuclear Connecticut, Inc. Qualified Nuclear Decommissioning Trust Agreement and Dominion Nuclear Connecticut, Inc. Nonqualified Nuclear Decommissioning Trust Agreement, as well as to the Master Trust Agreement Reserve Funds for Millstone 3 Nuclear Unit Decommissioning Costs. These amendments allow the decommissioning funds of the Millstone Unit No. 3 minority owners, which are held in trust under the Master Trust Agreement Reserve Funds for Millstone 3 Nuclear Unit Decommissioning Costs, be managed under the terms of the Dominion Nuclear Connecticut, Inc. (DNC) trust agreements.

Updated Financial Test for Millstone Unit No. 1 Parent Guarantee

Updated Financial Test for Millstone Unit No. 1 Parent Guarantee

In accordance with 10 CFR 50.75(e)(1)(iii)(B) and 10 CFR 30, Appendix A, a statement showing continued compliance with the Nuclear Regulatory Commission's (NRC) financial tests for parent guarantees is provided below. A copy of Dominion Resources, Inc. (DRI) current financial statements follows (see Enclosure 1). A current estimate of the decommissioning funding assurance required for Millstone Unit No. 1 is provided in Attachment 1, Item 1, of this submittal. No adjustment to the parent guarantee is required to provide this continued funding assurance.

PART I

ITEM 1. BUSINESS

THE COMPANY

Dominion Resources, Inc. is a fully integrated gas and electric holding company headquartered in Richmond, Virginia. Incorporated in Virginia in 1983, Dominion is a registered public utility holding company under the Public Utility Holding Company Act of 1935 (the 1935 Act).

The term "Dominion" is used throughout this report and, depending on the context of its use, may represent any of the following: the legal entity, Dominion Resources, Inc., one of Dominion Resources, Inc.'s consolidated subsidiaries or the entirety of Dominion Resources, Inc. and its consolidated subsidiaries.

Recent Developments

With the completion of the acquisition of Consolidated Natural Gas Company (CNG) in January 2000, Dominion evolved from an utility holding company principally engaged in the production and sale of electric power to a fully integrated electric and natural gas utility serving wholesale and retail markets in the Midwest, Northeast, and Mid-Atlantic portions of the United States. This region is home to approximately 40% of the nation's energy consumption. Dominion refers to this region as "MAIN to Maine." MAIN is an acronym for the Mid-America Interconnected Network, which comprises all or parts of the states of Missouri, Illinois, Wisconsin, Michigan, Iowa and Minnesota.

Dominion made two significant acquisitions in 2001. In March 2001, Dominion acquired Millstone Power Station (Millstone), a nuclear power station located in Waterford, Connecticut, for \$1.3 billion in cash. The acquisition includes a 100 percent ownership interest in Unit 1 and Unit 2 and a 93.47 percent ownership interest in Unit 3 for a total of 1,954 Mw of generating capacity. Unit 1 is being decommissioned and is no longer in service. As part of the transaction, Dominion acquired the decommissioning trusts for all three units. The trusts were fully funded to the regulatory minimum at closing.

In November 2001, Dominion acquired Louis Dreyfus Natural Gas Corp. (Louis Dreyfus) for \$1.8 billion in cash and Dominion common stock. Louis Dreyfus is a natural gas and oil exploration and production company headquartered in Oklahoma City, Oklahoma. The addition of Louis Drefyus increased Dominion's proved gas and oil reserves by approximately 60 percent.

In February 2002, Dominion reached an agreement to purchase Mirant State Line Ventures, Inc. (State Line), whose assets include a 515 Mw coal-fired generation facility located near Hammond, Indiana. Under terms of the agreement, Dominion will acquire 100 percent ownership of State Line from Mirant Corporation for approximately \$182 million. The transaction is subject to approval under the United States antitrust laws, by the Federal Energy Regulatory Commission, and other customary closing conditions. Dominion expects the transaction to close during the second quarter of 2002.

Dominion became a registered public utility holding company when it completed the CNG acquisition. The 1935 Act prohibits registered companies from owning businesses unrelated to utility operations or other energy related businesses. To comply, Dominion has divested the core operating businesses of Dominion Capital, Inc. (DCI), its financial services subsidiary. To secure regulatory approval for the merger, Dominion and CNG also agreed to divest Virginia Natural Gas, Inc. (VNG), CNG's gas distribution subsidiary located in Norfolk, Virginia. In October 2000, Dominion sold VNG to AGL Resources Inc.

Because the Company is no longer investing in or creating energy business overseas, Dominion divested all of its Latin American generation businesses and its 80 percent interest in the Corby Power Station in the United Kingdom in 1999 and 2000. Dominion continues to explore the sale of CNG's remaining international operations in Australia.

As part of the acquisition of CNG, Dominion created a subsidiary service company, Dominion Resources Services, Inc. (Services). Services provides administrative, financial, legal, and other services to Dominion's operating subsidiaries. During 2000, CNG also had a service company, Consolidated Natural Gas Service Company, Inc. Effective January 1, 2001, the two service companies were combined into one service company.

Dominion's acquisitions and divestitures are described in more detail in Notes 5 and 6 to the Consolidated Financial Statements of the 2001 Annual Report.

Operating Segments

Dominion manages its operations along three primary business lines that integrate its electric and gas services, streamline operations and position it for long-term growth in the competitive marketplace.

- *Dominion Energy*—Dominion Energy manages nearly 22,000-megawatts of generation, 7,600 miles of gas transmission pipeline, and a 959 billion cubic foot natural gas storage network. It also manages Dominion's generation growth strategy, energy trading, marketing, and risk management activities. Dominion Energy operates generation facilities in Virginia, West Virginia, North Carolina, Illinois and Connecticut.
- *Dominion Delivery*—Dominion Delivery manages the local electric and gas distribution systems serving nearly 4 million customers, about 6,000 miles of electric transmission lines and customer service operations. Dominion Delivery operates transmission and distribution systems in Virginia, West Virginia, North Carolina, Pennsylvania and Ohio. Dominion Delivery also includes our interest in Dominion Fiber Ventures LLC, which owns Dominion Telecom with its 14,700 route-mile fiber optic network (including 4,600 route-miles of lit fiber) and related telecommunications and advanced data services.
- *Dominion Exploration & Production*—Dominion Exploration & Production (Dominion E&P) manages the onshore and offshore gas and oil exploration, development and production activities, including the properties acquired from the acquisition of Louis Dreyfus. With approximately 4.9 trillion cubic feet equivalent of proved natural gas reserves and an annual production capacity exceeding 450 billion cubic feet, Dominion E&P is one of the nation's largest independent oil and gas operators. Dominion E&P operates on the outer continental shelf and deepwater areas of the Gulf of Mexico, western Canada, the Appalachian Basin, the Permian Basin, the Mid-Continent Region and other selected regions in the continental United States.

While Dominion manages its daily operations as described above, its assets remain wholly-owned by its legal subsidiaries, which are described below. For additional financial information on business segments and geographic areas, see Note 30 to the Consolidated Financial Statements of the 2001 Annual Report.

Dominion's principal direct legal subsidiaries are Virginia Electric and Power Company (Virginia Power), Consolidated Natural Gas Company (CNG), Dominion Energy, Inc. (DEI) and DCI. Virginia Power is a regulated public utility that generates, transmits and distributes power for sale in Virginia and northeastern North Carolina. CNG is a producer, transporter, distributor and retail marketer of natural gas, serving customers in Pennsylvania, Ohio, West Virginia, and other states. DEI is an independent power and natural gas and exploration subsidiary. Dominion has substantially completed its strategy to exit the core operating business of DCI. DCI's primary business was financial services including loan administration, commercial lending and residential mortgage lending.

As of December 31, 2001, Dominion and its subsidiaries had approximately 17,100 full-time employees. Approximately, 6,500 employees are subject to collective bargaining agreements. Contracts of certain employees represented by the International Brotherhood of Electrical Workers (IBEW) and Services Employees International Union (SEIU) expire at the end of the first quarter of 2002. Contract negotiations between Dominion and both unions have commenced.

Dominion's principal executive offices are located at 120 Tredegar Street, Richmond, Virginia 23219 and its telephone number is (804) 819-2000.

COMPETITION

Ongoing deregulation and restructuring in the electric and gas industries are creating issues that affect or will likely affect the markets where Dominion Energy and Dominion Delivery do business, and govern the way these business units and their competitors operate. The electric power and natural gas industries are in the process of evolving into a competitive marketplace where energy companies will compete to provide energy and energy services to a broad range of customers.

Electric Industry

The electric industry has come under increased scrutiny in the past year with the California energy crisis as well as the Enron Corp. bankruptcy. Although progress varies, pro-competition electric legislation is still under consideration in many states.

Prior to 2002, competition for retail electric sales in Virginia was limited to the extent customers moved into another utility service territory, used other energy sources instead of electric power, generated their own electricity or participated in a retail pilot program. The Virginia Electric Utility Restructuring Act (Virginia Restructuring Act) provides for a phased-in transition to a fully competitive retail electric market during the period January 1, 2002 through January 1, 2004. The Virginia Commission has ordered that retail choice be fully implemented in Virginia by January 1, 2003.

Under the Virginia Restructuring Act, the generation portion of Dominion's Virginia jurisdictional operations is no longer subject to cost-based rate regulation effective January 1, 2002. Base rates (excluding fuel costs and certain other allowable adjustments) are capped and will remain unchanged until July 2007 unless terminated sooner as provided by the Virginia Restructuring Act. Recovery of generation-related costs will continue to be provided through capped rates and a wires charge. A wires charge, where applicable, will be assessed to those customers opting for alternative suppliers. The Virginia Restructuring Act also requires Dominion to join or establish a regional transmission entity, phase in retail choice beginning January 1, 2002, and functionally separate its electric generation from its electric transmission and distribution operations. For additional information on electric deregulation in Virginia, see Regulated Electric Operations in Future Issues and Outlook of Management's Discussion and Analysis (MD&A) of the 2001 Annual Report.

In North Carolina, regulators and legislators continue to explore the issues related to electric industry restructuring, the development of a competitive, wholesale market and retail competition. However, there has been little recent activity.

Dominion plans to continue to participate actively in both the legislative and regulatory processes to ensure an orderly transition from a regulated environment. Dominion has responded to the trends toward competition by cutting costs, re-engineering core business processes, and pursuing innovative approaches to serving traditional and future markets.

Gas Industry

Dominion Delivery

Deregulation is at varying stages in the three states in which Dominion's gas distribution subsidiaries operate. In Pennsylvania, supplier choice is available for all residential and small commercial customers. In Ohio, legislation has not been enacted to require supplier choice for residential and commercial natural gas consumers. However, Dominion offers Energy Choice to customers on its own initiative, in cooperation with The Public Utilities Commission of Ohio. West Virginia legislation currently does not require customer choice in its retail natural gas markets nor has Dominion voluntarily initiated an Energy Choice program. However, the West Virginia Public Service Commission recently issued regulations to govern pooling services. These services are one of the tools that natural gas suppliers may utilize to provide retail customer choice in the future.

See Regulated Gas Distribution Operations in Future Issues and Outlook of MD&A of the 2001 Annual Report for additional information.

Dominion Energy

Dominion's large underground natural gas storage capacity and the location of its gridlike pipeline system are a significant link between the country's major gas pipelines and large markets on the East Coast. The Company's pipelines are part of an interconnected gas transmission system which continues to provide retail end users the accessibility of supplies nationwide as gas utilities unbundle services at the retail level.

Dominion competes with domestic as well as Canadian pipeline companies and gas marketers seeking to provide or arrange transportation, storage and other services for customers. Alternative energy sources, such as

fuel oil or coal, provide another level of competition. Although competition is based primarily on price, the array of services that can be provided to customers is also an important factor. The combination of capacity rights held on certain longline pipelines, a large storage capability and the availability of numerous receipt and delivery points along its own pipeline system enables Dominion to tailor its services to meet the needs of individual customers.

Dominion Exploration & Production

Dominion conducts exploration and production operations in several major gas and oil producing basins in the United States, both onshore and offshore, and in Canada. Competitors range from major, international oil companies, to the smaller, independent producers.

Dominion faces significant competition in the bidding for federal offshore leases and in obtaining leases and drilling rights for onshore properties. Since Dominion is the operator of a number of properties, it also faces competition in securing drilling equipment and supplies for exploration and development.

In terms of its production activities, Dominion faces a diverse and active market with purchasers seeking to balance the advantage of flexible spot market supplies with the security of longer-term contracts. The growth of energy marketing firms has introduced additional competition for Dominion. When the economics warrant, Dominion attempts to sell its gas production under long-term contracts to customers such as electric power generators and others that require a secure source of supply. However, these arrangements represent only a portion of the Dominion's gas production. The deliverability of gas produced is influenced by competition for downstream pipeline transportation capacity. Dominion continues to develop marketing strategies, contracts and arrangements to address customer needs for intermediate and long-term gas supplies as well as other energy services. Dominion also participates in price risk management activities to manage exposure to price volatility in connection with the production and sale of natural gas and oil.

REGULATION

General

Dominion is subject to regulation by various federal, state, and local governmental agencies. These include the Securities and Exchange Commission (SEC), the Federal Energy Regulatory Commission (FERC), the Environmental Protection Agency (EPA), Department of Energy (DOE), the Nuclear Regulatory Commission (NRC), the Army Corps of Engineers, and other federal, state and local authorities.

State Regulation

Electric

The Virginia State Corporation Commission (Virginia Commission) and the North Carolina Utilities Commission (North Carolina Commission) regulate rates for retail electric sales in those states and FERC approves rates for electric sales to wholesale customers. The current Virginia fuel factor applied to Dominion's regulated electric generation is 1.613 cents per kWh which will remain in effect through December 31, 2002. The North Carolina Commission has approved a fuel adjustment factor of 1.285 cents per kWh, effective January 1, 2002.

Under the Virginia Restructuring Act, the generation portion of Dominion's Virginia jurisdictional operations is no longer subject to cost-based rate regulation. Base rates (excluding fuel costs and certain other allowable adjustments) will remain unchanged until July 2007 unless terminated sooner as provided by the Virginia Restructuring Act. Recovery of generation-related costs will continue to be provided through capped rates and, where applicable, wires charges for those customers opting for alternative suppliers of electricity. The Virginia Restructuring Act also requires Dominion to join or establish a regional transmission entity, phase in retail choice beginning January 1, 2002, and functionally separate its electric generation from its

electric transmission and distribution operations.

In connection with the North Carolina Commission approval of the CNG acquisition, Dominion agreed not to request an increase in North Carolina retail electric base rates for both the Dominion Energy and Dominion Delivery segments until 2006, except for certain events that would have a significant financial impact on the Company. Fuel rates are still subject to change under the annual fuel cost adjustment proceedings.

Dominion's electric utility subsidiary holds certificates of public convenience and necessity authorizing it to construct and operate its electric facilities now in operation and to sell electricity to customers. However, it may not construct or incur financial commitments for construction of any substantial generating facilities or large capacity transmission lines without the prior approval of various state and federal government agencies.

For additional information on deregulation in the electric industry and current rate matters, see Electric Industry in COMPETITION and Regulated Electric Operations in Future Issues and Outlook of MD&A of the 2001 Annual Report.

Gas

Dominion's gas distribution business subsidiaries are subject to regulation of rates and other aspects of their businesses by the states in which they operate—Pennsylvania, Ohio, and West Virginia. Dominion's regulated gas subsidiaries continue to seek general rate increases with regard to their regulated gathering, transmission, storage and gas distribution services. Such rate changes are requested on a timely basis to recover increased operating costs and to ensure that rates of return are compatible with the cost of raising capital. In addition to general rate increases, certain of Dominion's gas distribution subsidiaries make separate filings with their respective regulatory commissions to reflect changes in the costs of purchased gas.

For additional information on deregulation in the gas industry and current rate matters, see Gas Industry in COMPETITION and Regulated Gas Distribution Operations in Future Issues and Outlook of MD&A of the 2001 Annual Report.

Public Utility Holding Company Act of 1935 (1935 Act)

Dominion is a registered holding company under the 1935 Act. The 1935 Act and related regulations issued by the SEC govern activities of Dominion and its subsidiaries with respect to the issuance and acquisition of securities, acquisition and sale of utility assets, certain transactions among affiliates, engaging in business activities not directly related to the utility or energy business, and other matters. Over the past few years, several bills have been introduced in Congress to repeal the 1935 Act, and repeal provisions are currently again pending before Congress. The likelihood that such repeal will be enacted is highly uncertain.

Federal Energy Regulatory Commission (FERC)

Electric

Under the Federal Powers Act, FERC regulates wholesale sales of electricity and transmission of electricity in interstate commerce by public utilities. Dominion's electric utility subsidiary sells electricity in the wholesale market under its market-based sales tariff authorized by FERC but has agreed not to make wholesale power sales under this tariff to loads located within its service territory. In January 2002, Dominion filed for FERC approval of a tariff to sell wholesale power within or outside its service territory at capped rates based on Dominion's embedded cost of generation. For additional discussion on this matter, see Regulated Electric Operations—Wholesale Competition in Future Issues and Outlook of MD&A of the 2001 Annual Report.

FERC Order No. 2000 requires that each public utility that owns, operates, or controls facilities for the transmission of electric energy in interstate commerce make certain filings with respect to forming and participating in a regional transmission organization (RTO). To meet the requirements of Order No. 2000,

Dominion and eight other member companies (Alliance Companies), filed with FERC for approval of a proposed "Alliance RTO". In December 2001, FERC concluded the Alliance Companies lack sufficient scope as an RTO and also ordered the Alliance Companies to determine how they could fit within the Midwest Independent System Operator. Dominion will examine the possibility of joining RTOs other than those representing Midwest utilities, as directed by FERC. For discussion on the current status of the Alliance RTO, see Regulated Electric Operations—Alliance RTO in Future Issues and Outlook of MD&A of the 2001 Annual Report.

Gas

FERC regulates the transportation and sale for resale of natural gas in interstate commerce under the Natural Gas Act of 1938 and the Natural Gas Policy Act of 1978, as amended. FERC also has jurisdiction over the construction of pipeline and related facilities used in transportation and storage of natural gas in interstate commerce.

Dominion's interstate gas transportation and storage activities are regulated under the Natural Gas Act of 1938 and are conducted in accordance with certificates, tariffs and service agreements on file with FERC. Dominion is also subject to the Natural Gas Pipeline Safety Act of 1968, which authorizes the establishment and enforcement of federal pipeline safety standards and places jurisdiction of these standards with the Department of Transportation.

Competition in the natural gas industry was significantly increased by FERC Order 636, issued in 1992. FERC Order 636 requires transmission pipelines to operate as open-access transporters and provide transportation and storage services on an equal basis for all gas supplies, whether purchased from Dominion or from another gas supplier.

FERC has also issued a Notice of Proposed Rulemaking on modifying code of conduct regulations. FERC proposes to eliminate the separate code of conduct regulations for natural gas pipelines and electric transmission utilities and replace these requirements with uniform standards applicable to interstate "Transmission Providers" of both natural gas and electricity. For additional discussion on this matter, see Regulated Gas Operations—FERC Policy Developments in Future Issues and Outlook of MD&A of the 2001 Annual Report.

Environmental Matters

Each segment of our business faces substantial regulation and compliance costs with respect to environmental matters. For discussion of significant aspects of these matters, including current and planned capital expenditures relating to environmental compliance, see Environmental Matters in Future Issues and Outlook of MD&A of the 2001 Annual Report. Additional information can also be found in Item 3. LEGAL PROCEEDINGS and Note 27 to the Consolidated Financial Statements of the 2001 Annual Report.

From time to time Dominion may be identified as a potentially responsible party to a superfund site. The EPA (or a state) can either (a) allow such a party to conduct and pay for a remedial investigation, feasibility study and remedial action or (b) conduct the remedial investigation and action and then seek reimbursement from the parties. Each party can be held jointly, severally and strictly liable for all costs. These parties can also bring contribution actions against each other and seek reimbursement from their insurance companies. As a result, Dominion may be responsible for the costs of remedial investigation and actions under the Superfund Act or other laws or regulations regarding the remediation of waste. Dominion does not believe that any currently identified sites will result in significant liabilities.

Dominion has determined that it is associated with 20 former manufactured gas plant sites. Studies conducted by other utilities at their former manufactured gas plants have indicated that their sites contain coal tar and other potentially harmful materials. None of the 20 former sites with which Dominion is associated is under investigation by any state or federal environmental agency, and no investigation or action is currently

anticipated. At this time it is not known to what degree these sites may contain environmental contamination. Dominion is not able to estimate the cost, if any, that may be required for the possible remediation of these sites.

Dominion has applied for or obtained the necessary environmental permits material to the operation of its electric generating stations. Many of these permits are subject to re-issuance and continuing review.

Nuclear Regulatory Commission (NRC)

All aspects of the operation and maintenance of Dominion's nuclear power stations, which are part of the Dominion Energy segment, are regulated by the NRC. Operating licenses issued by the NRC are subject to revocation, suspension or modification, and operation of a nuclear unit may be suspended if the NRC determines that the public interest, health or safety so requires.

Dominion filed applications for 20 year life-extension for the North Anna and Surry units in May 2001. The NRC has accepted and is reviewing the applications. Dominion has also initiated preparations to apply for a 20 year extension of the licenses for both of its operating Millstone units. For more information on this matter, see Nuclear Relicensing in Future Issues and Outlook of MD&A of the 2001 Annual Report.

From time to time, the NRC adopts new requirements for the operation and maintenance of nuclear facilities. In many cases, these new regulations require changes in the design, operation and maintenance of existing nuclear facilities. If the NRC adopts such requirements in the future, it could result in substantial increases in the cost of operating and maintaining Dominion's nuclear generating units.

Disposal of spent nuclear fuel (SNF) is a significant issue associated with the operation and decommissioning of nuclear facilities. The Nuclear Waste Policy Act (NWPA) of 1982 requires the federal government to make available by January 31, 1998 a permanent repository for high-level radioactive waste and SNF. In February 2002, the Secretary of Energy recommended that Yucca Mountain located in the state of Nevada be developed as the permanent repository. The plan may be appealed by the state of Nevada and is subject to various congressional approvals and NRC licensing.

Dominion and other utilities have petitioned for review in the U.S. Court of Appeals for the 11th Circuit, a matter involving the DOE and PECO Energy Company (PECO). The petitioners are challenging the DOE's action in allowing PECO to take credits against payments PECO would have been making into the Nuclear Waste Fund (NWF). The credits are part of a DOE settlement agreement with PECO for potential claims arising out of DOE's breach of its SNF storage obligation. The petition asserts that DOE violated the NWPA by improperly depleting the NWF and releasing PECO from a portion of its NWF obligation. The petition also seeks a declaration that credits against NWF payments violate the NWPA, an injunction against DOE implementing the credit and fee reduction provisions of the settlement agreement, and an injunction against DOE entering into similar agreements. The case was argued in December 2001, and is pending before the court.

The NRC also requires Dominion to decontaminate nuclear facilities once operations cease. This process is referred to as decommissioning, and Dominion is required by the NRC to prepare for it financially. For information on compliance with the NRC financial assurance requirements, see Note 16 to Consolidated Financial Statements of the 2001 Annual Report.

SOURCES OF ENERGY

Sources of Energy—Electricity

Dominion Energy provides electricity for use on a wholesale and a retail level. Dominion Energy can supply electricity demand either from its generation facilities in Virginia, West Virginia, North Carolina, Illinois and Connecticut or through purchased power contracts when needed. The following table outlines Dominion's generating units and capability.

Dominion's Power Generation

Plant	Location	Type of Fuel	Net Owned Summer Capability (Mw)
Owned Utility Generation			
Surry	Surry, VA	Nuclear	1,625
North Anna	Mineral, VA	Nuclear	1,628(a)
Bremo	Bremo Bluff, VA	Coal	227
Chesterfield	Chester, VA	Coal	1,229
Clover	Clover, VA	Coal	441(b)
Mt. Storm	Mt. Storm, WV	Coal	1,587
Chesapeake	Chesapeake, VA	Coal	595
Possum Point	Dumfries, VA	Coal	322
Yorktown	Yorktown, VA	Coal	326
Possum Point	Dumfries, VA	Oil	929
Yorktown	Yorktown, VA	Gas/Oil	818
North Branch	Bayard, WV	Waste Coal	74

		Total Capacity	<u>21,867</u>

Note: (CT) denotes combustion turbine and (CC) denotes combined cycle

- (a) Excludes 11.6 percent undivided interest owned by Old Dominion Electric Cooperative (ODEC).
- (b) Excludes 50 percent undivided interest owned by ODEC.
- (c) Excludes 40 percent undivided interest owned by Allegheny Generating Company, a subsidiary of Allegheny Energy, Inc.
- (d) Excludes 6.53 percent undivided interest in Unit 3 owned by Massachusetts Municipal Wholesale Electric Company and Central Vermont Public Service Company.
- (e) Excludes 50 percent undivided interest owned by Peoples Energy.
- (f) Excludes 50 percent undivided interest owned by Cogen Technologies Morgantown, Ltd. and Hickory Power Corporation.

Power Purchase Contracts

Dominion Energy purchases electricity under contracts with other suppliers to meet a portion of its system capacity requirements. As of December 31, 2001, Dominion has 43 power purchase contracts with a combined dependable summer capacity of 3,770 Mw. For information on the financial obligations under these agreements, see Note 27 to the Consolidated Financial Statements of the 2001 Annual Report.

In 2001, Dominion completed the purchase of three generating facilities and the termination of seven long-term power purchase contracts with non-utility generators. Dominion recorded a charge of approximately \$136 million, after taxes, in connection with these transactions.

Fuel for Electric Generation

Dominion uses a variety of fuels to power its electric generation. These include a mix of both nuclear fuel and fossil fuel as described further below.

Nuclear Fuel Supply

Dominion utilizes both long-term contracts and spot purchases to support the Company's nuclear fuel requirements. Worldwide market conditions are continuously evaluated to ensure a range of supply options at reasonable prices. Current agreements, inventories and spot market availability are expected to support current and planned fuel supply needs. Additional fuel is purchased as required to ensure optimum cost and inventory levels.

The DOE did not begin accepting SNF in 1998 as specified in the DOE contract. However, on-site SNF pool and dry container storage at the Surry and North Anna Power Stations are expected to be adequate for Dominion's needs until the DOE begins accepting SNF. See Nuclear Regulatory Commission (NRC) in REGULATION for additional information regarding SNF.

Fossil Fuel Supply

Dominion Energy utilizes coal, oil, and natural gas in its fossil fuel operations. Dominion Energy's coal supply is obtained through long-term contracts and spot purchases. Dominion anticipates sufficient supplies of coal will continue to be available at reasonable prices.

Oil and oil-fired generation are used primarily to support heavier system generation loads during very cold or very hot weather periods. System requirements are purchased under both short-term spot agreements and longer term contracts. A sufficient supply of oil is expected to be available over the next five to ten year period.

Dominion Energy uses natural gas as needed throughout the year for Dominion's jurisdictional and non-jurisdictional generation facilities. The Company's gas supply is obtained from various sources including: purchases from major and independent producers in the Southwest and Midwest regions; purchases from local producers in the Appalachian area; purchases from gas marketers; production from Company-owned wells in the Appalachian area, the Southwest, Midwest and offshore; and withdrawals from the Company's and third party underground storage fields. Dominion has the capability to buy and store natural gas at summer prices, which will then be consumed at the facilities during the winter.

Firm natural gas transportation contracts (capacity) exist that allow delivery of gas to our facilities. Dominion's capacity portfolio allows flexible natural gas deliveries to its gas turbine fleet, while minimizing costs. With natural gas being the preferred energy source for new electric generation, competition for existing gas capacity has increased. In order to ensure reliable delivery of natural gas, Dominion has acquired additional natural gas capacity and has a capacity plan in place designed to protect its fleet from any perceived or real capacity shortage in the market.

Interconnections

Dominion maintains major interconnections with Carolina Power and Light Company, American Electric Power Company, Inc., Allegheny Energy, Inc. and the utilities in the Pennsylvania-New Jersey-Maryland Power Pool. Through this major transmission network, Dominion has arrangements with these utilities for coordinated planning, operation, emergency assistance and exchanges of capacity and energy.

Sources of Energy—Gas

Gas Supply

Dominion Energy is engaged in the sale and storage of natural gas through its operating subsidiaries. Sources of gas supplies for sale to customers are the same as those described in Fossil Fuel Supply above.

Dominion continues to purchase volumes from the array of accessible producing basins using its firm capacity resources. These purchased supplies include Appalachian resources in Ohio, Pennsylvania and West Virginia, and production from the Gulf Coast, Mid-Continent and offshore areas. Upon FERC's restructuring of the interstate pipeline business in 1992 and 1993, pipelines no longer sell the delivered natural gas commodity; rather, customers provide their own gas supply for wholesale storage and/or delivery by the pipelines. Much of the supply is purchased by local distributors, energy marketing companies or end users, under seasonal or spot purchase agreements. While the average term of Dominion's gas purchase agreements has decreased, the reliability of supply continues to be adequate. The availability of supplies and heightened competition has forged a viable market, which has proven capable of satisfying the firm delivery requirement for supplies to Dominion's markets in a highly reliable manner.

Considering the large storage capacity, the volumes obtainable under its firm interstate pipeline capacity and gas supply contracts, Dominion-owned proved natural gas reserves, and assuming the future availability of spot market gas, management believes that supplies will be available to meet sales requirements for at least the next several years.

Gas Storage—Transmission

Dominion Energy's underground storage facilities play an important part in balancing gas supply with sales demand and are essential to servicing Dominion's large volume of space-heating business. In addition, storage capacity is an important element in the effective management of both gas supply and pipeline transport capacity. Dominion operates 26 underground gas storage fields located in Ohio, Pennsylvania, West Virginia and New York. Dominion owns 20 of these storage fields and has joint-ownership with other companies in six of the fields. The total designed capacity of the storage fields, including native gas, is approximately 959 billion cubic feet (bcf). Dominion's share of the total capacity is about 717 bcf. About one-half of the total capacity is base gas which remains in the reservoirs at all times to provide the primary pressure which enables the balance of the gas to be withdrawn as needed.

Dominion Transmission operates 756 bcf of the total designed storage capacity and owns 514 bcf of Dominion's capacity. Dominion Transmission utilizes a large portion of its turnable capacity to provide approximately 242 bcf of gas storage service for others. This service is provided principally to local distributors, end users, and other customers serving the Northeast.

Two of Dominion's gas distribution subsidiaries, Dominion East Ohio and Dominion Peoples, own and operate the remaining 203 bcf of storage capacity. In addition to owning their own storage, these companies, as well as several of Dominion's other subsidiaries, have access to a portion of the storage capacity operated by Dominion Transmission. The distribution subsidiaries also have capacity available in storage fields owned by others. Dominion controls other acreage in the Appalachian area suitable for the development of additional storage facilities which would enable further expansion of capacity to meet possible future storage needs.

FUTURE SOURCES OF ENERGY

In March 2001, the Virginia Commission issued an order approving Dominion's application to make modifications to its Possum Point Power Station. The order approves Dominion's plan to remove two existing oil-fired units from service, convert two existing coal-fired units to natural gas, and construct a new 540 Mw combined cycle unit to be operational by May 2003.

Dominion has identified capacity expansion of more than 6,000 Mw through 2006. This includes the Armstrong (600 Mw), Troy (600 Mw) and Pleasant (300 Mw) plants which will be operation in 2002, as well as the State Line acquisition (515 Mw) which is expected to be completed in the second quarter of 2002.

Dominion plans to expand its natural gas transmission system with a \$497 million, 263-mile interstate pipeline. Plans call for the Greenbrier Pipeline to originate in Kanawha County, West Virginia, with connections to Dominion Transmission and Tennessee Gas pipelines, and extend through southwest Virginia and into Granville County, North Carolina. In September 2001, Dominion announced that Piedmont Natural Gas would be a 33 percent owner in the pipeline project.

In 2001, Dominion announced it would develop its Devils Tower field. The project will utilize a spar that can produce up to 60,000 barrels of oil per day. First production is expected in mid-2003. Dominion owns 75 percent working interest in Devils Tower, with Pioneer Natural Resources Company owning the remaining 25 percent interest.

In November 2001, Dominion acquired Louis Dreyfus for \$1.8 billion in cash and Dominion common stock. The acquisition of Louis Dreyfus provided a 60 percent increase in Dominion's proved gas and oil reserves.

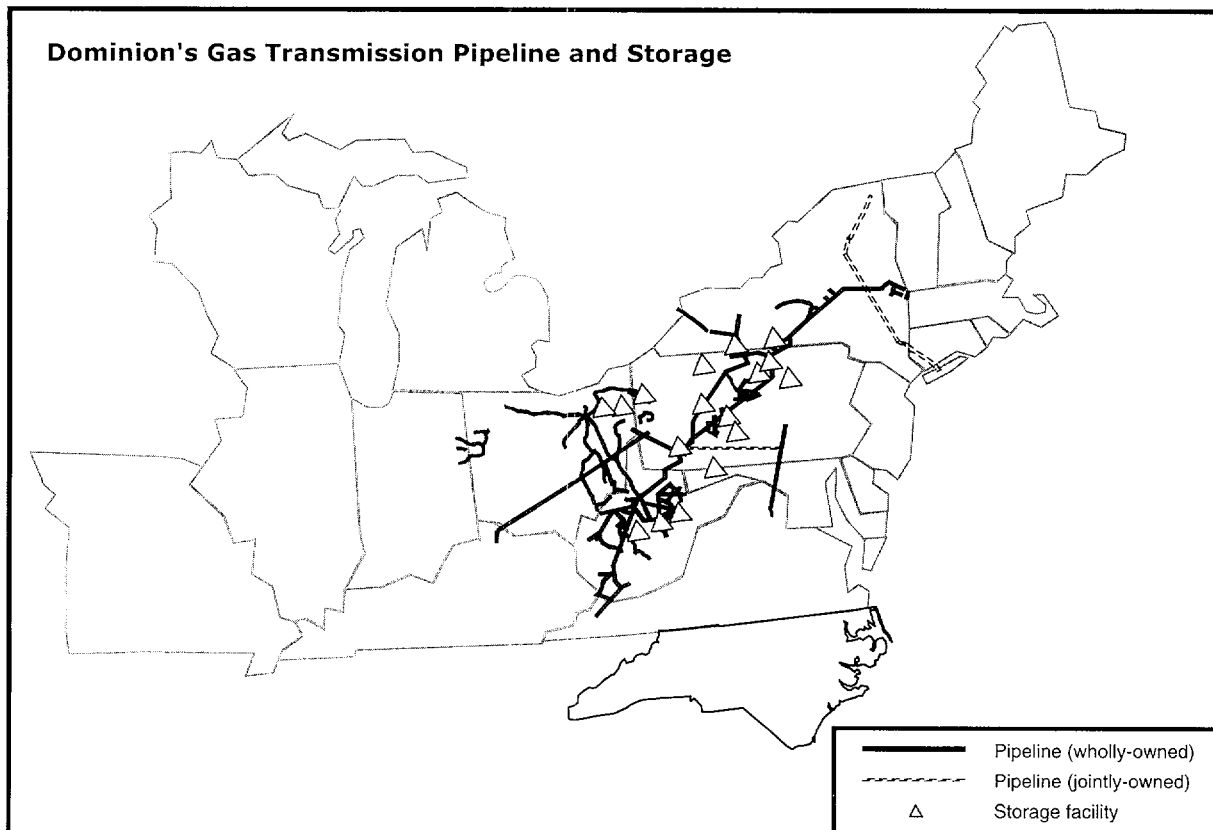

ITEM 2. PROPERTIES

Dominion owns the corporate office of its electric subsidiary. Substantially all of Dominion's electric subsidiary's property is subject to the lien of a mortgage securing its First and Refunding Mortgage Bonds.

Dominion also leases its principal executive office in Richmond, Virginia as well corporate offices in other cities in which its subsidiaries operate.

Dominion's assets consist primarily of its investments in its subsidiaries, the principal properties of which are described below.

Dominion Energy utilizes the electric generation facilities listed under the heading Sources of Energy—Dominion's Power Generation in Item 1. BUSINESS. Additionally, in connection with gas transmission and storage operations, Dominion Energy's storage operation consists of 26 storage fields, 342,105 acres of operated leaseholds, 2,069 storage wells and 822 miles of pipe. A significant portion of Dominion's investment in gas transmission facilities is for 6,440 miles of pipe required to move large volumes of gas throughout Dominion's operating area. The map below illustrates Dominion's gas transmission pipelines and storage facilities.

Dominion Energy also has 104 compressor stations with 555,628 installed compressor horsepower located in Ohio, West Virginia, Pennsylvania and New York. Some of the stations are used interchangeably for several functions.

Dominion Delivery has approximately 6,000 miles of electric transmission lines. Right-of-way grants from the apparent owners of real estate have been obtained for most electric lines, but underlying titles have not been examined except for transmission lines of 69 Kv or more. Where rights of way have not been obtained, they could be acquired from private owners by condemnation, if necessary. Many electric lines are on publicly owned property, where permission to operate can be revoked. Portions of Dominion Delivery's transmission lines cross national parks and forests under permits entitling the federal government to use, at specified charges, surplus capacity in the line if any exists.

Dominion Delivery's investment in its gas distribution network is located in the states of Ohio, Pennsylvania and West Virginia. The gas distribution network includes 27,277 miles of pipe, exclusive of service pipe.

Information detailing Dominion's oil and gas production and proved gas and oil reserves is as follows:

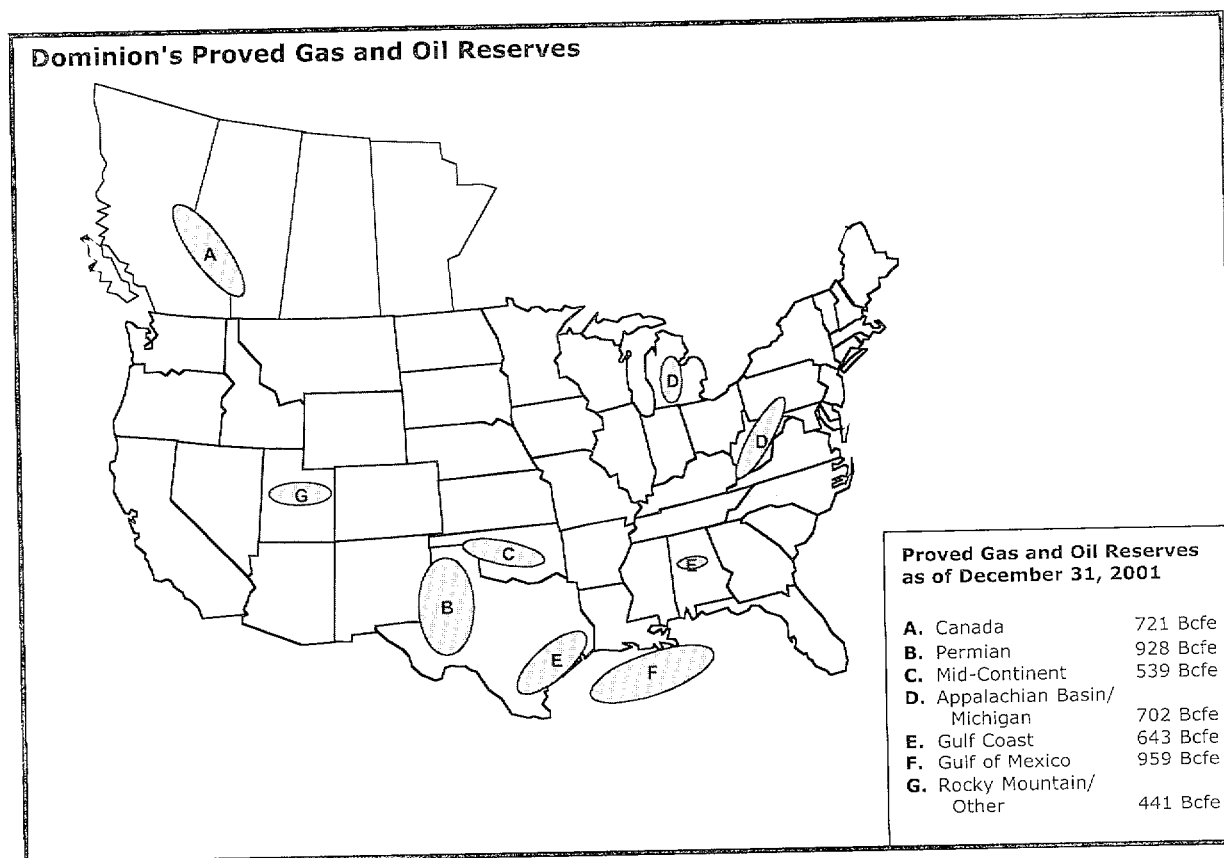

Company-Owned Proved Gas and Oil Reserves

Estimated net quantities of proved gas and oil reserves at December 31 of each of the last three years were as follows:

	2001		2000		1999	
	Proved Developed	Total Proved	Proved Developed	Total Proved	Proved Developed	Total Proved
Proved gas reserves (bcf)						
United States	2,962	3,453	1,593	1,858	600	600
Canada	332	449	361	479	405	514
Total proved gas reserves	<u>3,294</u>	<u>3,902</u>	<u>1,954</u>	<u>2,337</u>	<u>1,005</u>	<u>1,114</u>
Proved oil reserves (000 Bbls)						
United States	57,152	126,668	21,709	51,072	659	659
Canada	35,463	45,205	14,527	24,270	5,443	20,149
Total proved oil reserves	<u>92,615</u>	<u>171,873</u>	<u>36,236</u>	<u>75,342</u>	<u>6,102</u>	<u>20,808</u>

Certain subsidiaries of Dominion file Form EIA-23 with the DOE. The difference between the proved reserves reported on Form EIA-23 and the Company-owned proved reserves does not exceed five percent.

Estimated proved reserves as of December 31, 2001 are based upon studies prepared by Dominion's staff engineers and reviewed by Ralph E. Davis Associates, Inc. Calculations were prepared using standard geological and engineering methods generally accepted by the petroleum industry and in accordance with SEC guidelines.

Quantities of Gas and Oil Produced

Quantities of gas and oil produced during each of the last three years ending December 31 follows:

	<u>2001</u>	<u>2000</u>	<u>1999</u>
Gas production (bcf)			
United States	231	222	60
Canada	<u>42</u>	<u>47</u>	<u>37</u>
Total gas production	<u>273</u>	<u>269</u>	<u>97</u>
Oil production (000 Bbls)			
United States	7,268	6,436	595
Canada	<u>3,952</u>	<u>1,258</u>	<u>1,462</u>
Total oil production	<u>11,220</u>	<u>7,694</u>	<u>2,057</u>

The average sales price (including transfers to other operations as determined under Financial Accounting Standards Board rules) per thousand cubic feet (mcf) of gas produced during the years 2001, 2000 and 1999 was \$3.90, \$3.10 and \$2.06, respectively. The respective average sales prices for oil were \$21.73, \$22.88 and \$13.55 per barrel. The average production (lifting) cost per mcf equivalent of gas and oil produced during the years 2001, 2000 and 1999 was \$0.69, \$0.49 and \$0.71 respectively.

Net Wells Drilled in the Calendar Year

The number of net wells completed during each of the last three years ending December 31 follows:

	<u>2001</u>	<u>2000</u>	<u>1999</u>
Exploratory:

As of December 31, 2001, 116 gross (82 net) wells were in process of drilling, including wells temporarily suspended.

Acreage

The following table sets forth the gross and net developed and undeveloped acreage of Dominion's subsidiaries at December 31, 2001:

	Developed Acreage		Undeveloped Acreage	
	Gross	Net	Gross	Net
United States	3,653,057	2,276,117	2,338,105	1,271,651
Canada	1,307,997	708,886	1,019,587	740,796
Total	<u>4,961,054</u>	<u>2,985,003</u>	<u>3,357,692</u>	<u>2,012,447</u>

Productive Wells

The number of productive gas and oil wells in which Dominion's subsidiaries had an interest at December 31, 2001, follow:

	Gross	Net
Gas wells		
United States	22,262	13,826
Canada	913	573
Total gas wells	<u>23,175</u>	<u>14,399</u>
Oil wells		
United States	305	222
Canada	467	218
Total oil wells	<u>772</u>	<u>440</u>

Includes 178 gross (69 net) multiple completion gas wells and 8 gross (3 net) multiple completion oil wells.

ITEM 3. LEGAL PROCEEDINGS

From time to time, Dominion and its subsidiaries are alleged to be in violation or in default under orders, statutes, rules or regulations relating to the environment, compliance plans, or permits issued by various local, state and federal agencies for the construction or operation of facilities. From time to time, there may be administrative proceedings on these matters pending. In addition, in the normal course of business, Dominion and its subsidiaries are involved in various legal proceedings. Management believes that the ultimate resolution of these proceedings will not have a material adverse effect on the Company's financial position, liquidity or results of operations.

See REGULATION under Item 1. BUSINESS, Rate Matters in Future Issues and Outlook of MD&A of the 2001 Annual Report, and Note 27 to the Consolidated Financial Statements of the 2001 Annual Report for additional information on rate matters and various regulatory proceedings to which Dominion is a party.

In August 1990, Dominion Transmission entered into a Consent Order and Agreement with the Commonwealth of Pennsylvania Department of Environmental Protection (DEP) in which Dominion Transmission agreed with the DEP's determination of certain violations of the Pennsylvania Solid Waste Management Act, the Pennsylvania Clean Streams Law and related rules and regulations. No civil penalties have been assessed. The Order and Agreement requires Dominion Transmission to perform sampling, testing and analysis, and remediation at some of its Pennsylvania facilities. All actions under the Order and Agreement have been substantially completed as of December 31, 2001.

Before being acquired by Dominion, Louis Dreyfus was named as a defendant in several lawsuits originally filed in 1995 that were subsequently consolidated. The lawsuit is now pending in the Texas 93rd Judicial District Court in Hildago County, Texas. The lawsuit alleges that gas wells and related pipeline facilities operated by Louis Dreyfus, and other facilities operated by other defendants, caused an underground hydrocarbon plume in McAllen, Texas. The plaintiffs claim that they have suffered damages, including property damage and lost profits as a result of the plume and seek compensation for these items.

In July 1997, Jack Grynberg, an oil and gas entrepreneur, brought suit against CNG and several of its subsidiaries. The suit seeks damages for alleged fraudulent mismeasurement of gas volumes and underreporting of gas royalties from gas production taken from federal leases. In April 2001, the U.S. District Court of the Eastern District of Wyoming issued an order denying a motion to dismiss filed by the defendants in this matter. The defendants in this matter have filed a motion to certify the case for appeal.

In April 1999, the Department of Justice (DOJ) notified Virginia Power of alleged noncompliance with the EPA's oil spill prevention, control and countermeasures (SPCC) plans and facility response plan (FRP) requirements at one of its power stations. In December 2001, Virginia Power reached a settlement agreement with the DOJ and EPA covering all alleged noncompliance issues. The settlement will not have a material impact on Virginia Power's financial condition or results of operations. Virginia Power also identified matters at other power stations that the EPA might view as not in compliance with the SPCC and FRP requirements and reported these matters to the EPA, including its plans for correcting the issues.

In 1999, a class action was filed by Quinque Operating Co. and others against approximately 300 defendants, including CNG and several of its subsidiaries, in Stevens County, Kansas. The complaint seeks damages for alleged fraud, misrepresentation, conversion and assorted other claims, in the measurement and payment of gas royalties from privately held gas leases. The case has been remanded to the Kansas state court by the federal judge overseeing the Grynberg case. The plaintiffs will seek class certification and expedited discovery in Kansas. The defendants have filed motions to dismiss the case.

During 2000, Virginia Power received a Notice of Violation from EPA alleging that the company failed to obtain New Source Review permits under the Clean Air Act prior to undertaking specified construction projects at the Mt. Storm Power Station in West Virginia. The Attorney General of New York filed a suit against Virginia Power alleging similar violations of the Clean Air Act at the Mt. Storm Power Station. Virginia Power also received notices from the Attorneys General of Connecticut and New Jersey of their intentions to file suit for similar violations. Management believes that Virginia Power has obtained the necessary permits for its generating facilities. Virginia Power has reached an agreement in principle with the federal government and the state of New York to resolve this situation. The agreement in principle includes payment of a \$5 million civil penalty, a commitment of \$14 million for environmental projects in Virginia, West Virginia, Connecticut, New Jersey and New York, and a 12-year, \$1.2 billion capital investment program for environmental improvements at Virginia Power's coal-fired generating stations in Virginia and West Virginia. Dominion had already committed to a substantial portion of the \$1.2 billion expenditures for SO₂ and NO_x emissions controls. The negotiations over the terms of a binding settlement have expanded beyond the basic agreement in principle and are ongoing.

In 2001, the Delaware Court of Chancery dismissed a Class Action Complaint that was filed against CNG and certain directors in 1999 upon the announcement of Dominion's merger with CNG.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

None.

EXECUTIVE OFFICERS OF THE REGISTRANT

<u>Name and Age</u>	<u>Business Experience Past Five Years</u>
Thos. E. Capps (66)	Chairman of the Board of Directors, President and Chief Executive Officer of Dominion from August 2000 to date; Vice Chairman of the Board of Directors, President and Chief Executive Officer of Dominion from January 2000 to August 2000; Chairman of the Board of Directors, President and Chief Executive Officer of Dominion from September 1995 to January 2000.
Thomas N. Chewning (56) . . .	Executive Vice President and Chief Financial Officer of Dominion from May 1999 to date; Chief Executive Officer of Dominion Energy from May 1999 to January 2000; Executive Vice President and Chief Financial Officer of Consolidated Natural Gas Company from January 2000 to date; President and Chief Executive Officer of Dominion Energy, Inc. from October 1994 to May 1999; Senior Vice President of Dominion prior to January 1997.
Thomas F. Farrell, II (47)	Executive Vice President of Dominion from March 1999 to date; Chief Executive Officer of Virginia Electric and Power Company from May 1999 to date; Executive Vice President of Consolidated Natural Gas Company from January 2000 to date; Executive Vice President, General Counsel and Corporate Secretary of Virginia Electric and Power Company from July 1998 to April 1999; Executive Vice President and General Counsel of Virginia Electric and Power Company from April 1998 to June 1998; Executive Vice President of Virginia Electric and Power Company from September 1997 to April 1998; Senior Vice President—Corporate Affairs of Dominion from September 1997 to March 1999; Senior Vice President—Corporate Affairs and General Counsel of Dominion from January 1997 to September 1997.

<u>Name and Age</u>	<u>Business Experience Past Five Years</u>
James P. O'Hanlon (58)	Executive Vice President of Dominion and President and Chief Operating Officer of Virginia Electric and Power Company from May 1999 to date; Executive Vice President of Consolidated Natural Gas Company from January 2000 to date; President, Chief Operating Officer and Chief Nuclear Officer of Virginia Electric and Power Company from May 1999 to April 2000; Senior Vice President—Nuclear of Virginia Electric and Power Company prior to May 1999.
Duane C. Radtke (53)	Executive Vice President of Dominion and Consolidated Natural Gas Company from April 2001 to date; President of Devon Energy International from August 2000 to April 2001; Executive Vice President—Production of Santa Fe Snyder Corp. from May 1999 to August 2000; Senior Vice President—Production of Santa Fe Energy Resources from April 1998 to May 1999; President of Santa Fe Energy Resources (S.E. Asia) from August 1993 to April 1998.
Edgar M. Roach, Jr. (53)	Executive Vice President of Dominion from September 1997 to date; President and Chief Executive Officer of Virginia Electric and Power Company from December 2001 to date; Chief Executive Officer of Virginia Electric and Power Company from May 1999 to December 2001; Executive Vice President of Consolidated Natural Gas Company from January 2000 to date; Senior Vice President—Finance, Regulation and General Counsel of Virginia Electric and Power Company from January 1996 to September 1997.
Mark F. McGettrick (44)	Senior Vice President and Chief Administrative Officer of Dominion from January 2002 to date; Senior Vice President—Customer Service and Metering of Virginia Electric and Power Company from January 2000 to December 2001; Vice President—Customer Service and Metering of Virginia Electric and Power Company from January 1997 to January 2000.

G. Scott Hetzer (45)	Senior Vice President and Treasurer of Dominion from May 1999 to date; Senior Vice President and Treasurer of Virginia Electric and Power Company and Consolidated Natural Gas Company from January 2000 to date; Vice President and Treasurer of Dominion from October 1997 to May 1999; Managing Director of Wheat First Butcher Singer prior to October 1997.
James L. Sanderlin (60)	Senior Vice President—Law of Dominion from September 1999 to date; Senior Vice President—Law of Consolidated Natural Gas Company from January 2000 to date. Partner in the law firm of McGuire, Woods, Battle & Boothe LLP prior to September 1999.
Steven A. Rogers (40)	Vice President, Controller and Principal Accounting Officer of Dominion and Consolidated Natural Gas Company and Vice President and Principal Accounting Officer of Virginia Electric and Power Company from June 2000 to date; Controller of Virginia Electric and Power Company from January 2000 to May 2000. Controller of Dominion Energy, Inc. from September 1998 to June 2000; Vice President and Controller of Optacor Financial Services Company from February 1997 through September 1998.

PART II

ITEM 5. MARKET FOR THE REGISTRANT'S COMMON EQUITY AND RELATED STOCKHOLDER MATTERS

Dominion Resources common stock is listed on the New York Stock Exchange. At December 31, 2001, there were approximately 184,000 registered shareholders, including approximately 94,000 certificate holders. Quarterly information concerning stock prices and dividends contained in Note 32 to the Consolidated Financial Statements of the 2001 Annual Report for the fiscal year ended December 31, 2001, filed as Exhibit 13 to this report on Form 10-K, is incorporated by reference.

ITEM 6. SELECTED FINANCIAL DATA

This information contained under the caption "Selected Consolidated Financial Data" on page 50 of the 2001 Annual Report for the fiscal year ended December 31, 2001, filed as Exhibit 13 to this report on Form 10-K, is incorporated by reference.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This information contained under the caption Management's Discussion and Analysis of Financial Condition and Results of Operations on pages 31 through 50 of the 2001 Annual Report for the fiscal year ended December 31, 2001, filed as Exhibit 13 to this Form 10-K, is incorporated by reference.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

This information contained under the following captions:

- Risk Factors and Cautionary Statements That May Affect Future Results
- Market Rate Sensitive Instruments and Risk Management
- Commodity Price Risk—Trading Activities
- Commodity Price Risk—Non-Trading Activities
- Interest Rate Risk
- Foreign Exchange Risk
- Equity Price Risk
- Risk Management Policies

under Management's Discussion and Analysis of Financial Condition and Results of Operations on pages 31 through 32 and pages 49 through 50 of the 2001 Annual Report for the fiscal year ended December 31, 2001, filed as Exhibit 13 to this Form 10-K, is incorporated by reference.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

This information contained in the Consolidated Financial Statements on pages 25 through 30, pages 51 through 85 and the related report of Deloitte & Touche LLP, independent auditors, appearing on page 86 of the 2001 Annual Report for the fiscal year ended December 31, 2001, filed as Exhibit 13 to this report on Form 10-K, is incorporated by reference.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

PART III

ITEM 10. DIRECTORS AND EXECUTIVE OFFICERS OF THE REGISTRANT

Information regarding the directors of Dominion contained in the 2002 Proxy Statement, under the heading The Board, File No. 1-8489, which will be filed on or around March 19, 2002 (the 2002 Proxy Statement), is incorporated by reference. Information regarding Section 16(a) beneficial ownership is contained in the 2002 Proxy and is incorporated by reference. The information concerning the executive officers of Dominion required by this item is included in Part I of this Form 10-K under the caption EXECUTIVE OFFICERS OF THE REGISTRANT.

ITEM 11. EXECUTIVE COMPENSATION

The information regarding executive compensation contained under the heading Executive Compensation and the information regarding director compensation contained under the heading Compensation and Other Programs in the 2002 Proxy Statement, is incorporated by reference.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT

The information concerning stock ownership by directors and executive officers contained under the heading Share Ownership Table in the 2002 Proxy Statement, is incorporated by reference. There is no person known by Dominion to be the beneficial owner of more than five percent of Dominion common stock.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS

The information concerning certain transactions with executive officers under the Stock Purchase and Loan Program contained under the heading Executive Compensation in the 2002 Proxy Statement is incorporated by reference.

PART IV

ITEM 14. EXHIBITS, FINANCIAL STATEMENT SCHEDULES, AND REPORTS ON FORM 8-K

(a) Certain documents are filed as part of this Form 10-K and are incorporated by reference and found on the pages noted.

1. Financial Statements

	<u>2001 Annual Report to Shareholders (Page)</u>
Consolidated Statements of Income for the years ended December 31, 2001, 2000 and 1999	25
Consolidated Balance Sheets at December 31, 2001 and 2000	26-27
Consolidated Statements of Common Shareholders' Equity	28
Consolidated Statements of Comprehensive Income for the years ended December 31, 2001, 2000 and 1999	29
Consolidated Statements of Cash Flows for the years ended December 31, 2001, 2000 and 1999	30
Notes to Consolidated Financial Statements	51-85
Independent Auditors' Report	86
Report of Management's Responsibilities	86

2. Financial Statement Schedules

	<u>Page</u>
Independent Auditors' Report	31
Schedule II—Valuation and Qualifying Accounts	32

All other schedules are omitted because they are not applicable, or the required information is shown in the financial statements or the related notes.

3. Exhibits

- 2.1 Amended and Restated Agreement and Plan of Merger, dated May 11, 1999, by and between Dominion Resources, Inc. and Consolidated Natural Gas Company (Exhibit 2, Form S-4, Registration Statement, File No. 333-75699, as filed on May 20, 1999, incorporated by reference) and the Joinder Agreement, dated January 28, 2000 (Exhibit 1.2, Form 8-K, dated February 1, 2000, File No. 1-8489, incorporated by reference).
- 2.2 Agreement and Plan of Merger, dated September 9, 2001, by and among Dominion Resources, Inc., Consolidated Natural Gas Company, and Louis Dreyfus Natural Gas Corp. (Exhibit 2.1, Form 8-K filed September 10, 2001, File No. 1-3196, incorporated by reference).
- 2.3 Amendment No. 1 to Agreement and Plan of Merger, dated September 17, 2001, by and among Dominion Resources, Inc., Consolidated Natural Gas Company, and Louis Dreyfus Natural Gas Corp. (Exhibit 2.2, Schedule 13D of Dominion Resources, Inc. with respect to Louis Dreyfus Natural Gas Corp., filed September 19, 2001, incorporated by reference).
- 3.1 Articles of Incorporation as in effect August 9, 1999 (Exhibit 3(i), Form 10-Q for the quarter ended June 30, 1999, File No. 1-8489, incorporated by reference).
- 3.2 Articles of Amendment establishing Series A Preferred Stock, effective March 12, 2001 (Exhibit 3.2, Form S-4, dated September 20, 2001, File No. 1-8489, incorporated by reference).

- 3.3 Bylaws as in effect on October 20, 2000 (Exhibit 3, Form 10-Q for the quarter ended September 30, 2000, File No. 1-8489, incorporated by reference).
- 4.1 See Exhibit 3.1 above.
- 4.2 Indenture of Mortgage of Virginia Electric and Power Company, dated November 1, 1935, as supplemented and modified by fifty-eight Supplemental Indentures (Exhibit 4(ii), Form 10-K for the fiscal year ended December 31, 1985, File No. 1-2255, incorporated by reference); Sixty-Seventh Supplemental Indenture (Exhibit 4(i), Form 8-K, dated April 2, 1991, File No. 1-2255, incorporated by reference); Seventieth Supplemental Indenture, (Exhibit 4(iii), Form 8-K, dated February 25, 1992, File No. 1-2255, incorporated by reference); Seventy-First Supplemental Indenture (Exhibit 4(i)) and Seventy-Second Supplemental Indenture, (Exhibit 4(ii), Form 8-K, dated July 7, 1992, File No. 1-2255, incorporated by reference); Seventy-Third Supplemental Indenture, (Exhibit 4(i), Form 8-K, dated August 6, 1992, File No. 1-2255, incorporated by reference); Seventy-Fourth Supplemental Indenture (Exhibit 4(i), Form 8-K, dated February 10, 1993, File No. 1-2255, incorporated by reference); Seventy-Fifth Supplemental Indenture, (Exhibit 4(i), Form 8-K, dated April 6, 1993, File No. 1-2255, incorporated by reference); Seventy-Sixth Supplemental Indenture, (Exhibit 4(i), Form 8-K, dated April 21, 1993, File No. 1-2255, incorporated by reference); Seventy-Seventh Supplemental Indenture, (Exhibit 4(i), Form 8-K, dated June 8, 1993, File No. 1-2255, incorporated by reference); Seventy-Eighth Supplemental Indenture, (Exhibit 4(i), Form 8-K, dated August 10, 1993, File No. 1-2255, incorporated by reference); Seventy-Ninth Supplemental Indenture, (Exhibit 4(i), Form 8-K, dated August 10, 1993, File No. 1-2255, incorporated by reference); Eightieth Supplemental Indenture, (Exhibit 4(i), Form 8-K, dated October 12, 1993, File No. 1-2255, incorporated by reference); Eighty-First Supplemental Indenture, (Exhibit 4(iii), Form 10-K for the fiscal year ended December 31, 1993, File No. 1-2255, incorporated by reference); Eighty-Second Supplemental Indenture, (Exhibit 4(i), Form 8-K, dated January 18, 1994, File No. 1-2255, incorporated by reference); Eighty-Third Supplemental Indenture (Exhibit 4(i), Form 8-K, dated October 19, 1994, File No. 1-2255, incorporated by reference); Eighty-Fourth Supplemental Indenture (Exhibit 4(i), Form 8-K, dated March 23, 1995, File No. 1-2255, incorporated by reference); and Eighty-Fifth Supplemental Indenture (Exhibit 4(i), Form 8-K, dated February 20, 1997, File No. 1-2255, incorporated by reference).
- 4.3 Indenture, dated as of June 1, 1986, between Virginia Electric and Power Company and JP Morgan Chase Bank (formerly The Chase Manhattan Bank and Chemical Bank) (Exhibit 4(v), Form 10-K for the fiscal year ended December 31, 1993, File No. 1-2255, incorporated by reference).
- 4.4 Indenture, dated April 1, 1988, between Virginia Electric and Power Company and JP Morgan Chase Bank (formerly The Chase Manhattan Bank and Chemical Bank), as supplemented and modified by a First Supplemental Indenture, dated August 1, 1989, (Exhibit 4(vi), Form 10-K for the fiscal year ended December 31, 1993, File No. 1-2255, incorporated by reference); Second Supplemental Indenture, dated May 1, 1999 (Exhibit 4.2, Form S-3, File No. 333-7615, as filed on April 13, 1999, incorporated by reference).
- 4.5 Subordinated Note Indenture, dated as of August 1, 1995 between Virginia Electric and Power Company and JP Morgan Chase Bank (formerly The Chase Manhattan Bank and Chemical Bank), as Trustee, as supplemented (Exhibit 4(a), Form S-3, File No. 333-20561 as filed on January 28, 1997, incorporated by reference).

- 4.6 Form of Senior Indenture, dated as of June 1, 1998, between Virginia Electric and Power Company and JP Morgan Chase Bank (formerly The Chase Manhattan Bank) as supplemented by the First Supplemental Indenture (Exhibit 4.2, Form 8-K, dated June 12, 1998, File No. 1-2255, incorporated by reference); Second Supplemental Indenture (Exhibit 4.2, Form 8-K, dated June 3, 1999, File No. 1-2255, incorporated by reference); Third Supplemental Indenture (Exhibit 4.2, Form 8-K, dated October 27, 1999, File No. 1-2255, incorporated by reference); Form of Fourth Supplemental Indenture (Exhibit 4.2, Form 8-K, dated March 22, 2001, File No. 1-2255, incorporated by reference); and Form of Fifth Supplemental Indenture (Exhibit 4.3, Form 8-K, dated March 22, 2001, File No. 1-2255, incorporated by reference); Form of Sixth Supplemental Indenture (Exhibit 4.2, Form 8-K, dated January 24, 2002 incorporated by reference).
- 4.7 Indenture, Junior Subordinated Debentures, dated December 1, 1997, between Dominion Resources, Inc. and JP Morgan Chase Bank (formerly The Chase Manhattan Bank) as supplemented by a First Supplemental Indenture, dated December 1, 1997 (Exhibit 4.1 and Exhibit 4.2 to Form S-4 Registration Statement, File No. 333-50653, as filed on April 21, 1998, incorporated by reference); Second and Third Supplemental Indentures, dated January 1, 2001, (Exhibits 4.6 and 4.13, Form 8-K, dated January 9, 2001, incorporated by reference).
- 4.8 Indenture, dated as of May 1, 1971, between Consolidated Natural Gas Company and JP Morgan Chase Bank (formerly The Chase Manhattan Bank and Manufacturers Hanover Trust Company) (Exhibit (5) to Certificate of Notification at Commission File No. 70-5012, incorporated by reference); Fifteenth Supplemental Indenture dated as of October 1, 1989 (Exhibit (5) to Certificate of Notification at Commission File No. 70-7651, incorporated by reference); Seventeenth Supplemental Indenture dated as of August 1, 1993 (Exhibit (4) to Certificate of Notification at Commission File No. 70-8167, incorporated by reference); Eighteenth Supplemental Indenture dated as of December 1, 1993 (Exhibit (4) to Certificate of Notification at Commission File No. 70-8167, incorporated by reference); Nineteenth Supplemental Indenture dated as of January 28, 2000 (Exhibit (4A)(iii), Form 10-K for the fiscal year ended December 31, 1999, File No. 1-3196, incorporated by reference); Twentieth Supplemental Indenture dated as of March 19, 2001 (Exhibit 4(viii), Form 10-K for the fiscal year ended December 31, 2000, File No. 1-8489, incorporated by reference).
- 4.9 Indenture, dated as of April 1, 1995, between Consolidated Natural Gas Company and The Bank of New York (as successor trustee to United States Trust Company of New York) (Exhibit (4) to Certificate of Notification at Commission File No. 70-8107); First Supplemental Indenture dated January 28, 2000 (Exhibit (4 A)(ii), Form 10-K for the fiscal year ended December 31, 1999, File No. 1-3196, incorporated by reference); Securities Resolution No. 1 effective as of April 12, 1995 (Exhibit 2 to Form 8-A filed April 21, 1995 under File No. 1-3196 and relating to the 7³/₈% Debentures Due April 1, 2005); Securities Resolution No. 2 effective as of October 16, 1996 (Exhibit 2 to Form 8-A filed October 18, 1996 under file No. 1-3196 and relating to the 6⁷/₈% Debentures Due October 15, 2026); Securities Resolution No. 3 effective as of December 10, 1996 (Exhibit 2 to Form 8-A filed December 12, 1996 under file No. 1-3196 and relating to the 6⁵/₈% Debentures Due December 1, 2008); Securities Resolution No. 4 effective as of December 9, 1997 (Exhibit 2 to Form 8-A filed December 12, 1997 under file No. 1-3196 and relating to the 6.80% Debentures Due December 15, 2027); Securities Resolution No. 5 effective as of October 20, 1998 (Exhibit 2 to Form 8-A filed October 22, 1998 under file No. 1-3196 and relating to the 6% Debentures Due October 15, 2010); Securities Resolution No. 6 effective as of September 21, 1999 (Exhibit 4A(iv), Form 10-K for the fiscal year ended December 31, 1999, File No. 1-3196, and relating to the 7¹/₄% Notes Due October 1, 2004).

- 4.10 Senior Indenture, dated June 1, 2000, between Dominion Resources, Inc. and JP Morgan Chase Bank (formerly The Chase Manhattan Bank), as Trustee (Exhibit 4 (iii), Form S-3, Registration Statement, File No. 333-93187, incorporated by reference); First Supplemental Indenture, dated June 1, 2000 (Exhibit 4.2, Form 8-K, dated June 21, 2000, File No. 1-8489, incorporated by reference); Second Supplemental Indenture, dated July 1, 2000 (Exhibit 4.2, Form 8-K, dated July 11, 2000, File No. 1-8489, incorporated by reference); Third Supplemental Indenture, dated July 1, 2000 (Exhibit 4.3, Form 8-K dated July 11, 2000, incorporated by reference); Fourth Supplemental Indenture and Fifth Supplemental Indenture dated September 1, 2000 (Exhibit 4.2, Form 8-K, dated September 8, 2000, incorporated by reference); Sixth Supplemental Indenture, dated September 1, 2000 (Exhibit 4.3, Form 8-K, dated September 8, 2000, incorporated by reference); Seventh Supplemental Indenture, dated October 1, 2000 (Exhibit 4.2, Form 8-K, dated October 11, 2000, incorporated by reference); Eighth Supplemental Indenture, dated January 1, 2001 (Exhibit 4.2, Form 8-K, dated January 23, 2001, incorporated by reference); and Ninth Supplemental Indenture, dated May 1, 2001 (Exhibit 4.4, Form 8-K, dated May 25, 2001, incorporated by reference).

3. Dominion filed a report on Form 8-K, dated January 29, 2002, relating to Dominion's press release announcing unaudited results of operations for the fiscal year ended December 31, 2001.

INDEPENDENT AUDITORS' REPORT

To the Shareholders and Board of Directors of
Dominion Resources, Inc.
Richmond, Virginia

We have audited the consolidated financial statements of Dominion Resources, Inc. and subsidiaries as of December 31, 2001 and 2000, and for each of the three years in the period ended December 31, 2001, and have issued our report thereon dated January 22, 2002, which report includes an explanatory paragraph as to a change in accounting principle for derivative instruments and hedging activities in 2001 and a change in the method of accounting used to develop the market-related value of pension plan assets in 2000; such consolidated financial statements and report are included in your 2001 Annual Report to Shareholders and are incorporated herein by reference. Our audits also included the consolidated financial statement schedule of Dominion Resources, Inc. and subsidiaries, listed in Item 14. This consolidated financial statement schedule is the responsibility of the Company's management. Our responsibility is to express an opinion based on our audits. In our opinion, such consolidated financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly in all material respects the information set forth therein.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Introduction

Management's Discussion and Analysis of Financial Condition and Results of Operations (MD&A) explains the results of operations and general financial condition of Dominion. MD&A should be read in conjunction with the Consolidated Financial Statements. "Dominion" is used throughout MD&A and, depending on the context of its use, may represent any of the following: the legal entity, Dominion Resources, Inc., one of Dominion Resources, Inc.'s consolidated subsidiaries, or the entirety of Dominion Resources, Inc. and its consolidated subsidiaries.

Risk Factors and Cautionary Statements That May Affect

Future Results

This report contains statements concerning Dominion's expectations, plans, objectives, future financial performance and other statements that are not historical facts. These statements are "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. In most cases, the reader can identify these forward-looking statements by words such as "anticipate," "estimate," "forecast," "expect," "believe," "should," "could," "plan," "may" or other similar words.

Dominion makes forward-looking statements with full knowledge that risks and uncertainties exist that may cause actual results to be materially different from the results predicted. Factors that could cause actual results to differ are often presented with the forward-looking statements themselves. In addition, other factors could cause actual results to differ materially from those indicated in any forward-looking statement. These factors include changes to financial or regulatory accounting principles or policies imposed by governing bodies, industry conditions in the regulated, unregulated and transition energy markets, political and economic conditions (including inflation rates) and financial market conditions, including availability and cost of capital and credit ratings. Some more specific risks are discussed below.

Dominion bases its forward-looking statements on management's beliefs and assumptions using information available at the time the statements are made. Dominion cautions the reader not to place undue reliance on its forward-looking statements because the assumptions, beliefs, expectations and projections about future events may and often do materially differ from actual results. Dominion undertakes no obligation to update any forward-looking statement to reflect developments occurring after the statement is made.

Dominion's Operations Are Weather Sensitive

Dominion's results of operations can be affected by changes in the weather. Weather conditions directly influence the demand for electricity and natural gas and affect the price of energy commodities. In addition, severe weather can be destructive,

causing outages, property damage and requiring Dominion to incur additional expenses.

Dominion Is Subject to Complex Government Regulation Which Could Adversely Affect Its Operations

Dominion's operations are subject to extensive regulation and require numerous permits, approvals and certificates from various federal, state and local governmental agencies. Dominion must also comply with environmental protection legislation and other regulations. Management believes the necessary approvals have been obtained for Dominion's existing operations and that its business is conducted in accordance with applicable laws. However, Dominion remains subject to a varied and complex body of laws and regulations. New laws or regulations or the revision or reinterpretation of existing laws or regulations may require Dominion to incur additional expenses.

Costs of Environmental Compliance, Liabilities and Litigation Could Exceed Dominion's Estimates

Dominion is subject to rising costs that result from a steady increase in the number of federal, state and local laws and regulations designed to protect the environment. These laws and regulations can result in increased capital, operating, and other costs as a result of compliance, remediation, containment and monitoring obligations, particularly with laws relating to power plant emissions. In addition, Dominion may be a responsible party for environmental clean up at a site identified by a regulatory body. Dominion's management cannot predict with certainty the amount and timing of all future expenditures related to environmental matters because of the difficulty of estimating clean up costs and compliance and the possibility that changes will be made to the current environmental laws and regulations. There is also uncertainty in quantifying liabilities under environmental laws that impose joint and several liability on all potentially responsible parties.

Capped Electric Rates in Virginia May Be Insufficient to Allow Full Recovery of Stranded Costs

Under the Virginia Utility Restructuring Act, Dominion's electric base rates (excluding fuel costs and certain other allowable adjustments) remain unchanged until July 2007 unless modified consistent with that Act. The capped rates and wires charges that, where applicable, will be assessed to customers opting for alternative suppliers, allow Dominion to recover certain generation-related costs and fuel costs; however, Dominion remains exposed to numerous risks of cost-recovery shortfalls. These include exposure to potentially stranded costs, future environmental compliance requirements, changes in tax laws, inflation and increased capital costs. See *Future Issues and Outlook-Regulated Electric Operations* of MD&A and Note 27 to the Consolidated Financial Statements.

The Electric Industry is Increasingly Subject to Competition

Effective January 1, 2002, the generation portion of Dominion's electric utility operations in Virginia is open to competition and is no longer subject to cost-based rate regulation. As a result there will be increased pressure to lower costs, including the cost of purchased electricity. Because Dominion's electric utility business has not previously operated in a competitive environment, the extent and timing of entry by additional competitors into the electric market in Virginia is yet unknown. Therefore, it is difficult to predict the extent to which Dominion will be able to operate profitably within this new environment. In addition, the success of Dominion's power merchant plants is dependent upon Dominion's ability to find buyers willing to enter into power purchase agreements at prices sufficient to cover operating costs.

There Are Inherent Risks in the Operation of Nuclear Facilities

Dominion operates nuclear facilities that are subject to inherent risks. These include the ability to dispose of spent nuclear fuel, the ability to maintain adequate reserves for decommissioning and potential liabilities arising out of the operation of these facilities. Dominion maintains decommissioning trusts and external insurance coverage to minimize the financial exposure to these risks. However, it is possible that damages could exceed the amount of Dominion's insurance coverage. In addition, in today's environment there is a heightened risk of a terrorist attack on the nation's nuclear plants. Dominion expects to incur increased security costs at its nuclear facilities.

The Use of Derivative Contracts Could Result in Financial Losses

Dominion uses derivatives including futures, forwards, options and swaps, to manage its commodity and financial market risks. In addition, Dominion purchases and sells commodity-based contracts in the natural gas, electricity and oil markets for trading purposes. In the future, Dominion could recognize financial losses on these contracts as a result of volatility in the market values of the underlying commodities or if a counterparty fails to perform under a contract. In the absence of actively quoted market prices and pricing information from external sources, the valuation of these financial instruments can involve management's judgment or use of estimates. As a result, changes in the underlying assumptions or use of alternative valuation methods could affect the value of the reported fair value of these contracts. For additional information concerning Dominion's derivatives and commodity-based trading contracts, see *Market Rate Sensitive Instruments and Risk Management* of MD&A and Notes 2 and 15 to the Consolidated Financial Statements.

Dominion's Telecommunication Business Strategy's Success Is Dependent Upon Market Conditions

The current strategy of Dominion's joint venture in the telecommunication's business is based upon its ability to deliver lit capacity, dark fiber and colocation services to its customers. The market for these services, like the telecommunications industry in general, is rapidly changing. Dominion cannot assure that growth in demand for these services will occur as expected. If the market for these services fails to grow as quickly as anticipated or becomes saturated with competitors, including competitors using alternative technologies such as wireless, Dominion's investment in the telecommunication business may be adversely affected.

Dominion's Exploration and Production Business Is Dependent on Factors Including Commodity Prices Which Cannot Be Predicted Or Controlled

These factors include: price fluctuations in natural gas and crude oil prices; results of future drilling activity; Dominion's ability to identify and locate prospective geological structures and to drill and successfully complete wells in those structures; Dominion's ability to expand its leased land positions in desirable areas, which are often subject to competition; and other risks incident to the operations of natural gas and oil wells. In addition, Dominion follows the full cost method of accounting for gas and oil exploration and production activities prescribed by the Securities and Exchange Commission (SEC). Under the full cost method, all direct costs of property acquisition, exploration and development activities are capitalized. The principal limitation is that these capitalized amounts may not exceed the present value of estimated future net revenues from the production of proved gas and oil reserves (the ceiling test). If net capitalized costs exceed the ceiling test at the end of any quarterly period, then a permanent write-down of the assets must be recognized in that period.

An Inability to Access Financial Markets Could Affect the Execution of Dominion's Business Plan

Dominion relies on access to both short-term money markets and longer-term capital markets as a significant source of liquidity for capital requirements not satisfied by the cash flow of its operations. Management believes that Dominion and its subsidiaries will maintain sufficient access to these financial markets based upon current credit ratings. However, certain disruptions outside of Dominion's control may increase the cost of borrowing to Dominion or restrict its ability to access one or more financial markets. Such disruptions could include an economic downturn or the bankruptcy of an unrelated energy company. Restrictions on Dominion's ability to access financial markets may affect Dominion's ability to execute its business plan as scheduled.

Operating Segments

In general, management's discussion of Dominion's results of operations focuses on the contributions of its operating segments. However, the discussion of Dominion's financial condition under *Liquidity and Capital Resources* is based on legal entities. Dominion's three primary operating segments are:

Dominion Energy manages Dominion's generation portfolio, consisting primarily of generating units and power purchase agreements. It also manages Dominion's generation growth strategy; energy trading, marketing, hedging and arbitrage activities; and gas pipeline and certain gas production and storage operations. Dominion Energy's operating results largely reflect: the impact of weather on demand for electricity; customer growth as influenced by overall economic conditions and acquisitions; and changes in prices of commodities, primarily electricity and natural gas, that the segment actively markets and trades, uses for hedging purposes, and consumes in generation activities.

Dominion Delivery manages Dominion's electric and gas distribution systems, as well as customer service and electric transmission. Dominion Delivery's operating results reflect the impact of weather on demand for electricity and natural gas and customer growth as influenced by overall economic conditions. The businesses of Dominion Delivery are subject to cost-of-service rate regulation and changes in prices of commodities consumed or delivered are generally recoverable in rates charged to customers. However, these rates may be subject to price caps, limiting recovery of higher costs in certain circumstances.

Dominion Exploration & Production manages Dominion's onshore and offshore gas and oil exploration, development and production operations. Operations are located on the outer continental shelf and deep water areas of the Gulf of Mexico and in selected regions in the lower 48 states and Canada. Dominion E&P's operating results reflect successful discovery of and production from natural gas and oil reserves and changes in prices of natural gas and oil. Dominion E&P manages commodity risk through the use of derivative contracts such as forwards, swaps, and options.

In addition, Dominion also reports the financial services operations of Dominion Capital, Inc. (DCI) and Dominion's corporate operations as operating segments. Dominion has substantially completed its exit of the core operating businesses of DCI, as required by the SEC under the Public Utility Holding Company Act of 1935 (1935 Act). DCI's primary business was financial services, including loan administration, commercial lending and residential mortgage lending. Corporate and other includes those costs of Dominion's corporate operations and

certain other charges not allocated to Dominion's other operating segments.

For more information on Dominion's operating segments, see Note 30 to the Consolidated Financial Statements.

Critical Accounting Policies

Dominion has identified the following accounting policies that, as a result of the judgments, uncertainties, uniqueness and complexities of the underlying accounting standards and operations involved, could result in material changes to its financial condition or results of operations under different conditions or using different assumptions.

Accounting for risk management and energy trading contracts at fair value—Dominion uses derivatives to manage its commodity and financial market risks. In addition, Dominion purchases and sells commodity-based contracts in the natural gas, electricity and oil markets for trading purposes. The accounting requirements for derivatives and hedging activities are complex and interpretation of these requirements by standard-setting bodies is ongoing. All derivatives, other than specific exceptions, are reported on the Consolidated Balance Sheet at fair value, beginning in 2001. Energy trading contracts are also reported on the Consolidated Balance Sheets at fair value. Changes in fair value, except those related to derivative instruments designated as cash flow hedges, are generally included in the determination of Dominion's net income at each financial reporting date until the contracts are ultimately settled. The measurement of fair value is based on actively quoted market prices, if available. In the absence of actively quoted market prices, Dominion seeks indicative price information from external sources, including broker quotes and industry publications. If pricing information from external sources is not available, measurement involves judgment and estimates. These estimates are based on valuation methodologies deemed appropriate by Dominion management. For individual contracts, the use of different assumptions could have a material effect on the contract's estimated fair value. In addition, for hedges of forecasted transactions, Dominion must estimate the expected future cash flows of forecasted transactions, as well as evaluate the probability of occurrence and timing of such transactions. Changes in conditions or the occurrence of unforeseen events could affect the timing of recognition of changes in fair value of certain hedging derivatives. See *Selected Information — Energy Trading Activities and Market Rate Sensitive Instruments and Risk Management* in MD&A and Notes 2, 15, and 28 to the Consolidated Financial Statements.

Accounting for gas and oil operations—Dominion follows the full cost method of accounting for gas and oil exploration and production activities prescribed by the SEC. Under the full cost method, all direct costs of property acquisition, exploration and development activities are capitalized. Depreciation of gas and oil producing properties is computed using the unit-of-production method. The depreciable base of costs includes estimated future costs to be incurred in developing proved gas and oil reserves, as well as dismantlement and abandonment costs, net of projected salvage values. The calculations under this accounting method are dependent on engineering estimates of proven reserve quantities and estimates of the amount and timing of future expenditures to develop the proven reserves. Actual reserve quantities and development expenditures may differ from the forecasted amounts. Also, amounts capitalized in the depreciable base of costs are subject to a ceiling test. The test limits capitalized amounts to a ceiling—the present value of estimated future net revenues to be derived from the production of proved gas and oil reserves. Dominion performs the test quarterly, on a country-by-country basis, and would recognize asset impairments to the extent capitalized costs exceed the ceiling. See Notes 2 and 31 to the Consolidated Financial Statements.

Accounting for regulated operations—Methods of allocating costs to accounting periods for operations subject to federal or state cost-of-service rate regulation may differ from accounting methods generally applied by nonregulated companies. When the timing of cost recovery prescribed by regulatory authorities differs from the timing of expense recognition used for accounting purposes, Dominion's consolidated financial statements may recognize a regulatory asset for expenditures that otherwise would be expensed. Regulatory assets represent probable future revenue associated with certain costs that will be recovered from customers through the ratemaking process. Regulatory liabilities represent probable future reductions in revenues associated with amounts that are to be credited to customers through the ratemaking process. See Notes 2, 9, and 18 to the Consolidated Financial Statements.

Results of Operations

Dominion's discussion of its results of operations includes a summary of contributions by the operating segments to net income and diluted earnings per share, an overview of consolidated 2001 and 2000 results of operations and more detailed discussion of the results of operations of the operating segments.

	2001		2000		1999	
(millions, except per share amounts)	Net Income	EPS	Net Income	EPS	Net Income	EPS
Dominion Energy	\$ 723	\$2.86	\$ 489	\$ 2.07	\$ 271	\$ 1.42
Dominion Delivery	366	1.45	339	1.43	175	0.91

Dominion Capital	(14)	(0.06)	11	0.05	78	0.41
	1,395	5.52	1,094	4.63	568	2.97
Corporate and Other	(851)	(3.37)	(658)	(2.78)	(271)	(1.42)
Consolidated Total	544	2.15	436	1.85	297	1.48
Consolidated Operating Revenue	10,558		9,246		5,520	
Consolidated Operating Expense	\$ 8,773		\$7,731		\$4,192	

For additional information about Dominion's operating segments, see Note 30 to the Consolidated Financial Statements and the following discussion of each segment's results of operations.

Overview of 2001 Results

Dominion earned \$2.15 per diluted share in 2001 reflecting net income of \$544 million and an increase of \$108 million and \$0.30 per diluted share over 2000. As described below, Dominion recognized higher overall operating revenue reflecting the operations of acquired businesses. This increase was partially offset by comparatively milder weather and higher operating expenses. The increase in operating expenses reflected the recognition of charges associated with the impairment of certain investments at DCI, restructuring activities, and credit-related exposures associated with the bankruptcy of Enron Corp. and certain subsidiaries (Enron).

Operating Revenue

Operating revenue increased \$1.3 billion to \$10.6 billion for 2001 as compared to 2000. Dominion acquired Millstone Power Station (Millstone) on March 31, 2001 and its operations contributed largely to the increase in nonregulated electric sales. Regulated electric sales also increased, reflecting comparatively higher fuel recovery rates and continued customer growth partially offset by comparatively mild weather. Regulated gas sales, nonregulated gas sales and gas and oil production revenue increased as 2000 results only included 11 months of Consolidated Natural Gas Company (CNG) operations. In addition, 2001 reflects the inclusion of Louis Dreyfus Natural Gas Corp. (Louis Dreyfus) for two months as well as higher realized prices for gas. The results of Dominion's trading and marketing operations, which are recorded as nonregulated gas and nonregulated electric sales, net of cost of sales, also contributed to the overall increase in operating revenue.

Operating Expenses

Operating expenses increased \$1 billion to \$8.8 billion for 2001 as compared to 2000. Higher prices for commodities consumed contributed to increased electric fuel and energy purchases and purchased gas. In addition, purchased gas increased as 2000 amounts only included 11 months of CNG operations. Purchased capacity decreased as Dominion terminated certain contracts in early 2001. Depreciation increased due to the inclusion of Millstone. However, this increase was partially offset by an extension of the useful lives of Dominion's nuclear plants in connection with the expected relicensing of those plants. Dominion incurred restructuring charges in 2001 and 2000 primarily associated with its acquisition and integration of CNG. In both 2001 and 2000, Dominion recognized impairment and other loan losses on certain DCI loans and other investments. Impairment losses associated with exit activities were reported as restructuring costs and impairment losses associated with the normal operations of DCI were reported as other operations and maintenance. Other operations and maintenance also increased due to the inclusion of Millstone operations, costs associated with terminating certain capacity contracts, and provisions for credit-related exposures associated with Enron's bankruptcy. Other taxes decreased reflecting the change from gross receipts taxes to state income taxes in Virginia effective January 2001.

Other Factors Affecting Net Income

Interest expense and related charges decreased, reflecting lower overall interest rates on outstanding debt. Dominion's effective income tax rate increased in 2001 due to its utility operations in Virginia becoming subject to state income taxes in lieu of gross receipts taxes, higher effective rates associated with foreign earnings and higher pretax income in relation to nonconventional fuel tax credits realized.

Overview of 2000 Results

Dominion earned \$1.85 per diluted share in 2000, reflecting net income of \$436 million and an increase of \$139 million and \$0.37 per diluted share over 1999. The inclusion of CNG operations for 11 months of 2000 contributed largely to the increases in both operating revenue and expenses and Dominion's overall results for 2000. In addition to the impact of CNG, the increase in net income in 2000 over 1999 also included: an extraordinary item in 1999 for the write-off of certain net regulatory assets; the contributions by Dominion's existing regulated electric utility and gas exploration operations; the costs of restructuring and other CNG acquisition-related activities; costs associated with the DCI exit strategy; acquisition-related interest costs; and a change in the method of accounting for pensions.

Operating Revenue

Total operating revenue increased \$3.7 billion to \$9.2 billion for 2000 as compared to 1999. The introduction of regulated gas sales and gas transportation and storage in 2000 as well as increases in nonregulated gas sales, gas and oil production and other revenue resulted from the inclusion of CNG operations beginning in late January 2000. Regulated electric sales also increased as a result of customer growth, higher fuel rates, and a charge for rate refunds taken in 1999. Nonregulated electric sales decreased for 2000, reflecting a decrease in available capacity after the expiration of two major long-term power purchase contracts late in 1999.

Operating Expenses

Operating expenses increased \$3.5 billion to \$7.7 billion for 2000 as compared to 1999. The introduction of purchased gas and liquids, pipeline capacity and other purchases in 2000, as well as increases in other operations and maintenance and depreciation resulted from the inclusion of CNG operations beginning in late January 2000. Electric fuel and energy purchases increased in 2000 due to increased generation activity and higher costs for fossil fuels consumed and energy purchases. In addition, Dominion recognized restructuring and acquisition-related charges for the integration and transition of CNG, and operations and losses associated with DCI investments, some of which were attributable to the DCI exit strategy.

Other Factors Affecting Net Income

Interest expense and related charges increased, reflecting additional borrowings in 2000. The proceeds were used primarily to finance the acquisition of CNG. Also in 2000, the cumulative effect of changing its accounting for certain components of its pension expense increased Dominion's net income by \$21 million. In 1999, Dominion recorded an extraordinary item of \$255 million, reflecting primarily the write-off of regulatory assets.

Dominion Energy

(millions, except per share amounts)	2001	2000	1999
Operating revenue	\$6,144	\$4,894	\$3,645
Operating expense	4,749	3,939	2,970
Net income contribution	723	489	271
EPS contribution	\$ 2.86	\$ 2.07	\$ 1.42
Electricity supplied (mmwhr)	72	74	71
Gas transmission throughput (bcf)	553	567	—
Gas and oil production (bcfe)	11	12	—

2001 Results

Dominion Energy contributed \$723 million and \$2.86 per diluted share for 2001, an increase of \$234 million and \$0.79 per diluted share over 2000 results. The increase in net income reflects higher revenues due to a full year of CNG operations for 2001, the acquisition of Millstone and reductions in certain operating expenses, including depreciation associated with nuclear plant relicensing and capacity expenses.

Operating Revenue

Operating revenue increased \$1.3 billion to \$6.1 billion for 2001 as compared to 2000 reflecting the acquisition of Millstone and a full year of CNG operations for 2001. Regulated electric sales for 2001 reflected customer growth and comparatively higher fuel rates; however, these increases were largely offset by comparatively mild weather. Millstone operations contributed largely to the increase in nonregulated electric sales. Nonregulated gas sales and gas transportation and storage revenue increased reflecting a full year of CNG operations and increased transportation rates. The results of Dominion's trading and marketing operations contributed to the overall increase in operating revenue. The 2001 results also included sales to other Dominion segments of \$143 million.

Operating Expenses

Operating expenses increased \$810 million to \$4.7 billion for 2001 as compared to 2000. Higher commodity prices contributed to increased electric fuel and energy purchases and purchased gas. In addition, purchased gas increased because 2000 expenses included only 11 months of CNG operations. Depreciation increased overall due to the inclusion of Millstone. This increase was partially offset by an extension of the useful lives of Dominion's nuclear plants in connection with the expected relicensing of those plants. This change in estimate resulted in a \$78 million decrease in depreciation expense. Purchased capacity decreased as Dominion terminated certain contracts in early 2001. Other operations and maintenance increased due to the inclusion of Millstone operations and scheduled outages at both nuclear and fossil plants.

2000 Results

Dominion Energy contributed \$489 million and \$2.07 per diluted share for 2000, an increase of \$218 million and \$0.65 per diluted share over 1999 results. The increase in net income reflects primarily the inclusion of CNG operations.

Operating Revenue

Operating revenue increased \$1.2 billion to \$4.9 billion for 2000 as compared to 1999 reflecting primarily the inclusion of CNG operations for 2000. The introduction of gas transportation and storage in 2000 and increases in nonregulated gas sales and

other revenue resulted from the inclusion of CNG operations beginning in late January 2000. Regulated electric sales increased as a result of customer growth, higher fuel rates, and a charge in 1999 for rate refunds. Nonregulated electric sales decreased for 2000 reflecting a decrease in available capacity after the expiration of two major long-term power purchase contracts late in 1999. 2000 results also included sales to other Dominion segments of \$163 million.

Operating Expenses

Operating expenses increased \$969 million to \$3.9 billion for 2000 as compared to 1999. The introduction of purchased gas and liquids, pipeline capacity and other purchases in 2000, as well as increases in other operations and maintenance expense and depreciation resulted from the inclusion of CNG operations beginning in late January 2000. Electric fuel and energy purchases increased in 2000 due to increased generation activity and higher costs for fossil fuels consumed and energy purchases.

Selected Information — Energy Trading Activities

Dominion Energy manages Dominion's energy trading, hedging and arbitrage activities through the Dominion Energy Clearinghouse (the Clearinghouse). Dominion believes these operations complement its integrated energy businesses and facilitate its risk management activities. As part of these operations, the Clearinghouse enters into contracts for purchases and sales of energy-related commodities, including natural gas, electricity and oil. Settlement of a contract may require physical delivery of the underlying commodity or, in some cases, an exchange of cash. These contracts are classified as energy trading contracts for financial accounting purposes, and are included in the Consolidated Balance Sheets as components of current and non-current derivative and energy trading assets and liabilities.

In accordance with generally accepted accounting principles, Dominion reports energy trading contracts in its financial statements at fair value. Both realized and unrealized changes in these contracts' fair value are included in net income. For a discussion of how Dominion determines fair value for its energy trading contracts, see *Critical Accounting Policies* presented earlier in MD&A. Arbitrage activities constitute a substantial portion of the Clearinghouse's activities. Accordingly, when the Clearinghouse enters into a contract to purchase a commodity, it typically enters into a sales contract, or a combination of sales contracts, with quantities and delivery or settlement terms that are identical or very similar to those of the purchase contract. When the purchase and sales contracts are settled either by physical delivery of the underlying commodity or by net cash settlement, the Clearinghouse may receive a net cash margin (a realized gain), or sometimes will pay a net cash margin

(a realized loss). Until the contracts are settled, however, Dominion must record the monthly changes in the fair value of both contracts. These changes in fair value represent unrealized gains and losses. To the extent purchase and sales contracts with identical or similar terms are held by the Clearinghouse, the changes in their fair values will generally offset one another. Although the Clearinghouse may hold purchase or sales contracts for delivery of commodities at particular locations and times that have not been offset, such exposures are monitored and actively managed on a daily basis. Dominion's risk management policy and procedures are designed to ensure that its exposure to commodity price changes is limited. For additional discussion of trading activities, see *Market Rate Sensitive Instruments and Risk Management* and Notes 2, 15, and 28 to the Consolidated Financial Statements.

A summary of the changes in the unrealized gains and losses in Dominion's portfolio of energy contracts held for trading purposes during 2001 follows:

(millions)	Energy Trading Contracts
Net unrealized gain at December 31, 2000	\$ 25
Contracts realized or otherwise settled during the period	(1)
Net unrealized loss at inception of contracts initiated during the period	(4)
Change in unrealized gains and losses attributable to net arbitrage gains and changes in market prices.	129
Changes in unrealized gains and losses attributable to changes in valuation techniques	16
Net unrealized gain at December 31, 2001	\$165

Unrealized gains and losses in Dominion's portfolio of energy trading contracts at December 31, 2001 are summarized in the following table based on the approach used to determine fair value and the contract settlement or delivery dates:

(millions)	Maturity Based on Contract Settlement or Delivery Date(s)					
Source of Fair Value	Less than 1 year	1-2 years	2-3 years	3-5 years	Greater than 5 years	Total
Prices actively quoted	\$20	41	11	—	—	\$72
Prices provided by other external sources	—	\$13	10	20	—	\$43
Prices based on models and other valuation methods	\$14	12	6	6	12	\$50

Dominion Delivery

(millions, except per share amounts)	2001	2000	1999
Operating revenue	\$2,963	\$2,826	\$1,160
Operating expense	2,202	2,123	735
Net income contribution	366	339	175
EPS contribution	\$ 1.45	\$ 1.43	\$ 0.91
Electricity delivered (mmwhr)	72	74	71
Gas throughput (mmcf)	357	356	—

2001 Results

Dominion Delivery contributed \$366 million and \$1.45 per diluted share for 2001, an increase of \$27 million and \$0.02 per diluted share over 2000 results. The increase in net income reflects slightly higher gas throughput and slightly lower volumes of electricity delivered, as well as overall higher gas and electric rates.

Operating Revenue

Total operating revenue increased \$137 million to \$3.0 billion for 2001 as compared to 2000, reflecting a full year of CNG operations for 2001. This is reflected in higher regulated gas sales and gas transportation and storage revenue. These revenues also increased as a result of higher overall throughput and rates. Regulated electric sales for 2001 reflect customer growth and comparatively higher fuel rates partially offset by the comparatively milder weather.

Operating Expenses

Operating expenses increased \$79 million to \$2.2 billion for 2001 as compared to 2000. Higher prices of commodities delivered or consumed contributed to increased purchased gas expense. In addition, purchased gas increased as 2000 amounts only included 11 months of CNG operations.

2000 Results

Dominion Delivery contributed \$339 million and \$1.43 per diluted share for 2000, an increase of \$164 million and \$0.52 per diluted share over 1999 results. The increase in net income reflects the inclusion of CNG operations.

Operating Revenue

Total operating revenue increased \$1.7 billion to \$2.8 billion for 2000 as compared to 1999 reflecting primarily the inclusion of CNG operations for 2000. The introduction of regulated gas sales and gas transportation and storage in 2000 resulted from the inclusion of CNG operations beginning in late January

2000. Regulated electric sales increased as a result of customer growth, higher fuel rates, and a charge in 1999 for rate refunds. Weather did not result in material changes in regulated electric sales for the comparable periods. However, colder weather in Dominion's gas distribution service territories resulted in higher than normal throughput and was reflected in regulated gas sales and gas transportation and storage revenue.

Operating Expenses

Operating expenses increased \$1.4 billion to \$2.1 billion for 2000 as compared to 1999. The introduction of purchased gas and liquids, pipeline capacity and other purchases in 2000, as well as increases in other operations and maintenance expense and depreciation resulted from the inclusion of CNG operations beginning in late January 2000.

Dominion E&P

(millions, except per share amounts)	2001	2000	1999
Operating revenue	\$1,460	\$1,330	\$256
Operating expense	934	920	212
Net income contribution	320	255	44
EPS contribution	\$ 1.27	\$ 1.08	\$0.23
Natural gas and oil produced (bcfe)	327	304	109

2001 Results

Dominion E&P contributed \$320 million and \$1.27 per diluted share for 2001, an increase of \$65 million and \$0.19 per diluted share over 2000 results. The increase in net income reflects a full year of CNG operations for 2001, two months of Louis Dreyfus operations and higher realized gas and oil prices.

Operating Revenue

Total operating revenue increased \$130 million to \$1.5 billion for 2001 as compared to 2000 reflecting a full year of CNG operations for 2001, two months of Louis Dreyfus operations and higher gas and oil prices. Average realized gas and oil prices increased 16 percent to \$3.85/mcfe during 2001. For 2001, overall gas and oil production increased 8 percent to 327 bcfe. These increases reflect the addition of Louis Dreyfus operations in the fourth quarter of 2001 offset somewhat by natural declines at certain Dominion gas and oil production properties. Dominion E&P sold \$106 million of natural gas and oil to other Dominion segments in 2001.

Operating Expenses

Operating expenses increased \$14 million to \$934 million for 2001 as compared to 2000 and include the addition of Louis Dreyfus operations in the fourth quarter of 2001, as well as

higher operations and maintenance expenses associated with service industry and contractor costs. Operating expenses associated with purchases of gas and oil for brokered sales decreased for 2001.

2000 Results

Dominion E&P contributed \$255 million and \$1.08 per diluted share for 2000, an increase of \$211 million and \$0.85 per diluted share over 1999 results. The increase in net income reflects the inclusion of CNG operations.

Operating Revenue

Total operating revenue increased \$1.1 billion to \$1.3 billion for 2000 as compared to 1999 reflecting primarily the inclusion of CNG operations in 2000. Dominion E&P sold \$51 million of natural gas and oil to other Dominion segments in 2000. In addition to CNG operations, 2000 results included a full year of operations from property acquisitions in 1999 including a Canadian exploration and production company and other properties in the San Juan Basin of New Mexico.

Operating Expenses

Operating expenses increased \$708 million to \$920 million for 2000 compared to 1999. The introduction of purchased gas and liquids, pipeline capacity and other purchases in 2000 as well as increases in other operations and maintenance expense and depreciation resulted from the inclusion of CNG operations beginning in late January 2000.

Dominion Capital

(millions, except per share amounts)	2001	2000	1999
Other revenue	\$ 234	\$ 433	\$ 473
Operating expense (including interest)	268	410	360
Net income (loss) contribution	(14)	11	78
EPS contribution	\$(0.06)	\$0.05	\$0.41

During 2000, DCI implemented a strategy to exit and windup its core operating businesses as required by the SEC under the 1935 Act in connection with Dominion's acquisition of CNG. The results of DCI reflect this strategy.

2001 Results

DCI reported losses of \$14 million and \$0.06 per diluted share for 2001, as compared to net income of \$11 million and \$0.05 per diluted share in 2000. Other revenue decreased \$199 million to \$234 million for 2001 as compared to 2000. These results reflect lower interest income as a substantial portion of the commercial loan portfolio was sold in the fourth quarter of 2000. In addition, mortgage loans originated in the second quarter of

2001 were not securitized but sold as part of the Saxon Capital sale. Operating expenses decreased \$142 million to \$268 million for 2001 compared to 2000 reflecting reduced interest expense and lower general and administrative expenses resulting from reduced operations. See *Corporate and Other* below and Note 6 to Consolidated Financial Statements.

2000 Results

DCI contributed \$11 million and \$0.05 per diluted share for 2000, as compared to net income of \$78 and \$0.41 per diluted share in 1999. Other revenue decreased \$40 million to \$433 million for 2000 as compared to 1999. Mortgage volumes were \$2.1 billion in 2000, down from \$2.4 billion in 1999. As a result of the sale and restructuring of loans, the commercial finance operations portfolio decreased to \$676 million at the end of 2000 compared to \$2.0 billion at the end of 1999.

Corporate and Other

(millions)	2001	2000	1999
Net expense	\$(851)	\$(658)	\$(271)

2001 Results

Net expenses associated with corporate and other operations were \$851 million and \$(3.37) per diluted share, an increase in net expenses of \$193 million and \$0.58 per diluted share as compared to 2000. Net expenses for 2001 include the following unusual charges which were not allocated to Dominion's other operating segments (amounts are pre-tax): restructuring costs of \$105 million; impairment of DCI investments of \$281 million; loss of \$40 million on the sale of Saxon Capital; provision for credit exposure associated with Enron bankruptcy of \$151 million; and a charge of \$220 million related to the purchase of three non-utility generating plants previously serving Dominion under long-term contracts. See Notes 7, 8, 15, and 27 to the Consolidated Financial Statements.

2000 Results

Net expenses associated with corporate and other operations were \$658 million and \$(2.79) per diluted share, an increase of \$387 million and \$1.37 per diluted share as compared to 1999. 2000 results included restructuring and acquisition-related charges of \$460 million, DCI impairments of \$119 million and the cumulative effect of an accounting change of \$21 million. In 1999, Dominion recorded an extraordinary item of \$255 million, net of tax, reflecting primarily the write-off of certain net regulatory assets. See Notes 7, 8, and 9 to the Consolidated Financial Statements.

Liquidity and Capital Resources

Dominion and its subsidiaries depend on both internal and external sources of liquidity to provide working capital and to fund capital requirements. Short-term cash requirements not met by the cash flow from operations are generally satisfied with proceeds from short-term borrowings. Long-term cash needs are met through sales of securities and additional long-term debt financing.

Internal Sources of Liquidity

Cash flow from operating activities provided \$2.4 billion, \$1.3 billion and \$1.3 billion during 2001, 2000 and 1999, respectively. The increase in cash flow from operating activities during 2001, as compared to 2000, reflects primarily: collections of receivables outstanding as of December 31, 2000; recovery of previously deferred gas costs; and the inclusion of CNG's operations for the entire year. These sources of cash were partially offset by a reduction in payables, a decrease in cash flow from financial services operations due to the exiting of DCI's core businesses, and an increase in inventory purchases. At December 31, 2000, receivables resulting from gas sales, marketing and trading activities, as well as unrecovered gas costs, were higher than normal due to the sharp increase in gas prices in late 2000. Dominion's cash flow information for 2000 includes CNG operations beginning January 28, 2000. Cash flow from operating activities during 2000, as compared to 1999, increased primarily due to the acquisition of CNG.

Dominion's operations are subject to risks and uncertainties that may negatively impact cash flows from operations. Such risks and uncertainties include, but are not limited to, the following:

- unusual weather and its effect on energy sales to customers and energy commodity prices;
- extreme weather events that could disrupt offshore gas and oil production or cause catastrophic damage to Dominion's electric distribution and transmission systems;
- exposure to unanticipated changes in prices for energy commodities purchased or sold;
- effectiveness of Dominion's risk management activities and underlying assessment of market conditions and related factors, including energy commodity prices, basis, counterparty credit risk, liquidity, volatility, capacity, transmission, currency exchange rates, and interest rates;
- the cost of replacement electric energy in the event of unscheduled generation outages;
- contractual or regulatory restrictions on transfers of funds among Dominion and its subsidiaries; and
- timeliness of recovery for costs subject to cost-of-service utility rate regulation.

External Sources of Liquidity

Dominion Resources, Inc., Virginia Electric and Power Company and CNG (the Dominion Companies) rely on access to bank and capital markets as a significant source of liquidity for capital requirements not satisfied by cash provided by the companies' operations. The Dominion Companies' ability to borrow funds or issue securities and the return demanded by investors are affected by the issuing company's credit ratings. In addition, the raising of external capital is subject to certain regulatory approvals, including the SEC and, in the case of Virginia Electric and Power Company (Virginia Power), the Virginia State Corporation Commission (Virginia Commission). Credit ratings are intended to provide banks and capital market participants with a framework for comparing the credit quality of securities. Management believes that the current credit ratings of the Dominion Companies provide sufficient access to the capital markets. However, disruptions in the bank and capital markets not specifically related to Dominion may affect the Dominion Companies' ability to access these funding sources or cause an increase in the return required by investors.

Both quantitative (financial strength) and qualitative (business or operating characteristics) factors are considered by the credit rating agencies in establishing an individual company's credit rating. The credit ratings for the Dominion Companies are most affected by each company's financial profile, mix of regulated and nonregulated businesses and respective cash flows, changes in methodologies used by the rating agencies and "event risk," if applicable, such as major acquisitions. Credit ratings for the Dominion Companies as of March 1, 2002 follow:

	Standard & Poor's	Moody's
Dominion Resources, Inc.		
Senior unsecured debt securities	BBB+	Baa1
Preferred securities of subsidiary trusts	BBB-	Baa2
Commercial paper	A-2	P-2
Virginia Power		
Mortgage bonds	A	A2
Senior unsecured debt securities (including tax-exempt)	A-	A3
Preferred securities of subsidiary trust	BBB+	Baa1
Preferred stock	BBB+	Baa2
Commercial paper	A-1	P-1
CNG		
Senior unsecured debt securities	BBB+	A3
Preferred securities of subsidiary trust	BBB-	Baa1
Commercial paper	A-2	P-2

A downgrade in an individual company's credit rating would not generally restrict its ability to raise short-term and long-term financing so long as its credit rating is still "investment grade," but it would increase the cost of borrowing. Dominion's management proactively manages the financial structure of its consolidated businesses, including its business mix and acquisition

investments in an effort to maintain the Dominion Companies' current credit ratings.

As part of borrowing funds and issuing debt (both short-term and long-term) or preferred securities, the Dominion Companies must enter enabling agreements. These agreements contain covenants that, in the event of default, could trigger the acceleration of principal and interest payments and, in some cases, the termination of credit commitments unless a waiver of such requirements is agreed to by the lenders/security holders. These provisions are customary, with each agreement specifying which covenants apply. These provisions are not necessarily unique to the Dominion Companies. Some of the typical covenants include:

- the timely payment of principal and interest;
- information requirements, including submittal of financial reports filed with the SEC to lenders;
- keeping books and records in accordance with generally accepted accounting principles;
- payment of taxes, maintaining insurance;
- performance obligations, audits/inspections, continuation of the basic nature of business, restrictions on certain matters related to merger or consolidation, restrictions on disposition of substantial assets;
- financial covenants, such as a limit on total funded debt to total capitalization; and
- limitations on liens.

Dominion monitors the covenants on a regular basis in order to provide assurance that events of default will not occur. As of December 31, 2001, there were no events of default under the Dominion Companies' covenants.

During 2001, the Dominion Companies issued long-term debt, preferred securities through affiliated subsidiary trusts, and common stock totaling \$8.4 billion. As discussed below, proceeds were used primarily to repay short-term debt, finance major acquisitions and capital expenditures, and support financial services operations.

2001 — Financings Associated with Major Acquisitions

In 2001, Dominion Resources, Inc., refinanced the remaining bridge financing associated with the CNG acquisition with the following issuances of securities: \$300 million of 8.4 percent trust preferred securities due 2041, issued through an affiliated trust, and \$1 billion of 2-year fixed rate 6 percent senior notes.

Also in 2001, Dominion Resources, Inc., through another affiliated trust, issued \$250 million (\$247 million after discount) of 8.4 percent capital securities due 2031, in connection with the acquisition of Millstone. The balance of the acquisition was funded by proceeds of common stock issued in 2000 and cash temporarily available from other internal sources. Dominion

expects to permanently finance the portion temporarily funded by internal sources by issuing Dominion Resources, Inc. debt securities in the future. In January 2002, Dominion Resources, Inc. issued \$250 million 3.875 percent medium-term notes due 2004 for this purpose.

Dominion financed the cash consideration for the acquisition of Louis Dreyfus and the repayment of certain Louis Dreyfus debt with the following issuances of CNG securities: \$200 million of 7.8 percent trust preferred securities due 2041, issued through an affiliated trust; \$500 million of 5.375 percent senior notes due 2006; and \$450 million of 6.25 percent senior notes due 2011.

2001 – Short-Term Borrowings

At December 31, 2001, the Dominion Companies had commercial paper programs with an aggregate limit of \$2.05 billion supported by a \$1.75 billion 364-day revolving credit facility and a \$300 million multi-year facility. These credit facilities mature in the second quarter of 2002 and are expected to be replaced. During 2001, credit facilities totaling \$1.05 billion matured and were not renewed.

The Dominion Companies' net borrowings under the commercial paper program were \$1.86 billion at December 31, 2001, a decrease of \$555 million from amounts outstanding at December 31, 2000. Commercial paper borrowings are used primarily to fund working capital requirements and bridge financing of acquisitions, and therefore may vary significantly during the course of the year depending upon the timing and amount of cash requirements not satisfied by cash provided by operations.

In addition to commercial paper, Virginia Power may also issue up to \$200 million aggregate outstanding principal of extendible commercial notes (ECNs) to meet working capital requirements. ECNs are unsecured notes that are expected to be sold in private placements. Any ECNs issued would have a stated maturity of 390 days from issuance and may be redeemed, at Virginia Power's option, within 90 days or less from issuance. There were no ECNs outstanding at December 31, 2001.

2001 – Issuance of Common Stock

In 2001, Dominion received proceeds of \$245 million from the issuance of common stock through Dominion Direct (a dividend reinvestment and open enrollment direct stock purchase plan), employee savings plans, and the exercise of employee stock options. In addition, Dominion issued 14 million shares of common stock and stock options as part of the consideration paid in the acquisition of Louis Dreyfus at a total value of approximately \$894 million.

2001 – Other Securities Issuances and Repayments

During 2001, Dominion and its consolidated subsidiaries also issued the following other securities and used the net proceeds primarily for general corporate purposes, including the repayment of commercial paper and other debt and capital expenditures:

- Senior notes: \$1.1 billion bearing interest at (5.75 percent—6.85 percent) due 2006-2011;
- Medium-term notes: \$220 million bearing interest at variable rates due 2003;
- Medium-term notes denominated in Canadian dollars and issued through a Canadian subsidiary: \$117 million (US dollars) bearing interest at 6.1 percent due 2006;
- Tax exempt bonds: \$50 million bearing interest at variable rates due in 2031; and
- Notes with affiliates: \$194 million 6 percent note to an affiliated telecommunications entity due 2005, and a \$518 million variable rate demand note due by 2006 to another affiliated telecommunications entity. See *Dominion Fiber Ventures, LLC* below and Note 29 to the Consolidated Financial Statements.

In 2001, Dominion and its consolidated subsidiaries repaid approximately \$1.0 billion of long-term debt securities, excluding debt repayments associated with financial services operations. Also in 2001, Dominion purchased and redeemed, at par, all of the outstanding shares of the Virginia Power January 1987 and June 1987 series of money market preferred stock for \$125 million.

In January 2002, Virginia Power called its \$200 million, 6.75 percent 1997-A mortgage bonds due February 1, 2007 for redemption in February 2002. Virginia Power funded the redemption by issuing \$650 million of 5.375 percent senior notes due 2007. Virginia Power used the remaining proceeds for general corporate purposes and to repay other debt.

2001 – DCI Financing Activities

In connection with the purchases and originations of loans and the sales and collections of loans during 2001, DCI issued \$3.3 billion and repaid \$3.0 billion of long-term debt. With the sale of Saxon Capital in July 2001, DCI no longer engages in the financial services activities giving rise to these sources and uses of cash. For a discussion of Dominion's divestiture of its financial services business, see Note 6 to the Consolidated Financial Statements.

Amounts Available under Shelf Registrations

At December 31, 2001, Dominion Resources, Inc. had approximately \$2.3 billion principal amount remaining under currently effective shelf registrations, which was reduced in January 2002 by the issuance of \$250 million of medium term notes due

2004. Virginia Power had \$900 million principal amount remaining under an effective shelf registration, which was reduced in January 2002 by the aforementioned issuance of \$650 million of senior notes. At December 31, 2001, CNG did not have any amounts remaining under effective shelf registrations. However, CNG expects to file a shelf registration with the SEC in March 2002 for an additional \$1.5 billion principal amount in debt and trust preferred securities.

Investing Activities

In 2001, investing activities resulted in a net cash outflow of \$4.2 billion, reflecting the following primary investing activities:

- capital expenditures of \$1.2 billion that included construction and expansion of generation facilities, environmental upgrades, purchase of nuclear fuel, and construction and improvements of gas and electric transmission and distribution assets;
- capital expenditures of \$944 million that included the purchase of gas and oil producing properties, drilling and equipment costs and undeveloped lease acquisitions;
- proceeds from securitizations and collections of loans receivable by DCI of \$283 million;
- acquisition of Millstone for approximately \$1.3 billion;
- cash consideration for acquisition of Louis Dreyfus for approximately \$902 million; and
- proceeds from the sale of Saxon Capital of \$141 million.

For discussion of Dominion's acquisition of Millstone and Louis Dreyfus, see Note 5 to the Consolidated Financial Statements.

Capital Expenditures

Dominion's planned capital expenditures during 2002, 2003 and 2004 are expected to total approximately \$2.5 billion, \$3.2 billion and \$3.3 billion, respectively. These expenditures include construction and expansion of generation facilities, environmental upgrades, construction improvements of gas and electric transmission and distribution assets, purchases of nuclear fuel and expenditures to develop natural gas and oil properties. Dominion expects to fund its capital expenditures with cash from operations; a combination of sales of securities and short-term borrowings.

Contractual Cash Obligations and Commitments

Other than planned capital expenditures, Dominion has contractual cash obligations and commitments associated with the following: repayment of long-term debt and mandatorily redeemable preferred securities of subsidiary trusts (see Notes 20 and 22 to the Consolidated Financial Statements); purchased power contracts, fuel purchase contracts, natural gas pipeline and storage capacity contracts and leases (see Note 27 to the Consolidated Financial Statements). Dominion expects to fund

these obligations and commitments with cash flow from operations and a combination of sales of securities and short-term borrowings. Contractual cash obligations and commitments at December 31, 2001 follow: 2002—\$2.7 billion; 2003—\$3.2 billion; 2004—\$2.4 billion; 2005—\$1.9 billion; 2006—\$2.3 billion; and years after 2006—\$13.8 billion. The amount for 2002 includes \$1.35 billion associated with the redemption of previously issued securities that are scheduled to mature. These amounts do not include working capital commitments, including the repayment of short-term debt (see Note 19 to the Consolidated Financial Statements) and settlement of derivative and energy trading contracts (see Note 15 to the Consolidated Financial Statements), or amounts for interest or distributions payable on securities issued by Dominion (see Notes 20 and 22 to the Consolidated Financial Statements). In addition, at December 31, 2001, Dominion had issued \$3.3 billion of guarantees to various third parties in relation to payment of obligations by certain of its subsidiaries and officers. At December 31, 2001, subsidiary debt subject to such guarantees totaled \$1.1 billion and officers' borrowings under the executive stock loan program guaranteed by Dominion totaled \$84 million.

As of December 31, 2001, Dominion, through certain subsidiaries, has entered into agreements with special purpose entities (Lessors) in order to finance and lease several new power generation projects, as well as its corporate headquarters and aircraft. The Lessors have an aggregate financing commitment from equity and debt participants (Investors) of \$2.2 billion, of which \$817 million has been used for total project costs to date. Dominion, in its role as construction agent for the Lessors, is responsible for completing construction by a specified date. In the event a project is terminated before completion, Dominion has the option to either purchase the project for 100 percent of project costs or terminate the project and make a payment to the Lessor of approximately but no more than 89.9 percent of project costs. Upon completion of each individual project, Dominion has use of the project assets subject to an operating lease. Dominion's lease payments to the Lessors are sufficient to provide a return to the Investors. At the end of each individual project's lease term, Dominion may renew the lease at negotiated amounts based on project costs and current market conditions, subject to Investors' approval; purchase the project at its original construction cost; or sell the project, on behalf of the Lessor, to an independent third party. If the project is sold and the proceeds from the sale are insufficient to repay the Investors, Dominion may be required to make a payment to the Lessor, ranging from 81 percent to 85 percent of the project cost depending on the individual project and applicable agreement. Dominion has guaranteed a portion of the obligations of its subsidiaries to the Lessors during the construction and

post-construction periods. These transactions do not contain any type of credit rating or stock price trigger events.

As noted above, as of December 31, 2001, amounts subject to these agreements totaled \$817 million, and the total amount, upon completion of all projects, is projected to be approximately \$2.2 billion. The projects are accounted for as operating leases for financial accounting purposes. Accordingly, neither the project assets nor related obligations are reported on Dominion's balance sheets. The contractual cash commitments and obligations discussed above include annual payments of approximately \$6 million associated with these projects representing minimum payments under leases for which the leased assets are currently in use. Projects currently under development are scheduled for completion during the period 2002 through 2004. Annual lease payments for the projects are estimated to be \$33 million in 2002, increasing to \$133 million by 2004.

Dominion Fiber Ventures, LLC

In December 2000, Dominion formed Dominion Fiber Ventures, LLC (DFV) to facilitate the expansion of the telecommunications businesses of its subsidiary, Dominion Telecom, Inc. (DTI). In March 2001, Dominion contributed all outstanding shares of DTI with an estimated equity value of \$110 million to DFV, in exchange for 100 percent of Class B managing membership interests in DFV. A third-party investor trust contributed \$60 million in cash for 100 percent of the Class A membership interests in DFV. As a result of the Class A membership interests having substantive minority veto rights, Dominion's investment in DFV is accounted for using the equity method and is reported in investments in affiliates on the 2001 Consolidated Balance Sheet.

In March 2001, DFV issued \$665 million of 7.05 percent senior secured notes due March 2005 (DFV Senior Notes) and contributed part of the net proceeds to DTI. Pending the need for cash to fund capital expenditures in the expansion of its telecommunications network, DFV and DTI temporarily loaned proceeds from the issuance of the DFV Senior Notes and cash contributed by the Class A member to Dominion. Dominion used the proceeds to repay commercial paper. At December 31, 2001, Dominion owed \$367 million under these loans and reported it as notes payable—affiliates on the 2001 Consolidated Balance Sheet.

The DFV Senior Notes are secured by DTI stock and in part by certain rights with respect to 665,000 shares of Series A Mandatorily Convertible Preferred Stock (Preferred Stock), liquidation preference \$1,000 per share, issued by Dominion and held by Piedmont Share Trust (Piedmont Trust). Dominion is the beneficial owner of Piedmont Trust which is consolidated in the preparation of Dominion's financial statements. If the DFV Senior Notes are not otherwise paid at maturity, or in the event

there is a downgrade of Dominion Resources, Inc. senior unsecured debt to BBB- or Baa3 and the closing price of Dominion's common stock is below \$45.97 for 10 consecutive trading days, the Preferred Stock is subject to remarketing, with the proceeds being used to retire the DFV Senior Notes. If the remarketing of the Preferred Stock were to occur, the Preferred Stock, as convertible securities, would be considered in the calculation of diluted earnings per share of Dominion's common stock or could result in the issuance of additional shares of Dominion common stock, if converted.

Related Party Transactions

For additional information about Dominion's investment in DFV and other related party transactions, see Note 29 to the Consolidated Financial Statements.

Future Issues and Outlook

Regulated Electric Operations

Electric Deregulation Legislation

Virginia—In 1999, Virginia enacted comprehensive restructuring legislation. The Virginia Electric Utility Restructuring Act (the Virginia Restructuring Act) established a plan to restructure Virginia's electric utility industry and provided for the phase-in of choice for retail customers from January 1, 2002 through January 1, 2004. The Virginia Commission has ordered that retail choice be fully implemented in Virginia by January 1, 2003 for customers of Dominion's regulated electric subsidiary.

Under the Virginia Restructuring Act, the generation portion of Dominion's Virginia jurisdictional operations is no longer subject to cost-based rate regulation, effective January 1, 2002. Dominion's base rates (excluding fuel costs and certain other allowable adjustments) will remain capped until July 2007 unless terminated sooner as provided by the Virginia Restructuring Act. Recovery of generation-related costs will continue through capped rates and, where applicable, a wires charge assessed on those customers opting for alternative suppliers. Dominion may petition the Virginia Commission to terminate the capped rates after January 1, 2004. If Dominion were to request that the capped rates be terminated, the Virginia Commission may terminate the capped rates if it finds that a competitive generation services market exists within Dominion's service area. Dominion's wires charge is the excess of its capped unbundled rate for generation over the projected market price for generation. The wires charge is intended to compensate Dominion for its investment in and commitments for generation-related utility assets prior to the enactment of the restructuring legislation. Dominion's methodology for calculating the wires charge and applicable market price has been approved by the Virginia Commission. Additionally, the Virginia Restructuring Act provides that after the end of the capped rate period, any default

service provided by Dominion will be based upon competitive market prices for electric generation services.

Dominion began the phase-in of retail choice on January 1, 2002. The phase-in will be completed on January 1, 2003.

Dominion is able to accommodate this schedule as a result of experience gained during its retail access pilot program, as well as extensive testing of its processes and systems to support customers switching to retail access. Additionally, the pilot demonstrated Dominion's ability to sell energy displaced by shopping customers in the wholesale market.

During the capped rate period, Dominion may require a 12-month minimum stay period for electricity customers with an annual peak demand of 500 kilowatts or greater who request electricity supply service after receiving electricity supply service from a competitive service provider. This measure will mitigate the practice of large commercial and industrial customers returning to Dominion's capped rate service during periods of higher market prices and leaving during periods of lower market prices—a practice known as “seasonal gaming.”

As discussed in the *Separation of Generation and Delivery Operations in Virginia* and *Alliance RTO* sections below, the Virginia Restructuring Act also calls for the functional separation of generation, transmission and distribution.

North Carolina—The North Carolina General Assembly is exploring the future of electric service in North Carolina, the development of a competitive wholesale market and retail competition. However, there has been little recent activity.

Separation of Generation and Delivery Operations in Virginia

The Virginia Restructuring Act addressed divestiture, functional separation and other corporate relationships. The Act required Virginia's electric utilities to file with the Virginia Commission their plans to separate generation from transmission and distribution operations.

Dominion's proposed separation plan included transferring the generation assets and operations, including its non-utility power purchase contracts, from its regulated electric utility, Virginia Power, to a separate affiliated company. In December 2001, the Virginia Commission directed Dominion to separate its generation, distribution, and transmission functions through creation of divisions within Virginia Power, rather than through transfer of generation assets to a separate affiliate. The Virginia Commission's December 2001 order did not preclude further consideration of Dominion's proposed corporate reorganization and asset transfer, pending, in the Virginia Commission's view, further developments in needed market structures and competitive retail electric generation markets. Dominion has filed a notice of appeal of the Virginia Commission's order. No assessment can be made at this time concerning future developments.

Because Virginia Power's operations were largely functionally separated in its existing corporate structure, implementation of the plan ordered by the Virginia Commission will require few changes in Virginia Power's operations. Virginia Power will continue to provide electric service to its customers at capped rates until July 1, 2007, unless capped rates are terminated after January 1, 2004, as provided in the Virginia Restructuring Act. Virginia Power will continue serving customers who select alternative energy suppliers by delivering the electric energy and will collect a wires charge, if applicable, as discussed above. Virginia Power will also be permitted to continue its activities in wholesale energy markets. However, effective January 1, 2002, Virginia codes of conduct became effective, governing certain transactions and communications between Virginia Power's electric distribution and transmission operations and its generation division. These codes of conduct are designed to prevent cross-subsidies between the generation and other divisions and to ensure that the generation and other divisions operate independently.

Alliance RTO

Both the Virginia Restructuring Act and the Federal Energy Regulatory Commission (FERC) merger conditions require that Dominion join a regional transmission organization (RTO). By joining an RTO, Dominion's regulated electric utility subsidiary, Virginia Power, would transfer operational control of its transmission assets to the RTO, a separate entity. Dominion, together with eight other member companies (Alliance Companies), filed with FERC for approval of the proposed “Alliance RTO.”

Dominion also filed an application to transfer control of its transmission facilities to the Alliance RTO with the Virginia Commission and North Carolina Utilities Commission. In December 2001, FERC concluded the Alliance Companies lack sufficient scope as an RTO and also ordered the Alliance Companies to determine how they could fit within the Midwest Independent System Operator. Dominion will examine the possibility of joining RTOs other than those representing Midwest utilities, as directed by FERC. As a result of the FERC decision, the North Carolina application was dismissed and the Virginia application was stayed. Dominion expects to refile or amend the state applications.

Despite these delays, Dominion remains committed to supporting electric deregulation by becoming a member of an RTO. The formation of RTOs is important to enhancing wholesale electric competition through the creation of standardized market rules, tariffs, and interconnection agreements. RTOs will put all suppliers on an equal footing and enhance access to non-discriminatory delivery services. Membership in an RTO and regionalization of electric markets will provide opportunities for Dominion to expand its business by providing generation

services to more customers. While a new regional authority will make major operational decisions and operate the entire grid, Dominion will continue to ensure that the local systems operate reliably. In 2001, Dominion focused on the new systems, business processes, regulatory filings and contractual relationships necessary to implement electric deregulation and regional transmission operations.

Wholesale Competition

Dominion's electric utility subsidiary sells electricity in the wholesale market under its market-based sales tariff authorized by FERC but has agreed not to make wholesale power sales under this tariff to loads located within its service territory. In January 2002, Dominion's electric utility subsidiary filed for FERC approval of a tariff to sell wholesale power at capped rates based on its embedded cost of generation. This cost-based sales tariff could be used to sell to loads within or outside its service territory. Any such sales would be voluntary. Dominion expects FERC to approve the tariff during the first quarter of 2002.

Dominion's sales of natural gas and oil in wholesale markets are not regulated by FERC.

Exposure to Potentially Stranded Costs

Stranded costs are those costs incurred or commitments made by utilities under cost-based regulation that may not be reasonably expected to be recovered in a competitive market. At December 31, 2001, Dominion's exposure to potentially stranded costs consisted of long-term purchased power contracts that could ultimately be determined to be above market; generating plants that could possibly become uneconomic in a deregulated environment; and unfunded obligations for nuclear plant decommissioning and postretirement benefits not yet recognized in the financial statements.

Dominion believes capped electric retail rates and, where applicable, wires charges provided under the Virginia Restructuring Act provide a reasonable opportunity to recover a substantial portion of its potentially stranded costs. Based on estimates at March 31, 1999, Dominion would have otherwise been exposed, on a pre-tax basis, to an estimated \$3.2 billion of potential losses related to long-term power purchase commitments without the recoveries provided by the capped rates. Recovery of Dominion's potentially stranded costs remains subject to numerous risks even in the capped-rate environment including, among others, exposure to long-term power purchase commitment losses, future environmental compliance requirements, changes in tax laws, nuclear decommissioning costs, inflation, increased capital costs, and recovery of certain other items. See Notes 16, 26 and 27 to the Consolidated Financial Statements.

Rate Matters — Electric

Virginia—Dominion's separation plan, as described in *Separation of Generation and Delivery Operations in Virginia*, proposed an index-based fuel cost recovery based on forecasted generation by fuel types and projected fuel price indices, to be effective after January 1, 2002. Dominion subsequently withdrew the index-based fuel cost recovery mechanism and will continue to develop an alternative methodology. Dominion's current Virginia jurisdictional fuel factor will remain in effect until December 31, 2002. Proceedings to be initiated during 2002 will determine the fuel factor after that date.

Dominion filed its Virginia Commission-approved unbundled rates reflecting the functional separation of generation, transmission and distribution in January 2002. As previously discussed, Dominion will phase in retail choice for all customers in its service territory by January 1, 2003. Where applicable, wires charges, effective January 1, 2002 and subject to annual adjustment, will be paid by Dominion's Virginia jurisdictional retail customers who choose an alternative generation supplier during the capped rate period.

North Carolina—Dominion's regulated electric utility cannot request an increase in its North Carolina jurisdictional base rates until 2006, except for certain events that would have a significant financial impact. Fuel rates, however, are still subject to change under annual proceedings.

Regulated Gas Distribution Operations

Gas Deregulation Legislation

Each of the three states in which Dominion has gas distribution operations has enacted or considered legislation regarding deregulation of natural gas sales at the retail level.

Ohio—Ohio has not enacted legislation requiring supplier choice for residential and commercial natural gas consumers. However, in cooperation with the Public Utilities Commission of Ohio (Ohio Commission), Dominion on its own initiative offers retail choice to customers. Dominion's Energy Choice program is available to all 1.2 million customers in Dominion's Ohio service area. At December 31, 2001, approximately 586,000 of Dominion's Ohio customers were participating in this open-access program. Large industrial customers in Ohio also source their own natural gas supplies.

Pennsylvania—At December 31, 2001, approximately 125,000 residential and small commercial customers had opted for Energy Choice in Dominion's Pennsylvania service area. Nearly all Pennsylvania industrial and large commercial customers buy natural gas from unregulated suppliers.

West Virginia—At this time, West Virginia has not enacted legislation to require customer choice in its retail natural gas markets. The West Virginia Public Service Commission (West Virginia Commission) recently issued regulations to govern pooling services; these services are one of the tools that natural gas suppliers may utilize to provide retail customer choice in the future.

Rate Matters — Gas Distribution

Ohio—In October 2001, the Ohio Commission approved a program developed by Dominion to address the inability of certain customers to pay delinquent account balances. In many cases, these customers were impacted by last winter's unusually high gas prices and cold weather. Under this one-time matching program, Dominion matched dollar-for-dollar, up to \$500 per customer, the first payment received by December 31, 2001 for qualifying customers who had received a disconnection notice or who had been disconnected as of October 31, 2001. Matching amounts totaling \$10 million were credited to customers' accounts at December 31, 2001.

The Ohio Commission and Dominion also agreed that adjustments of approximately \$100 million to depreciation were appropriate in order to reflect the effect of certain fixed assets exceeding their original estimated useful lives. The Ohio Commission initially held that payments made under the matching program and subsequent write-offs of bad debts in excess of the amount already recovered in rates could be offset by reductions in the excess depreciation reserve through a bad debt rider. The Ohio Commission revised its decision on the bad debt rider but allowed the payment-matching program to continue. Under the revised final order, the Ohio Commission authorized the deferral of certain amounts incurred by Dominion in excess of the amount of bad debt expense already recovered in rates, pending recovery in the next rate case. Dominion recognized a regulatory asset of \$80 million, representing the excess customer bad debt costs as of December 31, 2001. Dominion believes that it will recover those amounts deferred. See Note 18 to the Consolidated Financial Statements.

Pennsylvania—The Audit Bureau of the Pennsylvania Public Utility Commission (Pennsylvania Commission) has conducted a compliance audit of Dominion's purchased gas cost rates for the years 1997 through 1999. In the fourth quarter of 2001, Dominion received an audit report in which the Audit Bureau noted certain exceptions and proposed adjustments that, if determined to be appropriate, would result in refunds to customers. Dominion is discussing the matter with the Pennsylvania Commission and believes that the ultimate resolution of this issue will not have a material impact on its financial position, results of operations or cash flows.

West Virginia—In 2001, the West Virginia Commission approved a settlement between Dominion and certain third

parties, regarding the costs of gas supplies and increased operating costs, that stipulated that Dominion would receive a \$9.5 million increase in gas and non-gas revenues. The settlement also provides for a two-year rate moratorium. The new rates took effect on January 1, 2002 and will be in place through December 31, 2003.

Interstate Gas Transmission Operations

FERC Policy Developments

FERC's most significant near-term policy initiative regarding interstate gas pipelines may also impact Dominion's interstate electric transmission operations. FERC proposes to eliminate its existing, separate code of conduct regulations for natural gas pipelines and electric transmission utilities, and to replace these requirements with uniform standards applicable to interstate "Transmission Providers" both of natural gas and of electricity. The proposed standards would redefine the scope of affiliates covered by standards of conduct for most FERC-regulated companies. If the proposed policy is adopted, it will supersede the existing broad standards, imposed as a result of the CNG acquisition, that are now applicable to Dominion, and will improve its competitive standing among other integrated energy companies.

Dominion supports FERC's policy goal to ensure a competitive interstate energy market. However, Dominion advocates certain adjustments to recognize the significant operational differences between gas pipelines and electric transmission companies. Dominion anticipates further action by FERC by mid-2002. While Dominion expects the outcome of a final rule to improve its ability to compete with similarly-situated transmission providers, Dominion does not expect the final rule to have a short-term material impact on its results of operations, financial position or cash flows.

Rate Matters — Gas Transmission

Dominion implemented various rate filings, tariff changes, and negotiated rate service agreements during 2001. In all material respects, the filings were approved by FERC in the form requested by Dominion and were subject to only minor modifications. Dominion has no significant rate matters pending before FERC at this time.

Environmental Matters

Dominion is subject to rising costs resulting from a steadily increasing number of federal, state and local laws and regulations designed to protect human health and the environment. These laws and regulations affect future planning and existing operations. They can result in increased capital, operating and other costs as a result of compliance, remediation, containment and monitoring obligations.

Historically, Dominion recovered such costs arising from regulated electric operations through utility rates. However, to the extent that environmental costs are incurred in connection with operations regulated by the Virginia Commission, during the period ending June 30, 2007, in excess of the level currently included in the Virginia jurisdictional electric retail rates, Dominion's results of operations will decrease. After that date, recovery through regulated rates may be sought for only those environmental costs related to regulated electric transmission and distribution operations. Dominion also may seek recovery through regulated rates for environmental expenditures related to regulated gas transmission and distribution operations.

Environmental Protection and Monitoring Expenditures

Dominion incurred approximately \$116 million, \$94 million, and \$78 million of expenses (including depreciation) during 2001, 2000, and 1999, respectively, in connection with environmental protection and monitoring activities, and expects these expenses to be approximately \$126 million in 2002. In addition, capital expenditures related to environmental controls were \$221 million, \$214 million, and \$84 million for 2001, 2000, and 1999, respectively. The amount estimated for 2002 for these expenditures is \$321 million.

Clean Air Act Compliance

The Clean Air Act requires Dominion to reduce its emissions of sulfur dioxide (SO₂) and nitrogen oxide (NO_x), which are gaseous by-products of fossil fuel combustion, and to obtain operating permits for all major emissions-emitting facilities. Permit applications have been submitted for Dominion's affected facilities. The Clean Air Act's SO₂ reduction program is based on the issuance of a limited number of SO₂ emission allowances, each of which may be used as a permit to emit one ton of SO₂ into the atmosphere or may be sold to a third party. Evaluation and planning of future projects to comply with SO₂ and NO_x limitations are ongoing and will be influenced by changes in the regulatory environment, availability of SO₂ allowances, various state and federal SO₂ and NO_x control programs, and emission control technology.

In response to NO_x reduction requirements mandated by the Environmental Protection Agency (EPA) for states in which it operates, Dominion plans to install NO_x reduction equipment at its affected coal-fired generating facilities at an estimated capital cost of approximately \$650 million over the next several years.

In the near future, the Bush Administration and the United States Congress may consider various "multi-pollutant" legislative proposals that would require fossil-fuel fired generating units to comply with more stringent pollution control standards for NO_x, SO₂ and mercury. Many of the proposals would rely

upon flexible cap and trade programs for compliance and would exempt covered facilities from other Clean Air Act requirements. All of the proposals would phase-in the emission reduction requirements under a variety of timeframes, up to 16 years. Dominion's management cannot predict whether any of these proposals will pass this year or in the future. However, if more stringent emissions standards are ultimately imposed on Dominion's generating units, new, perhaps significant, expenditures could be required.

During 2000, Virginia Power received a Notice of Violation from the EPA alleging that it failed to obtain New Source Review permits under the Clean Air Act prior to undertaking specified construction projects at the Mt. Storm Power Station in West Virginia. The Attorney General of New York filed a suit against Virginia Power alleging similar violations of the Clean Air Act at the Mt. Storm Power Station. Virginia Power also received notices from the Attorneys General of Connecticut and New Jersey of their intentions to file suit for similar violations. Management believes that Virginia Power has obtained the necessary permits for its generating facilities. Virginia Power has reached an agreement in principle with the federal government and the state of New York to resolve this situation. The agreement in principle includes payment of a \$5 million civil penalty, a commitment of \$14 million for environmental projects in Virginia, West Virginia, Connecticut, New Jersey and New York, and a 12-year, \$1.2 billion capital investment program for environmental improvements at Virginia Power's coal-fired generating stations in Virginia and West Virginia. Dominion had already committed to a substantial portion of the \$1.2 billion expenditures for SO₂ and NO_x emissions controls. The negotiations over the terms of a binding settlement have expanded beyond the basic agreement in principle and are ongoing.

Global Climate Change

In 1997, the United States signed an international Protocol to limit man-made greenhouse emissions. However, the Protocol will not become binding unless approved by the United States Senate. Currently, the Bush Administration has indicated that it will not pursue ratification of the Protocol but will work to establish new "voluntary" approaches to achieve reductions of greenhouse gas emissions. However, the United States Congress may consider legislation that would implement mandatory reductions of greenhouse gas emissions. The cost of compliance with the Protocol or similar mandatory greenhouse gas reduction obligations could be significant. Given the uncertainties of future action by the federal government on this issue, Dominion cannot predict the likely future impact on its operations at this time.

Accounting Matters**Recently Issued Accounting Standards**

In 2001, the Financial Accounting Standards Board (FASB) issued SFAS Nos. 141, *Business Combinations*, 142, *Goodwill and Other Intangible Assets*, 143, *Accounting for Asset Retirement Obligations*, and 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*. See Note 4 to the Consolidated Financial Statements for a discussion of the impact of adopting these new standards.

Restructuring Charges

After completing the transition period for fully integrating CNG into Dominion's existing organization and operations, management initiated a focused review of Dominion's combined operations in the fourth quarter of 2001. The objective of this review was to identify any activities or resources that were no longer necessary since the end of the transition period. As a result, restructuring charges of \$105 million were recognized in the fourth quarter of 2001 for items such as employee severance and other termination benefits and cancellation or modification of leases to eliminate office space no longer needed. See Note 7 to the Consolidated Financial Statements. Dominion's 2001 and 2000 restructuring plans should reduce future annualized operating costs by approximately \$33 million and \$102 million, respectively, that would otherwise have been incurred.

Business Opportunities and Other Operations**Independent Power Production Operations**

Dominion's focus in its power generation business is to acquire and develop additional power generation in the MAIN-to-Maine region. The region begins at the Mid-America Interconnected Network (MAIN) that includes electric service territories of the upper Midwest and is home to Dominion's Kincaid and Elwood generating facilities. The target region extends east to Virginia Power's service territory and north to New England, where Dominion operates Millstone. Dominion is benefiting from the CNG acquisition, as it is developing natural gas-fired power generation facilities along its natural gas pipeline system. Dominion is in various stages of development for new natural gas-fired power generation facilities throughout the MAIN-to-Maine region with estimated completion dates from 2002 to 2004. Dominion is striving to grow a balanced portfolio of generation assets, while maintaining fuel and regional diversity throughout the MAIN-to-Maine region.

Exploration and Production Operations

Dominion continues to focus on increasing earnings from gas and oil properties primarily through acquisition and development activities, exploration, and operating efficiencies. The acquisition of Louis Dreyfus represents the addition of significant, long-lived natural gas reserves located in several onshore United States regions serving northeast markets. This addition also provides significant new development drilling opportunities, complementing Dominion's existing development and exploration activities.

Additionally, Dominion will seek opportunities to enhance the value of its reserves through the convergence of its gas and electric products and optimization of its gas storage facilities. Continued use of new and emerging production, prospecting and drilling technologies, when applied to sound business practices developed over time in gas and oil operations, should help improve operational efficiencies, as well as minimize finding, developing and lifting costs.

Effect of Changes in Commodity Prices

Dominion's operations are impacted by changes in energy commodity prices. To the extent that energy commodities are sold by one of Dominion's utilities with cost-of-service rate regulation, such commodity costs are generally recovered through rates. Market price changes impact Dominion's revenue from natural gas and oil production and from commodity sales through unregulated subsidiaries. Dominion has established an enterprise risk management function to reduce such price risk exposures.

Nuclear Relicensing

Dominion filed applications for 20-year life-extensions for the North Anna and Surry units in May 2001 with the Nuclear Regulatory Commission (NRC). The NRC has accepted and is reviewing the applications. Over the next two years, the NRC will perform site visits and review the applications in detail.

Dominion has also performed an internal assessment on the probability of a successful license renewal application for both of its operating Millstone units. Based on this assessment and other factors, Dominion has initiated preparations to apply for a 20-year extension of the licenses for both its operating Millstone units. Dominion expects to file a completed application based on NRC guidelines in 2004.

Nuclear Insurance

The Price Anderson Act (Act) expires in August 2002, but operating nuclear reactors would continue to be covered by the law, which would channel and cap claims if a nuclear accident should occur. The Act has been renewed three times since 1957, and Congress is currently holding hearings on reauthorizing the legislation.

Pipeline Operations

Dominion plans to expand its natural gas transmission system with a \$497 million, 263-mile interstate pipeline. The Greenbrier Pipeline will originate in Kanawha County, West Virginia, and extend through southwest Virginia into Granville County, North Carolina. Piedmont Natural Gas is a 33 percent owner in the pipeline project.

Telecommunications Operations

Dominion continues the expansion of its telecommunications operations as a competitive provider of services through its jointly-owned affiliate, Dominion Fiber Ventures, LLC. These services include providing facilities-based, high-bandwidth capacity throughout the eastern United States with particular concentration on under-served markets. Dominion continues building its network through the acquisition of dark fiber capacity on existing third-party networks. The future growth of its network will occur through joint development projects on third-party rights of way.

Future Acquisitions

Because Dominion's industry is rapidly changing, there are many opportunities for acquisitions of assets, as well as for business combinations. Dominion investigates any opportunity that may increase shareholder value and build on existing businesses. Dominion has participated in the past—and its security holders may assume that at any time Dominion may be participating—in bidding or other negotiations for such transactions. Such participation may or may not result in a transaction for Dominion. However, any such transaction that does take place may involve consideration in the form of cash, debt or equity securities. It may also involve payment of a premium over book or market values. Such transactions or payments could affect the market prices and rates for Dominion's securities.

Market Rate Sensitive Instruments and Risk Management

Dominion's financial instruments, derivative financial instruments and derivative commodity contracts are exposed to potential losses due to adverse changes in interest rates, commodity prices and equity security prices as described below. Interest rate risk generally is related to Dominion's outstanding debt and financial services activities. Commodity price risk is present in Dominion's electric operations, gas production and procurement operations, and energy marketing and trading operations due to the exposure to market shifts for prices received and paid for natural gas, electricity and other commodities. Dominion uses derivative commodity contracts to manage price risk exposures for these operations. Dominion is exposed to equity price risk through various portfolios of equity securities.

Dominion's sensitivity analysis estimates the potential loss of future earnings or fair value from market risk sensitive instruments over a selected time period due to a 10 percent unfavorable change in interest rates and commodity prices.

Commodity Price Risk — Trading Activities

As part of its strategy to market energy and to manage related risks, Dominion manages a portfolio of derivative commodity contracts held for trading purposes. These contracts are sensitive to changes in the prices of natural gas, electricity and certain other commodities. Dominion uses established policies and procedures to manage the risks associated with these price fluctuations and uses various commodity instruments, such as futures, forwards, swaps and options, to reduce risk by creating offsetting market positions. In addition, Dominion seeks to use its generation capacity, when not needed to serve customers in its service territory, to satisfy commitments to sell energy.

A hypothetical 10 percent unfavorable change in commodity prices would have resulted in a decrease of approximately \$12 million and \$3 million in the fair value of its commodity contracts held for trading purposes as of December 31, 2001 and 2000, respectively.

Commodity Price Risk — Non-Trading Activities

Dominion manages the price risk associated with purchases and sales of natural gas, oil and electricity by using derivative commodity instruments including futures, forwards, options and swaps.

For sensitivity analysis purposes, the fair value of Dominion's non-trading derivative commodity instruments is determined based on models that consider the market prices of commodities in future periods, the volatility of the market prices in each period, as well as the time value factors of the derivative instruments. Market prices and volatility are principally determined based on quoted prices on the futures exchange.

A hypothetical 10 percent unfavorable change in market prices of Dominion's non-trading derivative commodity instruments would have resulted in a decrease in fair value of approximately \$155 million and \$56 million as of December 31, 2001 and December 31, 2000, respectively.

The impact of a change in energy commodity prices on Dominion's non-trading derivative commodity instruments at a point in time is not necessarily representative of the results that will be realized when such contracts are ultimately settled. Net losses from derivative commodity instruments used for hedging purposes, to the extent realized, are generally offset by recognition of the hedged transaction, such as revenue from sales.

Interest Rate Risk

Dominion manages its interest rate risk exposure predominantly by maintaining a balance of fixed and variable rate debt. Dominion also enters into interest rate sensitive derivatives, including interest rate swaps and interest rate lock agreements. In addition, Dominion, through subsidiaries, retains ownership of mortgage investments, including subordinated bonds and interest-only residual assets retained at securitization of mortgage loans originated and purchased. For financial instruments outstanding at December 31, 2001, a hypothetical 10 percent increase in market interest rates would decrease annual earnings by approximately \$10 million. A hypothetical 10 percent increase in market interest rates, as determined at December 31, 2000, would have resulted in a decrease in annual earnings of approximately \$40 million.

Foreign Exchange Risk

Dominion's Canadian natural gas and oil exploration and production activities are relatively self-contained within Canada. As a result, Dominion's exposure to foreign currency exchange risk for these activities is limited primarily to the effects of translation adjustments that arise from including that operation in its consolidated financial statements. Since these translation adjustments do not impact cash flows, Dominion's management monitors this exposure but believes it is not material. Although Dominion may purchase products and services denominated in foreign currencies for use in its non-Canadian operations and may use currency forward contracts to manage related risks, such commitments were not material at December 31, 2001 and 2000.

Equity Price Risk

Dominion is subject to equity price risk due to marketable equity securities held as investments and in trust funds. These marketable securities are reported on the balance sheet at fair value. The following table presents marketable equity securities held by Dominion by category at December 31, 2001 and 2000.

(millions)	2001		2000	
	Cost	Fair Value	Cost	Fair Value
Marketable securities	\$127	\$121	\$134	\$118
Nuclear decommissioning trust investments	734	952	279	549

Risk Management Policies

Dominion has operating procedures in place that are administered by experienced management to help ensure that proper internal controls are maintained. In addition, Dominion has established an independent function at the corporate level to monitor compliance with the price risk management policies of all subsidiaries. Dominion maintains credit policies that include the evaluation of a prospective counterparty's financial condition, collateral requirements where deemed necessary, and the use of standardized agreements which facilitate the netting of cash flows associated with a single counterparty. In addition, Dominion also monitors the financial condition of existing counterparties on an ongoing basis. Management believes, based on Dominion's credit policies and the December 31, 2001 provision for credit losses, that it is unlikely that a material adverse effect on its financial position, results of operations or cash flows would occur as a result of counterparty nonperformance. See Note 15 to the Consolidated Financial Statements for discussion of the effects of Enron's bankruptcy on Dominion's December 31, 2001 consolidated financial statements.

SELECTED CONSOLIDATED FINANCIAL DATA

(millions, except per share amounts)	2001	2000	1999	1998	1997

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 1 Nature of Operations

Dominion Resources, Inc. (Dominion) is a holding company headquartered in Richmond, Virginia. Its principal subsidiaries are Virginia Electric and Power Company (Virginia Power), Consolidated Natural Gas Company (CNG), and Dominion Energy, Inc. (DEI). Dominion and CNG are registered public utility holding companies under the Public Utility Holding Company Act of 1935 (1935 Act).

Virginia Power is a regulated public utility that generates, transmits, and distributes electricity within a 30,000-square-mile area in Virginia and northeastern North Carolina. Virginia Power sells electricity to approximately 2.1 million retail customers, including governmental agencies, and to wholesale customers such as rural electric cooperatives, municipalities, power marketers and other utilities. Virginia Power has trading relationships beyond its retail service territory and buys and sells wholesale electricity and natural gas off-system.

CNG operates in all phases of the natural gas business. Its regulated retail gas distribution subsidiaries serve approximately 1.7 million residential, commercial and industrial gas sales and transportation customers in Ohio, Pennsylvania, and West Virginia. Its interstate gas transmission pipeline system serves each of its distribution subsidiaries, non-affiliated utilities and end use customers in the Midwest, mid-Atlantic and Northeast. CNG's exploration and production operations are located in several major gas and oil producing basins in the United States, both onshore and offshore. CNG also provides a variety of energy marketing services and holds an equity investment in energy activities in Australia that is classified as held for sale.

DEI is an independent power producer and a natural gas and oil exploration and production company active in the U.S. and Canada.

Dominion has substantially exited the core operating businesses of Dominion Capital, Inc. (DCI) as required by the Securities and Exchange Commission (SEC) under the 1935 Act. DCI's primary business was financial services including loan administration, commercial lending and residential mortgage lending. See Note 6.

In 2000, Dominion created a subsidiary service company under the 1935 Act that serves Dominion's various subsidiaries. CNG also operated a service company during 2000. Effective January 1, 2001, Dominion combined the two service companies.

Dominion manages its daily operations along three primary operating segments: Dominion Energy, Dominion Delivery and Dominion Exploration & Production. In addition, Dominion also reports the operations of DCI and its corporate and other operations as operating segments. Assets remain wholly owned by its legal subsidiaries. See Note 30.

The term "Dominion" is used throughout this report and, depending on the context of its use, may represent any of the following: the legal entity, Dominion Resources, Inc., one of Dominion Resources, Inc.'s consolidated subsidiaries or the entirety of Dominion Resources, Inc. and its consolidated subsidiaries.

Note 2 Significant Accounting Policies

General

Dominion includes certain estimates and assumptions in preparing consolidated financial statements in accordance with generally accepted accounting principles. These estimates and assumptions affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses for the periods presented. Actual results may differ from those estimates.

The consolidated financial statements represent Dominion's accounts after the elimination of intercompany transactions. Dominion follows the equity method of accounting for investments in partnerships and corporate joint ventures when Dominion is able to influence the financial and operating policies of the investee. For all other investments, the cost method is applied.

Certain amounts in the 2000 and 1999 consolidated financial statements have been reclassified to conform to the 2001 presentation.

Use of Fair Value Measurements

Dominion reports certain contracts and instruments at fair value in accordance with applicable generally accepted accounting principles. Fair value is based on actively quoted market prices, if available. In the absence of actively quoted market prices, Dominion seeks indicative price information from external sources, including broker quotes and industry publications. If pricing information from external sources is not available, Dominion must estimate prices based on available historical and near-term future price information and certain statistical methods, including regression analysis. For options and contracts with option-like characteristics where pricing information is not available from external sources, Dominion uses a modified Black-Scholes model and considers time value, the volatility of the underlying commodities and other relevant assumptions when estimating fair value. For contracts with unique characteristics, Dominion estimates fair value using a discounted cash flow approach deemed appropriate in the circumstances and applied consistently from period to period. If pricing information is not available from external sources, judgment is required

to develop the estimates of fair value. For individual contracts, the use of different assumptions could have a material effect on the contract's estimated fair value.

Concentration of Credit Risk

Dominion engages in transactions for the purchase and sale of products and services with various companies in the energy industry and with commercial and residential energy consumers. These transactions principally occur in the Northeast, Midwest and Mid-Atlantic regions of the United States. Although this concentration could affect Dominion's overall exposure to credit risk, management believes that Dominion is exposed to minimal risk. A significant portion of Dominion's business is conducted with major companies in the energy industry. Credit risk associated with trade accounts receivable from energy consumers is limited due to the large number of customers. Dominion maintains credit policies with respect to its counterparties that management believes minimize overall credit risk. Such policies include the evaluation of a prospective counterparty's financial condition, collateral requirements where deemed necessary and the use of standardized agreements that facilitate the netting of cash flows associated with a single counterparty. Dominion also monitors the financial condition of existing counterparties on an ongoing basis. Dominion maintains a provision for credit losses based upon factors surrounding the credit risk of its customers, historical trends and other information. Management believes, based on Dominion's credit policies and the December 31, 2001 provision for credit losses, that it is unlikely that a material adverse effect on its financial position, results of operations or cash flows would occur as a result of counterparty nonperformance. See Note 15 for discussion of the effects of Enron's bankruptcy on Dominion's December 31, 2001 consolidated financial statements.

Operating Revenue

Operating revenue is recorded on the basis of services rendered, commodities delivered or contracts settled and includes amounts yet to be billed to customers. Operating revenue from energy trading activities includes realized commodity contract revenue, net of related cost of sales, and unrealized gains and losses resulting from marking to market those commodity contracts not yet settled. The primary types of sales and service activities reported as operating revenue include:

Regulated electric sales consist primarily of state-regulated retail electric sales and federally-regulated wholesale electric sales and electric transmission services.

Regulated gas sales consist primarily of state-regulated retail natural gas sales.

Nonregulated electric sales consist primarily of sales of electricity from utility, independent power production and merchant nuclear plant resources at market-based rates, and net operating revenue from electric trading activities.

Nonregulated gas sales consist primarily of sales of natural gas at market-based rates, brokered gas sales, and net operating revenue from gas trading activities. Natural gas sold includes gas produced by Dominion as well as gas purchased from others.

Gas transportation and storage consists primarily of federally-regulated sales of gathering, transmission, distribution and storage services. Also included are gas distribution charges to retail customers opting for alternate suppliers.

Gas and oil production consists primarily of sales of natural gas, oil and condensate produced by Dominion. Gas and oil production revenue is reported net of royalties.

Other revenue consists primarily of service fees associated with rate-regulated electric and gas distribution; sales of coal, brokered oil and other extracted products; gas and oil processing; capacity release; and interest and other income from financial services operations.

Electric Fuel, Purchased Energy and Purchased Gas — Deferred Costs

Where permitted by regulatory authorities, the differences between actual electric fuel, purchased energy and purchased gas expenses and the levels of recovery of such expenses in current rates are deferred and matched against recoveries in future rates. See *Regulatory Assets and Liabilities* below and Note 18.

Income Taxes

Dominion and its subsidiaries file a consolidated federal income tax return. Where permitted by regulatory authorities, the treatment of temporary differences can differ from the requirements of Statement of Financial Accounting Standards (SFAS) No. 109, *Accounting for Income Taxes*. Accordingly, a regulatory asset has been recognized if it is probable that future revenues will be provided for the payment of deferred tax liabilities. Deferred investment tax credits are amortized over the service lives of the properties giving rise to the credits.

Stock-based Compensation

Dominion measures compensation cost for stock-based awards issued to its employees in accordance with Accounting Principles Board Opinion No. 25, *Accounting for Stock Issued to Employees*, and related interpretations. Compensation expense is measured as the difference between fair market value of Dominion common stock and the exercise price of the underlying award on the date when both the price and number of shares the recipient is entitled to receive are known. This date is generally the date of grant. See Note 25.

Cash and Cash Equivalents

Current banking arrangements generally do not require checks to be funded until actually presented for payment. At December 31, 2001 and 2000, accounts payable included the net effect of checks outstanding but not yet presented for payment of \$214 million and \$171 million, respectively. For purposes of the consolidated statements of cash flows, Dominion considers cash and cash equivalents to include cash on hand, cash in banks and temporary investments purchased with a maturity of three months or less.

Property, Plant and Equipment

Property, plant and equipment, including additions and replacements, is recorded at original cost including labor, materials, other direct costs and capitalized interest. The costs of repairs and maintenance, including minor additions and replacements, are charged to expense as incurred. In 2001, 2000, and 1999, Dominion capitalized interest costs of \$41 million, \$30 million, and \$30 million, respectively.

The cost of depreciable gas utility and transmission and electric transmission and distribution property retired and related cost of removal, less salvage, are charged to accumulated depreciation. For generation-related property, cost of removal is charged to expense as incurred. Dominion records gains and losses upon retirement of generation-related property based upon the difference between proceeds received, if any, and the property's undepreciated basis at the retirement date.

Depreciation of property, plant, and equipment is computed on the straight-line method based on projected useful service lives or, in the case of gas and oil producing properties, the unit-of-production method. Estimated useful lives of Dominion's property, plant and equipment are as follows: generation 20–60 years, transmission 20–78 years, distribution 10–50 years, storage 20–78 years, and other 5–31 years. Amortization of nuclear fuel used in electric generation is provided on a unit-of-production basis sufficient to fully amortize, over the estimated service life, the cost of the fuel plus permanent storage and disposal costs. In 2001, Dominion increased its estimate of the useful lives of its nuclear facilities by 20 years. This change in estimate was made in connection with the current and future filing of applications for relicensing with the Nuclear Regulatory Commission (NRC).

Dominion follows the full cost method of accounting for gas and oil exploration and production activities prescribed by the SEC. Under the full cost method, all direct costs of property acquisition, exploration, and development activities are capitalized. The principal limitation is that these capitalized amounts may not exceed the present value of estimated future net revenues to be derived from the production of proved gas

and oil reserves (the ceiling test). If net capitalized costs exceed the ceiling test at the end of any quarterly period, then a permanent write-down of the assets must be recognized in that period. The ceiling test is performed separately for each cost center, with cost centers established on a country-by-country basis.

Depreciation of gas and oil producing properties is computed using the unit-of-production method. Under the full cost method of accounting, amortization is also accrued on estimated future costs to be incurred in developing proved gas and oil reserves, and on estimated dismantlement and abandonment costs net of projected salvage values. However, the costs of investments in unproved properties are excluded from amortization until it is determined whether proved reserves exist.

Impairment of Long-Lived Assets

Dominion performs an evaluation for impairment whenever events or changes in circumstances indicate that the carrying amount of long-lived assets or intangible assets, including goodwill, may not be recoverable. Long-lived assets are written down to fair value if the sum of the expected future undiscounted cash flows is less than the carrying amounts.

Investment Securities

Dominion accounts for and classifies investments in marketable equity and debt securities in two categories. Debt and equity securities purchased and held with the intent of selling them in the current period are classified as trading securities and are reported at fair value with unrealized gains and losses included in earnings. All other debt and equity securities are classified as available-for-sale securities. These are reported at fair value with unrealized gains and losses reported as a component of accumulated other comprehensive income, net of tax.

Loans Receivable, Net

Loans receivable are stated at their outstanding principal balance, net of the allowance for credit losses and any deferred fees or costs. Origination fees, net of certain direct origination costs, are deferred and recognized as an adjustment of the yield of the loan receivable. The allowance for credit losses is established through provisions for credit losses charged against income. Loans receivable deemed to be uncollectible are charged against the allowance for credit losses, and subsequent recoveries, if any, are credited to the allowance. At December 31, 2001 and 2000, the allowance for credit losses for loans receivable was \$79 and \$61 million, respectively.

Sale of Loans by Financial Services Businesses

Securitizations involve selling loans to an unconsolidated special purpose trust in exchange for cash and certain retained interests. Retained interests may include subordinated bonds

or other securities issued by the trust or interests in the loans sold. Cash proceeds are determined based on the difference between interest rates to be received on the loans sold and the interest rate to be paid to investors participating in the securitizations. The determination of cash proceeds is also affected by estimates of prepayments, credit losses, servicing costs, and non-refundable fees and premiums. Gains and losses realized on the sale of loans are recognized based on the difference between the carrying amount of the loans sold and the sum of the cash proceeds received and the fair value of interests retained in the securitization on the settlement date. Fair value is based on the present value of estimated cash flows, adjusted to reflect the effects of credit losses, prepayments and other factors appropriate in each securitization. Dominion securitized commercial loans receivable in collateralized loan obligation (CLO) and collateralized debt obligation (CDO) transactions. Retained interests in CLO and CDO transactions are reported as available for sale securities. In addition, Dominion securitized residential mortgage loans. Dominion classifies its retained interests from securitizations of mortgage loans as investment securities-trading.

Retained interests from the securitization of mortgage loans include interest-only strips which are recorded based on the net present value of projected cash flows, using management's best estimates of key assumptions. These assumptions include credit losses, prepayment speeds, forward yield curves, and discount rates commensurate with the risks involved. Interest-only strips are amortized in proportion to the estimated income received. They are analyzed quarterly to determine whether prepayment experience, losses and changes in the interest rate environment have had an impact on the valuation. Expected cash flows of the underlying loans sold are reviewed based upon current economic conditions and the type of loans originated and are revised as necessary. See Notes 8 and 13 for more information about Dominion's investments in retained interests, including the recognition of impairments in 2001 and 2000.

Derivatives

Dominion uses derivatives such as futures, swaps, forwards and options to manage the commodity, currency exchange and financial market risks of its business operations. Dominion also manages a portfolio of commodity contracts held for trading purposes as part of its strategy to market energy and to manage related risks. Effective January 1, 2001, upon adoption of SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities*, derivatives are generally recognized on the consolidated balance sheets at fair value. See Note 15 for further discussion of Dominion's use of derivatives and energy trading contracts, including its risk management policy, its accounting

policy for derivatives under SFAS No. 133 and the results of its hedging activities for the year ended December 31, 2001.

Prior to January 1, 2001, Dominion considered derivative instruments to be effective hedges when the item being hedged and the underlying financial or commodity instrument showed strong historical correlation. Dominion used deferral accounting to account for futures, forwards and other derivative instruments that were designated as hedges. Under this method, realized gains and losses (including the payment of any premium) related to effective hedges of existing assets and liabilities were recognized in earnings in conjunction with earnings of the designated asset or liability. Gains and losses related to effective hedges of firm commitments and anticipated transactions were included in the measurement of the subsequent transaction.

Goodwill, Net

Goodwill arising from acquisitions completed before July 1, 2001 was amortized on a straight-line basis over periods up to 40 years. As of December 31, 2001 and 2000, Dominion had amortized \$173 million and \$83 million of goodwill, respectively. In accordance with SFAS No. 142, *Goodwill and Other Intangible Assets*, Dominion has not amortized goodwill arising from acquisitions initiated after June 30, 2001 and will cease amortization of all goodwill effective January 1, 2002. See Note 4 for further discussion of the adoption of SFAS 142 effective January 1, 2002. See Note 5 for discussion of Dominion's acquisitions during 2001.

Regulatory Assets and Liabilities

Methods of allocating costs to accounting periods for operations subject to federal or state cost-of-service rate regulation may differ from accounting methods generally applied by nonregulated companies. The economic effects of allocations prescribed by regulatory authorities for rate-making purposes must be considered in the application of generally accepted accounting principles. See Notes 9 and 18 for the impact of legislation on continued application of SFAS No. 71, *Accounting for the Effects of Certain Types of Regulation*, and additional information on regulatory assets and liabilities.

Amortization of Debt Issuance Costs

Dominion defers and amortizes debt issuance costs and debt premiums or discounts over the lives of the respective debt issues. As permitted by regulatory commissions, gains or losses resulting from the refinancing of debt allocable to utility operations subject to cost-based regulation have also been deferred and amortized over the lives of the new issues.

Note 3 Accounting Change for Pension Costs

Effective January 1, 2000 and in connection with Dominion's acquisition of CNG, Dominion adopted a new company-wide method of calculating the market-related value of pension plan assets used to determine the expected return on pension plan assets, a component of net periodic pension cost. Dominion believes the new method enhances the predictability of the expected return on pension plan assets; provides consistent treatment of all investment gains and losses; and results in calculated market-related pension plan asset values that are closer to market value than the values calculated under the pre-acquisition methods used by Dominion and CNG.

The \$21 million cumulative effect of the change on prior years (net of income taxes of \$11 million) is included in income for the year ended December 31, 2000. The effect of the change on 2000 was to increase income before extraordinary item and cumulative effect of a change in accounting principle by \$11 million (\$0.05 per share-basic and diluted) and net income by \$32 million (\$0.14 per share-basic and diluted).

Retroactive application of the new method, on a pro forma basis, would not have materially changed Dominion's net income for 1999.

Note 4 Recently Issued Accounting Standards

Business Combinations and Goodwill

In 2001, the Financial Accounting Standards Board (FASB) issued SFAS Nos. 141, *Business Combinations*, and 142, *Goodwill and Other Intangible Assets*. SFAS No. 141 requires that the purchase method of accounting be used for all business combinations initiated after June 30, 2001. SFAS No. 141 also includes guidance on the initial recognition and measurement of goodwill and other intangible assets arising from business combinations initiated after June 30, 2001. SFAS No. 142 prohibits the amortization of goodwill and intangible assets with indefinite useful lives. SFAS No. 142 also requires that these assets be reviewed for impairment at least annually. Intangible assets with finite lives will continue to be amortized over their estimated useful lives.

Dominion will adopt SFAS No. 142 effective January 1, 2002. The discontinuance of goodwill amortization under SFAS No. 142 is expected to result in an increase in net income of \$95 million in 2002. Dominion will test goodwill for impairment using an annual two-step process described in SFAS No. 142. The first step is a screen for potential impairment, while the second step measures the amount of the impairment, if any. Dominion will perform the first step of the required impairment tests of goodwill as of January 1, 2002 before the end of the second quarter of 2002. The standard requires that if impairment

were determined to exist under that test, it would be reflected as the cumulative effect of a change in accounting principle. Dominion has not yet determined the effect these tests may have on its earnings or financial position.

Asset Retirement Obligations

In 2001, FASB issued SFAS No. 143, *Accounting for Asset Retirement Obligations*, which provides accounting requirements for the recognition and measurement of liabilities associated with the retirement of tangible long-lived assets. Under the standard, these liabilities will be recognized at fair value as incurred and capitalized as part of the cost of the related tangible long-lived assets. Accretion of the liabilities due to the passage of time will be an operating expense. Dominion will adopt the standard effective January 1, 2003.

Dominion has identified retirement obligations associated with the decommissioning of its nuclear generation facilities and certain dismantlement and restoration activities for its gas and oil wells. However, Dominion has not yet performed a complete assessment of possible retirement obligations associated with other electric and gas utility property. Dominion has not yet determined the financial impact of adopting the new standard.

Also, under the new standard, the realized and unrealized earnings of external trusts available for funding decommissioning activities at Dominion's utility nuclear plants will be recorded in other income and other comprehensive income, as appropriate. Currently, Dominion records these trusts' earnings in other income with an offsetting charge to expense, also recorded in other income, associated with the accretion of the decommissioning liability. See Note 16. Upon adoption of the new standard, Dominion will discontinue its practice of accruing, as part of depreciation expense, amounts associated with the future costs of removal for its gas and electric utility and gas and oil exploration and production assets. However, Dominion may continue its practice of accruing for such costs subject to cost-of-service utility rate regulation even when an asset removal obligation does not exist but would do so through the recognition of regulatory assets and liabilities, as appropriate.

Impairment or Disposal of Long-Lived Assets

In 2001, FASB issued SFAS No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*, which provides guidance that will eliminate inconsistencies in accounting for the impairment or disposal of long-lived assets under existing accounting pronouncements. Dominion will apply the provisions of this standard prospectively beginning January 1, 2002 and does not expect the adoption to have a material impact on its results of operations or financial condition.

Note 5 Acquisitions**Louis Dreyfus Natural Gas Corp. (Louis Dreyfus)**

On November 1, 2001, Dominion acquired all of the outstanding shares of common stock of Louis Dreyfus, a natural gas and oil exploration and production company headquartered in Oklahoma City, Oklahoma. The results of Louis Dreyfus have been included in the consolidated financial statements since that date. Dominion's proven gas and oil reserves increased approximately 60 percent as a result of the acquisition of Louis Dreyfus.

Dominion recognized goodwill in the acquisition to reflect the value attributable to: the complementary nature of the Louis Dreyfus assets in relation to Dominion's growth strategy for its integrated energy businesses; Louis Dreyfus' experienced exploration and production technical personnel; and potential operational efficiencies from the consolidation of Louis Dreyfus' operations with Dominion's existing exploration and production operations. By providing Dominion with a presence in additional large natural gas basins and increasing its holdings in certain basins in which it already operates, management believes that the acquisition results in a more balanced portfolio of producing properties, a more stable production profile and a larger platform for future growth. Dominion has not yet completed the assignment of goodwill associated with the Louis Dreyfus acquisition to its operating segments. In addition, the goodwill is not deductible for income tax purposes.

The aggregate purchase price was \$1.8 billion, which consisted of approximately 14 million shares of Dominion common stock valued at \$881 million and \$902 million in cash. The value of the common stock issued was determined based on the average market price of common shares over the two-day period before and after the terms of the acquisition were agreed to and announced. In addition, Dominion issued approximately 675,000 stock options to employees of Louis Dreyfus in exchange for outstanding Louis Dreyfus options with a fair value on the date of grant of approximately \$13 million.

The following table summarizes the estimated fair values of the assets acquired and liabilities assumed at the date of acquisition.

(millions)	At November 1, 2001				
Current assets	\$	89	Current liabilities	\$	167
Property, plant and equipment		2,387	Long-term debt		1,426*
Deferred charges and other assets		43	Deferred credits and other liabilities		551
Goodwill		519	Total liabilities assumed		2,144
Total Assets		\$3,038	Net assets acquired		\$ 894

*Long-term debt includes approximately \$1.1 billion of debt issued by CNG and preferred securities issued through an affiliated trust to finance the cash portion of the acquisition and refinance certain Louis Dreyfus debt.

Dominion is in the process of evaluating and measuring certain liabilities assumed in the acquisition; thus, the allocation of the purchase price is subject to refinement. Potential adjustments are not expected to be material. In accordance with SFAS No. 142, no goodwill amortization was recorded during 2001. See Note 4.

Millstone Power Station

On March 31, 2001, Dominion acquired Millstone Power Station (Millstone), a nuclear power station located in Waterford, Connecticut and accounted for the acquisition under the purchase method of accounting. The results of Millstone have been included in the consolidated financial statements since that date. The acquisition includes a 100% ownership interest in Unit 1 and Unit 2 and a 93.47% ownership interest in Unit 3 for a total of 1,954 megawatts of generating capacity. Unit 1 is being decommissioned and is no longer in service. Dominion acquired the decommissioning trusts for the three units that were fully funded to the regulatory minimum at closing. See Note 16.

The aggregate purchase price was \$1.3 billion in cash; representing approximately \$1.2 billion for plant assets and \$105 million for nuclear fuel. Dominion recorded \$302 million of goodwill representing the excess of the purchase price over amounts allocated to Millstone's assets acquired and liabilities assumed. Through December 31, 2001, Dominion amortized \$6 million of goodwill based on the straight-line method and 40 years. See Note 4.

CNG

On January 28, 2000, Dominion acquired all of the outstanding shares of CNG and accounted for the acquisition under the purchase method of accounting. The results of CNG have been included in the consolidated financial statements since that date.

The aggregate purchase price was \$6.4 billion, consisting of approximately 87 million shares of Dominion common stock valued at \$3.5 billion and approximately \$2.9 billion in cash. Dominion recorded \$3.5 billion of goodwill representing the excess of the purchase price over the fair value of CNG's operations not subject to cost-based rate regulation and the historical carrying value of CNG's operations subject to cost-of-service rate regulation. Through December 31, 2001, Dominion amortized \$165 million of goodwill based on the straight-line method and 40 years. See Note 4.

The initial purchase price allocation included estimated values for amounts expected to be realized from the sale of Virginia Natural Gas (VNG) and CNG International, which

were classified as net assets held for sale. Dominion sold VNG and CNG International's Argentine investments in 2000. See Note 6. At December 31, 2001 the unsold portion of CNG International included primarily its equity investment in Australian energy activities.

Unaudited Pro Forma Results

The following unaudited pro forma combined results of operations for the years ended December 31, 2001 and 2000 have been prepared assuming the acquisition of Millstone and Louis Dreyfus had occurred at the beginning of each period. The pro forma adjustment for Millstone in 2001 reflects the effect of scheduled outages during the first quarter of 2001. The pro forma results are provided for information only. The results are not necessarily indicative of the actual results that would have been realized had the acquisition occurred on the indicated date, nor are they necessarily indicative of future results of operations of the combined businesses.

		Unaudited		
	As Reported	Millstone Acquisition	Louis Dreyfus Acquisition	Pro Forma Combined Results
(Millions, except per share amounts) Year ended December 31,				
2001				
Operating revenue	\$10,558	\$ 85	\$554	\$11,197

Note 6 Divestitures

As of December 31, 2001, Dominion had substantially completed its strategy to exit the core operating businesses of DCI as required by the SEC under the 1935 Act. See Note 8 for charges recognized in connection with the DCI exit strategies. In 2000, Dominion sold \$600 million of commercial loans and transferred \$223 million of outstanding commercial loan commitments. As discussed in Note 13, Dominion securitized a substantial portion of the remainder of its financial subsidiaries' commercial loans in CLO and CDO transactions in 2000 and 2001. As of December 31, 2001, Dominion held commercial and other loans receivable of \$106 million, net of allowances for loan losses, and \$268 million of CLO and CDO-related retained interests. At December 31, 2000, Dominion held CLO and CDO-related retained interests of \$159 million.

In 2001, Dominion sold Saxon Capital and recognized an after-tax loss of \$25 million. Under the terms of the sale, Dominion received \$116 million in cash, a \$25 million note and a non-controlling equity interest that was subsequently sold for \$25 million. In addition, Dominion retained approximately \$300 million in retained interests related to prior mortgage loan securitizations. Dominion held \$269 million and \$347 million of retained interests from mortgage loan securitizations at December 31, 2001 and 2000, respectively.

In 2000, Dominion completed the sales of VNG and CNG International's Argentine assets for \$678 million. As these entities were classified as net assets held for sale, the sales did not result in any gain or loss. Also in 2000, Dominion completed the sale of its interest in Corby Power Limited for \$78 million, resulting in an after-tax gain of \$13 million.

During 1999 and 2000, Dominion sold its interests in generation capacity located in Latin America for \$405 million. Dominion recognized an impairment loss of \$21 million, after taxes, associated with these investments in 1999.

Note 7 Restructuring and Acquisition-Related Activities**2001 Restructuring Costs**

In the fourth quarter of 2001, after completing the transition period for fully integrating Dominion's existing organization and operations, management initiated a focused review of Dominion's combined operations. The objective of this review was to identify any activities or resources which were no longer

necessary when the post-CNG acquisition transition period had ended. As a result, Dominion recognized \$105 million of restructuring costs which included employee severance and termination benefits and the abandonment of leased office space no longer needed. In addition, restructuring charges included approximately \$46 million related to departing employees for modifications of stock options, special termination benefits and losses related to the settlement of the related nonqualified pension obligation and plan curtailment attributable to reductions in expected future years of service of plan participants. See Notes 25 and 26.

Under the restructuring plan, Dominion identified approximately 340 salaried positions to be eliminated and recorded \$42 million in employee severance-related costs. As of December 31, 2001, 12 positions had been eliminated. Severance payments were based on the individual's base salary and years of service at the time of termination.

Restructuring and related costs for the year ended December 31, 2001 were as follows:

(millions)	
Severance and related costs	\$ 42
Nonqualified plan benefits, settlement and other costs	46
Lease termination and restructuring	13
Other, net	4
Total restructuring costs	105
Severance liability at December 31, 2001 ⁽¹⁾	42
Lease termination liability at December 31, 2001	\$ 10

(1) Amount paid during the fourth quarter of 2001 was not material.

2000 Restructuring and Acquisition-Related Activities

During 2000, Dominion incurred charges associated with the divestiture of certain businesses and the implementation of a restructuring plan for the operations of Dominion and its subsidiaries. The divestitures and restructuring plans were driven by certain requirements associated with the CNG acquisition and a focus on operations in the region that begins at the Mid-America Interconnected Network (MAIN) and extends north-eastward through Maine (MAIN-to-Maine). The restructuring plan included an involuntary severance program, a voluntary early retirement program (ERP) and a transition plan to consolidate operations after the CNG acquisition.

For the year ended December 31, 2000, Dominion recorded \$460 million of restructuring and acquisition-related costs, including exiting certain businesses of DCI, as follows:

(millions)	
Severance and related costs	\$ 70
Commodity contract losses	55
Information technology related costs	35
Lease termination and restructuring	14
DCI exit strategies (see Note 8)	172
ERP benefit costs (see Note 26)	114
Curtailment gains (see Note 26)	(26)
Other, net	26
Total	\$460

At December 31, 2001, the remaining severance liability of \$3 million represented amounts payable to employees terminated under Dominion's 2000 restructuring plan. The change in the liability for severance and related benefit costs is presented below:

(millions)	
Balance at December 31, 2000	\$ 29
Amounts paid	(24)
Revision of estimates	(2)
Balance at December 31, 2001	\$ 3

Employee Severance Programs—Through December 31, 2001, 750 salaried positions had been eliminated and \$65 million of severance benefits had been paid. Severance payments were based on the individual's base salary and years-of-service at the time of termination. In addition, severance payments were provided to employees at DCI who were terminated as part of Dominion's strategy to exit certain businesses of DCI.

Change in Risk Management Strategy—During the first quarter of 2000, Dominion created an enterprise risk management group with responsibility for managing Dominion's aggregate energy portfolio, including the related commodity price risk, across its consolidated operations. In connection with this change in risk management strategy, management evaluated CNG's hedging strategy in relation to Dominion's combined operations and designated CNG's portfolio of derivative contracts that existed on January 28, 2000, as held for purposes other than hedging for accounting purposes. This action required a change to mark-to-market accounting and resulted in \$55 million of losses recognized in the first quarter of 2000 before Dominion had either financially settled the contracts or had entered into offsetting contracts.

Other—Restructuring and other acquisition-related costs included amounts paid to employees to retain their services during the post-acquisition transition period, amounts payable under certain employee contracts and information technology

systems and operations integration costs. The information technology costs included excess amortization expense attributable to shortening the useful lives of capitalized software being impacted by systems integration and related conversion costs. Dominion also incurred lease termination and restructuring costs as a result of the consolidation of operations.

Note 8 Impairment Losses — DCI Operations

In 2001, Dominion recognized impairment losses of \$281 million on various investments at DCI and reported the losses in other operations and maintenance expenses. These charges, after-tax, reduced 2001 net income by \$183 million. In 2000, Dominion recognized impairment losses of \$291 million, of which \$172 million was determined to be attributable to Dominion's DCI exit strategy and were included in restructuring and other acquisition-related costs. The remaining \$119 million of impairment charges were related to normal operations of DCI and are included in other operations and maintenance expenses. See Notes 6, 7, and 13. These charges, after-tax, reduced 2000 net income by \$186 million for 2000. The 2001 and 2000 impairments are reflected in the Corporate and Other operating segment. See Note 30.

The table below presents a summary of the impairments losses recorded in 2001 and 2000:

(millions)	2001	2000
Investment in:		
Retained interests—mortgage securitizations	\$ 21	\$106
Retained interests—CLO/CDO securitizations	81	—
Loans receivable	94	36
Venture capital and other equity investments	64	46
Investment in First Source	—	49
Real-estate projects and other	21	54
Total	\$281	\$291

Retained Interests — Mortgage, CLO and CDO Securitizations

As part of routine quarterly reviews of its retained interests in mortgage, CLO and CDO securitizations during the fourth quarter of 2001, Dominion considered the following: historical performance of its securitized pools; recent prepayment and credit loss experience of loans in those pools; other industry data; and economic factors prevailing in the U.S. economy, particularly conditions brought about by the September 11, 2001 events and the mortgage interest rate environment at that time. In light of recent actual credit loss experience and actual prepayment activity of certain mortgage and commercial loans in the securitization trusts, Dominion increased its credit loss and prepayment speed assumptions used to estimate the fair value of its retained interests in mortgage, CLO and CDO securitizations. With these changes in

estimates, Dominion recognized a write-down of the carrying values of its retained interests in mortgage and CLO/CDO securitizations of \$21 million and \$81 million, respectively, during the fourth quarter of 2001. See Note 13 for significant credit loss, prepayment and discount rate assumptions.

Loans and Other Investments

The other impairments and loss provisions reflect Dominion's current estimate of net realizable values considering the dramatically weakened economy and increasing instances of bankruptcies, defaults, and major restructurings that significantly diminished investment values in the fourth quarter of 2001. Dominion's valuation methodologies and assumptions vary by investment and include cash flow analysis, signed contracts, independent third-party appraisals, and, in certain cases, liquidation value.

Note 9 Extraordinary Item

In 1999, legislation was passed that established a detailed plan to restructure the electric utility industry in Virginia. The legislation's deregulation of generation was an event that required discontinuation of SFAS No. 71 for Dominion's generation operations in 1999. Dominion's transmission and distribution operations continue to meet the criteria for recognition of regulatory assets and liabilities as defined by SFAS No. 71. In addition, the cost of fuel used in electric generation continues to be subject to deferral accounting.

In order to measure the amount of regulatory assets to be written off upon discontinuance of SFAS No. 71, Dominion evaluated the estimated recovery of regulatory assets through its Virginia jurisdictional rates during the transition period ending July 2007. Generation-related assets and liabilities that will not be recovered through the transition period rates were written off in 1999, resulting in an after-tax charge to earnings of \$255 million. See Note 18 for discussion of net regulatory assets at December 31, 2001. The \$255 million charge also included the write-off of approximately \$38 million, after-tax, of deferred investment tax credits and approximately \$18 million, after-tax, of other generation-related assets. A corresponding regulatory asset of \$23 million was established representing the amount expected to be recovered during the transition period related to these assets.

The events that caused the discontinuance of SFAS No. 71 for generation-related operations, also required a review of generation assets for impairment. This review was based on estimates of possible future market prices, load growth, competition and other assumptions. It also included the effects

of nuclear decommissioning and other currently identified environmental expenditures. Based on those analyses, no plant write-downs were appropriate at that time.

Dominion also reviewed its long-term power purchase contracts for potential loss in accordance with SFAS No. 5, *Accounting for Contingencies*, and Accounting Research Bulletin No. 43, Chapter 4, *Inventory Pricing*. Based on projections of possible future market prices for wholesale electricity as of March 31, 1999, the results of the analysis indicated no loss recognition was appropriate at that time. Other projections of possible future market prices indicated a possible loss of \$500 million. In the absence of the transition period rates provided by the legislation, the potential loss exposure would have been approximately \$3.2 billion at March 31, 1999.

Significant estimates were required in recording the effect of the deregulation legislation, including the resulting impact on the fair value determination of generating facilities and estimated purchases under long-term power purchase contracts. Such projections were highly dependent on future customer load projections, generating unit availability, the timing and type of future capacity additions in Dominion's market area and future market prices for fuel and electricity.

Note 10 Income Taxes

Income before provision for income taxes, classified by source of income, before minority interests, was as follows:

(millions) Year ended December 31,	2001	2000	1999
U.S.	\$816	\$552	\$797
Non-U.S.	98	48	32
Total	\$914	\$600	\$829

Details of income tax expense were as follows:

(millions) Year ended December 31,	2001	2000	1999
Current			
Federal	\$104	\$ 255	\$187
State	62	20	18
Non-U.S.	3	—	4
Total current	169	275	209
Deferred			
Federal	151	(111)	66
State	24	16	—
Non-U.S.	45	22	(1)
Total deferred	220	(73)	65
Amortization of deferred investment tax credits—net	(19)	(19)	(15)
Total income tax expense	\$370	\$ 183	\$259

The statutory U.S. federal income tax rate reconciles to the effective income tax rates as follows:

Year ended December 31,	2001 ⁽¹⁾	2000	1999
U.S. statutory rate	35.0%	35.0%	35.0%
Increases (reductions) resulting from:			
Utility plant differences	0.5	0.8	0.3
Preferred dividends	0.9	2.1	1.6
Amortization of investment tax credits	(1.7)	(2.3)	(1.8)
Nonconventional fuel credit	(4.6)	(7.1)	(4.4)
Other benefits and taxes related to foreign operations	3.0	(2.7)	(0.2)
State taxes, net of federal benefit	5.9	4.3	1.5
Goodwill amortization	3.3	4.4	—
Employee pension and other benefits	(1.4)	(1.4)	—
Other, net	(0.5)	(2.6)	(0.8)
Effective tax rate	40.4%	30.5%	31.2%

(1) Dominion's effective income tax rate increased in 2001 due to its utility operations in Virginia becoming subject to state income taxes in lieu of gross receipts taxes, higher effective rates associated with foreign earnings and higher pretax income in relation to nonconventional fuel tax credits realized.

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amount of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. Dominion's net deferred taxes consist of the following:

(millions) At December 31,	2001	2000
Deferred income tax assets:		
Deferred investment tax credits	\$ 43	\$ 55
Other	122	231
Total deferred income tax assets	165	286
Deferred income tax liabilities:		
Depreciation method and plant basis differences	1,911	1,994
Income taxes recoverable through future rates	19	20
Partnership basis differences	113	141
Investee earnings reported in different tax periods	143	—
Postretirement and pension benefits	464	481
Intangible drilling costs	520	269
Geological, geophysical and other exploration differences	170	157
Deferred state income taxes	221	37
Other comprehensive income	182	—
Other	113	—
Total deferred income tax liabilities	3,856	3,099
Total net deferred income tax liabilities ⁽¹⁾	\$3,691	\$2,813

(1) For 2001, includes \$121 million of current deferred tax assets reported in other current assets.

At December 31, 2001, Dominion had U.S. federal net operating loss carryforwards of \$139 million that will expire beginning in 2003. These amounts resulted from the acquisition of subsidiaries. Dominion also has net operating loss carryforwards for state income tax purposes which have been reserved.

Note 11 Earnings Per Share

The following table presents Dominion's basic and diluted earnings per share (EPS) calculation:

Year Ended December 31,	2001	2000	1999
(millions, except per share amounts)			
Basic			
Income before extraordinary item and cumulative effect of a change in accounting principle	\$ 544	\$ 415	\$ 552
Average shares of common stock outstanding—basic	250.2	235.2	191.4
Basic EPS	\$2.17	\$1.76	\$2.88
Diluted			
Income before extraordinary item and cumulative effect of a change in accounting principle	\$ 544	\$ 415	\$ 552
Income effect of total return equity swap, net of taxes	—	—	(12)
Income before extraordinary item and cumulative effect of a change in accounting principle—diluted	\$544	\$ 415	\$ 540
Average shares of common stock outstanding	250.2	235.2	191.4
Net effect of dilutive stock options	2.3	0.7	—
Average shares of common stock outstanding—diluted	252.5	235.9	191.4
Diluted EPS	\$2.15	\$1.76	\$2.81
Average anti-dilutive shares excluded from the EPS calculation	6	5	—

Note 12 Gas Stored

At December 31, 2001 and 2000, stored gas inventory used in local gas distribution operations was valued at \$84 million and \$41 million, respectively, under the LIFO method. Based on the average price of gas purchased during 2001, the current cost of replacing the inventory of gas stored—current portion exceeded the amount stated on a LIFO basis by approximately \$308 million. At December 31, 2001 and 2000, the stored gas inventory of certain of Dominion's nonregulated gas operations was valued at \$98 million and \$34 million, respectively, using primarily the weighted average cost method.

A portion of gas in underground storage used as a pressure base and for operational balancing was included in property, plant and equipment in the amount of \$124 million and \$126 million at December 31, 2001 and 2000, respectively. Property, plant and equipment also reflects a reduction for volumes temporarily withdrawn from storage and valued at replacement costs of \$25 million and \$211 million as of December 31, 2001 and 2000, respectively.

Note 13 Securitization of Financial Assets**Securitization of Commercial Loans**

During 2001 and 2000, Dominion sold commercial loans in CLO and CDO-related securitization transactions. In those transactions, Dominion retained servicing responsibilities and interests which are subordinate to those of investors participating in the securitizations. The investors and the securitization trusts have no recourse to Dominion's other assets for failure of debtors to pay when due. The majority of the loans sold are variable rate loans. As a result, changes in interest rates will not cause a material change in the performance of the loan portfolios. Dominion receives annual servicing fees and rights to future cash flows after the investors in the securitization trusts have received their contracted return. The estimated fair value of Dominion's retained interests at the time of the 2001 securitization was based on expected cash flow recoveries from the loan portfolios, assuming a credit loss rate of 2 percent, and a discount rate of 10 percent. The following table summarizes key information about the securitizations of commercial loans during 2001 and 2000:

(millions)	Loans Securitized	Cash Proceeds	Retained Interests	Annual Servicing Fees
2001	\$423	\$227	\$196	38 basis points of the outstanding balance
2000	\$646	\$570	\$76	38 basis points of the outstanding balance

Securitization of Residential Mortgages

During 2001, 2000 and 1999, Dominion sold residential mortgage loans in securitization transactions. In each of those securitizations, Dominion retained servicing responsibilities and interests in the mortgage loans sold which are subordinate to the interests of investors participating in the securitizations. The investors and the securitization trusts have no recourse to Dominion's other assets for failure of debtors to pay when due. Dominion's retained interests in mortgage securitizations were based on rights to annual servicing fees approximating 50 basis points of the outstanding balance and rights to future cash flows

from the performance of the loan portfolios after the investors in the securitization trust have received their contracted return. In addition, Dominion continues to receive future cash flows from prepayment penalties on mortgage loans that prepay during the contractual penalty period. The value of the retained interests is subject to credit, prepayment and interest rate risks related to the mortgage loans sold. In 2001, 2000 and 1999, Dominion recognized pretax gains of \$21 million, \$85 million and \$107 million, respectively, on the securitization of residential mortgage loans.

The following table presents weighted-average rates (per annum) for key economic assumptions used in measuring the retained interests from securitizations completed during 2001:

	Retained Interests— Mortgage Loans ⁽¹⁾	Retained Interests— CLO
Prepayment speed	⁽²⁾	N/A
Weighted-average life (in years)	3.28	2.2
Expected credit losses	3.22%	2%
Residual cash flows discounted at	17%	10%

(1) Dominion sold all of its servicing rights as part of its sale of Saxon Mortgage in 2001.

(2) Fixed rate loans ramp up to 26.25 Constant Prepayment Rate (CPR) over 16 months.

Adjustable rate loans ramp up to 67.275 CPR over 16 months, ramping down to 41.4 CPR over 12 months. Second liens ramp up to 36.75 CPR over 16 months, ramping down to 23.1 CPR over 26 months. Two-year hybrid loans ramp up to 33.12 CPR over 14 months; ramping up to 67.275 CPR in month 25; ramping up to 32.085 CPR over 7 months. Three-year hybrid loans ramp up to 33.12 CPR over 14 months; ramping up to 62.1 CPR in month 37; ramping down to 32.085 CPR over 7 months.

As a result of an acceleration of prepayments and loan defaults, Dominion recognized a loss of \$21 million in the fourth quarter of 2001 on its retained interests from securitizations of mortgage loans. During the first half of 2000, in response to changes in market conditions, Dominion increased the discount rate used to value the interest-only strips included in its retained interests from 12 percent to 17 percent, and recognized a loss of \$106 million. In connection with the DCI exit strategy, Dominion reclassified its retained interests from securitizations of mortgage loans from available-for-sale to trading.

Activity for the retained interests from securitizations of mortgage loans, including interest-only strips and servicing rights, and the CLO and CDO retained interests is summarized as follows:

(millions)	Interest-Only Strips— Mortgage Loans ⁽¹⁾	Servicing Rights— Mortgage Loans	Retained Interest— CLO	Retained Interest— CDO
Balance at January 1, 1999	\$ 282	\$ 35	—	\$ 24
Retained from securitization	169	16	—	34
Amortization	(7)	(12)	—	—
Cash received	(79)	—	—	—
Fair value adjustment	(18)	—	—	—
Balance at December 31, 1999	347	39	—	58
Retained from securitization	99	18	\$ 76	30
Amortization	(16)	(7)	—	—
Cash received	(51)	—	—	(4)
Gain on trading securities	25	—	—	—
Fair value adjustment	(102)	(5)	—	(1)
Balance at December 31, 2000	302	45	76	83
Retained from securitization	33	—	196	—
Amortization	(9)	—	—	—
Cash received	(55)	—	—	(6)
Gain on trading securities	19	—	—	—
Servicing rights sold ⁽²⁾	—	(45)	—	—
Fair value adjustment	(21)	—	(67)	(14)
Balance at December 31, 2001	\$ 269	\$ —	\$ 205	\$ 63

(1) Includes prepayment penalties.

(2) Dominion sold all of its servicing rights as part of its sale of Saxon Mortgage in 2001.

Presented below are the fair values of Dominion's retained interests and related key economic assumptions as of December 31, 2001 and the sensitivity of the retained interests' fair value to adverse changes of 10 percent and 20 percent in those assumptions:

(millions, except percentages)	Retained Interest— Mortgage Loans	Retained Interest— CLO	Retained Interest— CDO
Carrying amount/fair value	\$261	\$205	\$63
Weighted-average life (in years)	2.69	2.2	3.8
Prepayment speed assumption (annual rate)	(1)	N/A	N/A
Impact on fair value of 10% adverse change	\$ (15)	N/A	N/A
Impact on fair value of 20% adverse change	\$ (30)	N/A	N/A
Expected credit losses (annual rate)	3.32%	4% ⁽²⁾	2% ⁽³⁾
Impact on fair value of 10% adverse change	\$ (8)	\$ (7)	\$ (1)
Impact on fair value of 20% adverse change	\$ (15)	\$ (11)	\$ (3)
Residual cash flows discount rate (annual)	17%	10%	16.9%
Impact on fair value of 10% adverse change	\$ (6)	\$ (12)	\$ (2)
Impact on fair value of 20% adverse change	\$ (15)	\$ (17)	\$ (4)
Interest rates on variable and adjustable contracts	(4)	N/A	N/A
Impact on fair value of 10% adverse change	—	N/A	N/A
Impact on fair value of 20% adverse change	\$ (3)	N/A	N/A

(1) Fixed rate loans ramp up to 25 CPR over 16 months. Adjustable rate loans ramp up to 65 CPR over 16 months, ramping down to 40 CPR over 12 months. Second liens ramp up to 35 CPR over 16 months, ramping down to 22 CPR over 26 months. Two-year hybrid loans ramp up to 32 CPR over 14 months; ramping up to 65 CPR in month 25; ramping to 31 CPR over 7 months. Three-year hybrid loans ramp up to 32 CPR over 14 months; ramping up to 60 CPR in month 37; ramping down to 31 CPR over 7 months.

(2) Defaults occur at the beginning of each period. They are applied on constant percentage to the period's beginning collateral balance.

(3) Assets rated Caa1 and lower are defaulted using a CDR vector based upon Moody's Cumulative Default Rates for Caa1-C securities. A 2 percent per annum CDR is applied to remaining assets with ongoing recoveries of 40 percent and 80 percent on bonds and loans, respectively.

(4) Based on the full forward 1-month LIBOR, 6-month LIBOR or 1-year CMT through January 1, 2005 based on the variable component of the variable rate contracts.

These sensitivities are hypothetical. Changes in fair value based on a 10 percent variation in assumptions generally cannot be extrapolated because the relationship of the change in assumption to the change in fair value may not be linear. Also, the effect of a variation in a particular assumption on the fair value of the retained interests was calculated without changing any other assumption. In reality, changes in one factor may result in changes in another factor which might magnify or

counteract the sensitivities. For example, increases in market interest rates may result in lower prepayments and increased credit losses.

Note 14 Investment Securities

Dominion holds marketable debt and equity securities classified as available-for-sale. Those investments are reported as available-for-sale securities on the consolidated balance sheets. In addition, the Millstone nuclear decommissioning trust funds holds marketable debt and equity securities classified as available-for-sale. See Note 16 for additional disclosure of Dominion's accounting for the Millstone decommissioning trusts. Available-for-sale securities as of December 31, 2001 and 2000 are summarized below:

(millions)	Fair Value	Total Unrealized Gains Included in AOCI	Total Unrealized Losses Included in AOCI
2001			
Equity securities	\$ 551	\$11	\$ 4
Debt securities	684	1	16
Total	\$1,235	\$12	\$20
2000			
Equity securities	\$ 118	\$ 1	\$15
Debt securities	174	—	1
Total	\$ 292	\$ 1	\$16

Debt securities backed by mortgages and loans do not have stated contractual maturities as borrowers have the right to call or repay obligations with or without call or prepayment penalties. At December 31, 2001, these debt securities totaled \$277 million. The fair value of all other debt securities at December 31, 2001 by contractual maturity are as follows:

(millions)	
Due in one year or less	\$ 52
Due after one year through five years	81
Due after five years through ten years	119
Due after ten years	155
Total	\$407

Proceeds from sales of available-for-sale securities were \$484 million, \$3 million and \$35 million for 2001, 2000, and 1999 respectively. Realized gains associated with sales of available-for-sale securities totaled \$18 million, \$1 million and \$5 million for 2001, 2000 and 1999, respectively. Realized losses on those sales totaled \$4 million, \$6 million, and \$1 million for 2001, 2000 and 1999, respectively. The increase in proceeds and realized gains relates primarily to activity in the Millstone nuclear decommissioning trusts. The cost of these securities was

determined on a specific identification basis. For 2001, 2000 and 1999, net unrealized holding gains on trading securities increased earnings by \$21 million, \$6 million and \$1 million, respectively. Net unrealized holding gains for 2000 included a \$14 million loss relating to the reclassification of certain available-for-sale securities to the trading category.

Note 15 Derivatives, Hedge Accounting and Energy Trading Activities

Adoption of SFAS No. 133

Dominion adopted SFAS No. 133 on January 1, 2001 and recorded an after-tax charge to accumulated other comprehensive income (AOCI) of \$183 million, net of taxes of \$106 million. Dominion reclassified approximately \$183 million, net of taxes, of AOCI associated with the January 1, 2001 transition adjustment to earnings during 2001. The effect of the amounts reclassified from AOCI to earnings was generally offset by the recognition of the hedged transactions (e.g., anticipated sales) in earnings, thereby achieving the realization of prices contemplated by the underlying risk management strategies.

Risk Management Policy

Dominion uses derivatives to manage the commodity and financial market risks of its business operations. Dominion manages the price risk associated with purchases and sales of electricity, natural gas and oil by using derivative commodity instruments including futures, forwards, swaps and options. Dominion manages the foreign exchange risk associated with anticipated future purchases denominated in foreign currencies through currency forward contracts. Dominion also manages its interest rate risk exposure, in part, by entering into interest rate swap transactions.

As part of its strategy to market energy and to manage related risks, Dominion manages a portfolio of derivative commodity contracts held for trading purposes. These contracts are sensitive to changes in the prices of natural gas and electricity. Dominion uses established policies and procedures to manage the risks associated with these price fluctuations and uses various commodity instruments, such as futures, swaps and options, to reduce risk by creating offsetting market positions. Dominion has operating procedures in place that are administered by experienced management to help ensure that proper internal controls are maintained regarding the use of derivatives. In addition, Dominion has established an independent function to monitor compliance with the price risk management policies of all subsidiaries.

Dominion designates a substantial portion of derivatives held for purposes other than trading as fair value or cash flow hedges. A significant portion of Dominion's hedge strategies represents cash flow hedges of the variable price risk associated with the purchase and sale of electricity, natural gas, oil and other commodities. Dominion also uses cash flow hedge strategies to hedge the variability in foreign exchange rates and variable interest rates on long-term debt. In its cash flow hedges, Dominion uses the derivative instruments discussed in the preceding paragraphs. Dominion also engages in fair value hedges by using natural gas swaps, futures and options to mitigate the fixed price exposure inherent in its firm commodity commitments. In addition, Dominion has designated interest rate swaps as fair value hedges to manage its exposure to fixed interest rates on certain long-term debt. Certain non-trading derivative instruments are not designated as hedges for accounting purposes. However, management believes these instruments represent economic hedges that mitigate exposure to fluctuations in commodity prices and interest rates.

Accounting Policy

Under SFAS No. 133, derivatives are recognized on the consolidated balance sheets at fair value, unless an exception is available under the standard. Commodity contracts representing unrealized gain positions are reported as derivative and energy trading assets; commodity contracts representing unrealized losses are reported as derivative and energy trading liabilities. In addition, purchased options and options sold are reported as derivative and energy trading assets and derivative and energy trading liabilities, respectively, at estimated market value until exercise or expiration.

For all derivatives designated as hedges, Dominion formally documents the relationship between the hedging instrument and the hedged item, as well as the risk management objective and strategy for using the hedging instrument. Dominion assesses whether the hedge relationship between the derivative and the hedged item is highly effective in offsetting changes in fair value or cash flows both at the inception of the hedge and on an ongoing basis. Any change in fair value of the derivative that is not effective in offsetting changes in the fair value of the hedged item is recognized currently in earnings. Further, for derivatives that have ceased to be highly effective hedges, Dominion discontinues hedge accounting prospectively.

For fair value hedge transactions in which Dominion is hedging changes in the fair value of an asset, liability, or firm commitment, changes in the fair value of the derivative will generally be offset in the consolidated statements of income by changes in the hedged item's fair value. For cash flow hedge transactions in which Dominion is hedging the

variability of cash flows related to a variable-priced asset, liability, commitment, or forecasted transaction, changes in the fair value of the derivative are reported in AOCI. Derivative gains and losses reported in AOCI are reclassified as earnings in the periods in which earnings are impacted by the variability of the cash flows of the hedged item. The ineffective portion of the change in fair value of derivatives and the change in fair value of derivatives not designated as hedges for accounting purposes are recognized in current period earnings. For foreign currency forward contracts designated as cash flow hedges, hedge effectiveness is measured based on changes in the fair value of the contract attributable to changes in the forward exchange rate. For options designated either as fair value or cash flow hedges, changes in time value are excluded from the measurement of hedge effectiveness and are therefore recorded in earnings.

Gains and losses on derivatives designated as hedges, when recognized, are included in operating revenue, expenses or interest and related charges in the consolidated statements of income. Specific line item classification is determined based on the nature of the risk underlying individual hedge strategies. Changes in the fair value of derivatives not designated as hedges and the portion of hedging derivatives excluded from the measurement of effectiveness are included in other operation and maintenance expense in the consolidated statements of income. Cash flows resulting from the settlement of derivatives used as hedging instruments are included in net cash flows from operating activities.

2001 Derivatives and Hedge Accounting Results

Dominion recognized a pre-tax net gain of \$2 million for hedge ineffectiveness during 2001. This amount includes a pre-tax gain of \$3 million related to cash flow hedges and a loss of \$1 million related to fair value hedges. In addition, Dominion recognized a net pre-tax loss of \$45 million during 2001, representing the change in time value excluded from the measurement of effectiveness for options designated as cash flow hedges subsequent to January 1, 2001.

Approximately \$209 million of net gains in AOCI at December 31, 2001 is expected to be reclassified to earnings during 2002. The actual amounts that will be reclassified to earnings in 2002 will vary from this amount as a result of changes in market prices. The effect of amounts being reclassified from AOCI to earnings will generally be offset by the recognition of the hedged transactions (e.g., anticipated sales) in earnings, thereby achieving the realization of prices contemplated by the underlying risk management strategies. As of December 31, 2001, Dominion is hedging its exposure to the variability in future cash flows for forecasted transactions over periods of one to seven years.

Energy Trading Activities

Dominion's energy trading contracts are reported at fair value, with corresponding changes in value recognized immediately in earnings. Net gains and losses associated with Dominion's commodity trading activities are accounted for net of related cost of sales in nonregulated electric sales and nonregulated gas sales. Cash flows resulting from the settlement of energy trading contracts are included in net cash flows from operating activities. The composition of operating revenue from commodity trading activities for the years 2001, 2000 and 1999 follows:

(millions)	Gains	Losses	Total
2001			
Contract settlements	\$5,208	\$(5,209)	\$ (1)
Unrealized gains and losses	1,378	(1,238)	140
Operating revenue	6,586	(6,447)	139
2000			
Contract settlements	2,773	(2,692)	81
Unrealized gains and losses	1,236	(1,211)	25
Operating revenue	4,009	(3,903)	106
1999			
Contract settlements	2,577	(2,481)	96
Unrealized gains and losses	114	(101)	13
Operating revenue	\$2,691	\$(2,582)	\$109

Enron Bankruptcy

On December 2, 2001, Enron Corp. and certain of its subsidiaries (collectively referred to as Enron) voluntarily filed for reorganization under Chapter 11 of the United States Bankruptcy Code. Dominion is a party to various contracts with Enron that were initiated primarily for purposes of hedging anticipated purchases and sales of natural gas and for use in its energy trading operations. As a result of Enron's bankruptcy filing, Dominion reexamined the estimated collectibility of its net accounts receivable balance from Enron and the valuation of its Enron commodity contracts carried at fair value on Dominion's consolidated balance sheet at December 2, 2001. In reexamining the valuation of these assets, Dominion considered, among other factors, its contractual ability to exercise the right of setoff, the likelihood of continued performance by Enron under its contracts and its expectation regarding amounts to be realized upon potential future termination of its contracts by Dominion.

Based on management's evaluation of these factors, Dominion recorded a pre-tax charge to earnings of approximately \$151 million in the fourth quarter of 2001 related to

its estimated Enron exposure. This charge is comprised of approximately \$9 million for net credit exposure on past energy sales to Enron for which payment has not yet been received and approximately \$142 million related to the impaired fair value of natural gas forward and swap contracts with Enron. Management believes that this charge substantially eliminates any further Enron-related earnings exposure. However, various contingencies, including developments in the Enron bankruptcy proceedings, may affect Dominion's ultimate exposure to Enron.

Concurrent with the December 2, 2001 Enron bankruptcy filing, Dominion's Enron derivatives designated as cash flow hedges of anticipated purchases and sales of natural gas no longer qualified for hedge accounting and, accordingly, were de-designated from their hedging relationships for accounting purposes.

Other

In June 2001, the FASB cleared guidance that permits certain option-type contracts for the purchase or sale of electricity to qualify for the normal purchases and sales exception, if certain criteria are met. Qualifying contracts, for which Dominion elects and formally documents this exception, are not reported at fair value, as otherwise required by SFAS No. 133. In response to the June 2001 guidance and other guidance issued during the second quarter, Dominion reevaluated certain of its long-term power purchase contracts. Dominion determined that such contracts qualified under the guidance and thus designated them as normal purchases and sales. In late December 2001, the FASB issued revised guidance on this matter to be effective April 1, 2002. Dominion believes that its long-term power purchase contracts that are currently designated as normal purchases and normal sales will continue to qualify for the exception.

Future interpretations of SFAS No. 133 by the FASB or other standard-setting bodies could result in fair value accounting being required for certain contracts that are not currently being subjected to such requirements. Accordingly, future interpretations may impact Dominion's ultimate application of the standard. However, if future SFAS No. 133 interpretive guidance results in additional contracts becoming subject to fair value accounting, Dominion would pursue hedging strategies to mitigate any potential future volatility in reported earnings.

Note 16 Nuclear Operations

Dominion has a total of seven licensed nuclear reactors at its Surry and North Anna plants in Virginia and its Millstone plant in Connecticut. Surry and North Anna serve native load in Dominion's regulated electric utility operations. Millstone is a nonregulated merchant plant. See Notes 5 and 17 regarding the acquisition of Millstone and other information regarding jointly-owned utility plants.

Decommissioning represents the decontamination and removal of radioactive contaminants from a nuclear power plant, once operations have ceased, in accordance with standards established by the NRC. Through July 2007, amounts are being collected from ratepayers and placed in external trusts and invested to fund the expected costs of decommissioning the Surry and North Anna units. As part of its acquisition of Millstone, Dominion acquired the decommissioning trusts for the three units that were fully funded to the regulatory minimum as of the acquisition date. Currently, Dominion believes that the amounts available in the trusts and their expected earnings will be sufficient to cover expected decommissioning costs for the Millstone units, without any additional contributions to the trusts.

Accounting for Decommissioning

Utility Nuclear Plants—In accordance with the accounting policy recognized by regulatory authorities having jurisdiction over its electric utility operations, Dominion recognizes an expense for the future cost of decommissioning in amounts equal to amounts collected from ratepayers and earnings on trust investments dedicated to funding the decommissioning of Dominion's utility nuclear plants. On the consolidated balance sheets, the external trusts are reported at fair value with the accumulated provision for decommissioning included in accumulated depreciation. Net realized and unrealized earnings on the trust investments, as well as the offsetting expense for decommissioning, are recorded as a component of other income (loss) as permitted by regulatory authorities.

The balance of investments held in external trusts for Surry and North Anna decommissioning as well as the accumulated provision for decommissioning at December 31, 2001 and 2000, was \$858 million and \$851 million, respectively.

Dominion collected \$36 million from ratepayers in each of the years 2001, 2000 and 1999 and expensed like amounts as a component of depreciation. Dominion recognized net realized gains of \$32 million, \$20 million and \$17 million for 2001, 2000, and 1999. Dominion recognized net unrealized losses of \$61 million and \$23 million, for 2001 and 2000, respectively; and net unrealized gains in 1999 of \$60 million. Dominion recognized offsetting increases or decreases to its provision for decommissioning in amounts equal to net realized and unrealized gains or losses for each period.

Merchant Nuclear Plant—The external trusts that hold investments dedicated to funding the decommissioning of Dominion's merchant nuclear plant are classified as "available for sale" and reported in the consolidated balance sheets at fair value. See Note 14. The balance of investments held in external trusts for Millstone decommissioning at December 31, 2001 was \$839 million.

The accumulated provision for decommissioning, which is included in accumulated depreciation in the consolidated balance sheets, was recorded upon the acquisition of Millstone at its estimated fair value using discounted cash flows of expected costs to perform the decommissioning activities. The balance of the accumulated provision for Millstone decommissioning was \$660 million at December 31, 2001.

The accretion of the provision for decommissioning is expensed as a component of depreciation and was \$30 million for the year ended December 31, 2001. Dominion realized net gains on trust investments of \$15 million in 2001 and recorded such gains in other income.

Expected Costs for Decommissioning

The total estimated cost to decommission Dominion's seven nuclear units is \$3.4 billion based upon site-specific studies completed in 1998 and 1999. Dominion expects to perform new cost studies in 2002. For all units except Millstone Unit 1, the current cost estimates assume decommissioning activities will begin shortly after cessation of operations, which will occur when operating licenses expire. Millstone Unit 1 is not in service and will be monitored until decommissioning activities begin for the remaining Millstone units. The current operating licenses expire in the years detailed in the table below. However,

Dominion filed a request with the NRC in 2001 for a 20-year life extension for the Surry and North Anna units and expects to file a similar request for the Millstone units in 2004. Dominion expects to decommission the Surry and North Anna units during the period 2032 to 2045 and the Millstone units during the period 2050 to 2055.

	Surry		North Anna		Millstone			
(millions)	Unit 1	Unit 2	Unit 1	Unit 2	Unit 1	Unit 2	Unit 3	Total
NRC license expiration year	2012	2013	2018	2020	(1)	2015	2025	
Current cost estimate (1998 dollars)	\$411	\$413	\$401	\$387	—	—	—	\$1,612
Current cost estimate (1999 dollars)	—	—	—	—	\$631	\$ 500	\$ 618	1,749
Funds in external trusts at December 31, 2001	239	234	198	187	288	278	273	1,697
2001 contributions to external trusts	11	11	7	7	—	—	—	36

(1) Unit 1 is being decommissioned and was not in service.

The NRC requires nuclear power plant owners to annually update minimum financial assurance amounts for the future decommissioning of the nuclear facilities. Dominion's 2001 NRC minimum financial assurance amount, aggregated for the nuclear units, was \$1.9 billion and will be satisfied by a combination of surety bonds and the funds being collected in the external trusts.

Insurance

The Price-Anderson Act limits the public liability of an owner of a nuclear power plant to \$9.5 billion for a single nuclear incident. The Price-Anderson Act Amendment of 1988 allows for an inflationary provision adjustment every five years. Dominion has purchased \$200 million of coverage from commercial insurance pools with the remainder provided through a mandatory industry risk-sharing program. In the event of a nuclear incident at any licensed nuclear reactor in the United States, Dominion could be assessed up to \$88 million for each of its seven licensed reactors not to exceed \$10 million per year per reactor. There is no limit to the number of incidents for which this retrospective premium can be assessed.

The Price-Anderson Act was first enacted in 1957 and has been renewed three times—in 1967, 1975 and 1988. Price-Anderson expires August 1, 2002, but operating nuclear reactors would continue to be covered by the law. Congress is currently holding hearings to reauthorize the legislation.

Dominion's current level of property insurance coverage (\$2.55 billion for North Anna, \$2.55 billion for Surry and \$2.75 billion for Millstone) exceeds the NRC's minimum requirement for nuclear power plant licensees of \$1.06 billion per reactor site and includes coverage for premature decommissioning and functional total loss. The NRC requires that the proceeds from

this insurance be used first to return the reactor to and maintain it in a safe and stable condition and second to decontaminate the reactor and station site in accordance with a plan approved by the NRC. Dominion's nuclear property insurance is provided by Nuclear Electric Insurance Limited (NEIL), a mutual insurance company, and is subject to retrospective premium assessments in any policy year in which losses exceed the funds available to the insurance company. The maximum assessment for the current policy period is \$70 million. Based on the severity of the incident, the board of directors of Dominion's nuclear insurer has the discretion to lower or eliminate the maximum retrospective premium assessment. Dominion has the financial responsibility for any losses that exceed the limits or for which insurance proceeds are not available because they must first be used for stabilization and decontamination.

Dominion purchases insurance from NEIL to cover the cost of replacement power during the prolonged outage of a nuclear unit due to direct physical damage of the unit. Under this program, Dominion is subject to a retrospective premium assessment for any policy year in which losses exceed funds available to NEIL. The current policy period's maximum assessment is \$29 million.

Old Dominion Electric Cooperative, a part owner of the North Anna Power Station, and Massachusetts Municipal Wholesale Electric Company and Central Vermont Public Service Corporation, part owners of Millstone's Unit 3, are responsible for their share of the nuclear decommissioning obligations and insurance premiums on applicable units, including any retrospective premium assessments and any losses not covered by insurance.

Note 17 Property, Plant and Equipment

Major classes of property, plant and equipment and their respective balances are:

(millions) At December 31,	2001	2000
Utility		
Production	\$ 8,414	\$ 8,103
Transmission	3,165	3,085
Distribution	7,024	6,764
Storage	755	573
Plant under construction	587	562
Nuclear fuel	757	755
Other electric and gas	1,528	1,574
Total utility	22,230	21,416
Nonutility		
Exploration and production properties:		
Proved	7,303	5,210
Unproved	1,689	550
Independent power properties—nuclear	1,170	—
Independent power properties—other	381	358
Other	332	477
Total nonutility	10,875	6,595
Total property, plant and equipment	\$33,105	\$28,011

Costs of unproved properties capitalized under the full cost method of accounting that are excluded from amortization at December 31, 2001, and the years in which such excluded costs were incurred, follow:

(millions)	Incurred in Year Ended December 31,			
	Total	2001	2000	Prior Years
Property acquisition costs	\$ 947	\$861	\$41	\$45
Exploration costs	120	80	40	—
Capitalized interest	27	13	14	—
Total	\$1,094	\$954	\$95	\$45

Amortization rates for capitalized costs under the full cost method of accounting for Dominion's United States and Canadian cost centers were as follows:

(Per Mcf Equivalent) Year ended December 31,	2001	2000	1999
United States cost center	\$1.13	\$1.13	\$0.75
Canadian cost center	0.78	0.92	0.80

Dominion's proportionate share of jointly-owned utility plants at December 31, 2001 follows:

(millions, except percentages)	Bath County Pumped Storage Station	North Anna Power Station	Clover Power Station
Ownership interest	60.0%	88.4%	50.0%
Plant in service	\$1,028	\$1,859	\$533
Accumulated depreciation	321	1,162	83
Nuclear fuel	—	314	—
Accumulated amortization of nuclear fuel	—	303	—
Construction work in progress	3	28	4

The co-owners are obligated to pay their share of all future construction expenditures and operating costs of the jointly-owned facilities in the same proportions as their respective ownership interest. Such operating costs are classified in the appropriate expense category in the consolidated statements of income.

Note 18 Regulatory Assets and Liabilities

Regulatory assets represent probable future revenue associated with certain costs that will be recovered from customers through the ratemaking process. Regulatory liabilities represent probable future reductions in revenues associated with amounts that are to be credited to customers through the ratemaking process. Dominion's regulatory assets and liabilities included the following at December 31, 2001 and 2000:

(millions)	2001	2000
Regulatory assets		
Unrecovered gas costs	\$ 9	\$263
Other postretirement benefit costs ⁽¹⁾	115	126
Income taxes recoverable through future rates ⁽²⁾	179	164
Deferred cost of fuel used in electric generation	119	98
Cost of decommissioning DOE uranium enrichment facilities ⁽³⁾	42	49
Customer bad debts ⁽⁴⁾	80	—
Other	39	60
Regulatory assets, net	574	497
Total regulatory assets	583	760
Regulatory liabilities		
Amounts payable to customers	91	—
Estimated rate contingencies and refunds ⁽⁵⁾	43	41
Total regulatory liabilities	\$134	\$ 41

(1) Costs recognized in excess of amounts included in regulated rates charged by Dominion's regulated gas operations before rates were updated to reflect the new method of accounting and the cost related to the accrued benefit obligation recognized as part of Dominion's accounting for its acquisition of CNG.

(2) Income taxes recoverable or refundable through future rates resulted from the recognition of additional deferred income taxes, not previously recorded because of past ratemaking practices.

(3) Cost of decommissioning the Department of Energy's uranium enrichment facilities, representing the unamortized portion of Dominion's required contributions. Beginning in 1992, Dominion began making contributions over a 15-year period and collecting these costs in electric customers' fuel rates.

(4) In 2001 the Public Utilities Commission of Ohio authorized the deferral of costs associated with certain uncollectible customer accounts not contemplated by current rates. Dominion expects recovery of such costs, which will be included in Dominion's next base rate case.

(5) Estimated rate contingencies and refunds are associated with certain increases in prices by Dominion's rate regulated utilities and other rate-making issues that are subject to final modification in regulatory proceedings.

The incurred costs underlying regulatory assets may represent past expenditures by Dominion's rate regulated electric and gas operations or may represent the recognition of liabilities that ultimately will be settled at some future time. At December 31, 2001, approximately \$130 million of Dominion's regulatory assets represented past expenditures on which it does not earn a return. These expenditures consist primarily of unrecovered gas costs, customer bad debts and a portion of deferred fuel costs. Unrecovered gas and deferred fuel costs are recovered within two years; recovery of these customer bad debts is expected to be addressed in the next base rate case.

Note 19 Short-Term Debt and Credit Agreements

Dominion and its subsidiaries have credit agreements with various expiration dates and pay fees in lieu of compensating balances in connection with these agreements. These agreements provided for maximum borrowing capacity of \$2.5 billion and \$4.4 billion at December 31, 2001 and December 31, 2000, respectively. In 2000, \$295 million was borrowed under these agreements. There were no borrowings as of December 31, 2001.

These credit agreements also supported \$1.9 billion and \$2.7 billion of commercial paper at December 31, 2001 and 2000, respectively. These borrowings were used primarily to fund working capital requirements, bridge financing of acquisitions and operational needs at Dominion and its subsidiaries. At December 31, 2000, a total of \$250 million of the commercial paper was classified as long-term debt since a portion of the commercial paper was supported by credit agreements that had expiration dates extending beyond one year.

At December 31, 2001, Dominion had commercial paper programs with an aggregate amount of \$2.05 billion supported by a \$1.75 billion 364-day revolving credit facility and a \$300 million multi-year facility. Dominion expects to renew these credit facilities after their maturities in the second quarter of 2002.

A summary of the amounts that are classified as short-term debt at December 31 follows:

	2001		2000	
	Amount	Weighted Average Interest Rate	Amount	Weighted Average Interest Rate
(millions, except percentages)	Outstanding		Outstanding	
Commercial paper	\$1,859	4.23%	\$2,414	6.50%
Term notes	—	—	823	7.02%
Total	\$1,859		\$3,237	

Note 20 Long-Term Debt

(millions) At December 31	2001	2000

	322	—
Total long-term debt	\$12,119	\$10,101

(1) Substantially all of Virginia Power's property is subject to the lien of the mortgage, securing its First and Refunding Mortgage Bonds (Mortgage Bonds). In 2001, Virginia Power retired \$100 million of its 1993-E, 6% Mortgage Bonds and redeemed \$100 million of its 1991-A, 8.75% Mortgage Bonds due April 1, 2021. In January 2002, Virginia Power called its \$200 million, 6.75% 1997-A Mortgage Bonds due February 1, 2007 for redemption in February 2002 at a price of 102.74 plus accrued interest. In January 2002, Virginia Power issued \$650 million of 5.375% Senior Notes (2002 Senior Notes) maturing in February 2007.

(2) In 2001, CNG redeemed the remaining \$84 million of 8.75% Senior Notes due October 1, 2019. At the exercised option of holders, CNG will be required on October 15, 2006 to purchase the \$150 million, 6.875% Senior Notes due October 15, 2026 at 100% of the principal amount plus accrued interest. In January 2002, Dominion Resources, Inc. issued \$250 million of 3.875 percent medium-term notes due 2004.

(3) Certain pollution control equipment at Virginia Power's generating facilities has been pledged or conveyed to secure these financings.

(4) \$76 million of variable rate debt under revolving lines of credit and \$12 million of 6.34% to 6.5% nonrecourse debt were retired in 2001.

(5) Represents changes in fair value of certain fixed rate long-term debt associated with fair value hedging relationships, as described in Note 15.

Note: Coupon rate for variable rate debt is a weighted average of the interest rates for 2001, ranging from 2.52% to 5.17%.

The scheduled principal payments of long-term debt at December 31, 2001 were as follows (in millions):

2002	2003	2004	2005	2006	Thereafter	Total
\$1,354	\$2,112	\$1,459	\$889	\$1,445	\$6,196	\$13,455

Dominion's short-term credit facilities and long-term debt agreements contain customary covenants and default provisions.

Note 21 Subsidiary Dividend Restrictions

The 1935 Act prohibits registered holding companies and their subsidiaries from paying dividends out of capital or unearned surplus except when they have received specific SEC authorization. In January 2002, Dominion filed an application with the SEC for relief from the restriction on paying dividends out of unearned surplus of the subsidiary into which Louis Dreyfus was merged. The request was for relief up to an amount equal to Louis Dreyfus' retained earnings before the merger.

The Virginia Commission may prohibit any public service company, including Virginia Power, from declaring or paying a dividend to an affiliate, if found not to be in the public interest. At December 31, 2001, the Virginia Commission had not restricted the payment of dividends by Virginia Power.

Certain agreements associated with Dominion's credit facilities contain restrictions on the ratio of debt to total capitalization. These limitations did not restrict Dominion's ability to pay dividends or receive dividends from its subsidiaries at December 31, 2001.

Note 22 Obligated Mandatorily Redeemable Preferred Securities of Subsidiary Trusts

From 1995 through 2001, Dominion established five subsidiary capital trusts that sold trust preferred securities that represented preferred beneficial interests and 97 percent beneficial ownership in the assets held by the capital trusts. In exchange for the funds realized from the sale of the trust preferred securities and common securities that represent the remaining 3 percent beneficial ownership interest in the assets held by the capital trust, Dominion issued various junior subordinated debt instruments. The junior subordinated debt instruments constitute

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

100 percent of each capital trust's assets. The following table provides summary information about the capital trusts and junior subordinated debt instruments:

Date Established	Capital Trusts	Trust Preferred Securities	Common Securities
(Millions)			
August, 1995	Virginia Power Capital Trust I ⁽¹⁾	\$135	\$4
December, 1997	Dominion Resources Capital Trust I ⁽²⁾	250	8
January, 2001	Dominion Resources Capital Trust II ⁽³⁾	300	9
January, 2001	Dominion Resources Capital Trust III ⁽⁴⁾	250	8
October, 2001	Dominion CNG Capital Trust I ⁽⁵⁾	200	6
		1,135	
	Unamortized discount	(3)	
	Total at December 31, 2001	\$1,132	

Junior subordinated notes/debentures assets for each capital trust were as follows:

⁽¹⁾ \$139 million—Virginia Power 8.05% Series A Notes due 9/30/2025—The maturity date, subject to certain conditions, may be extended for up to an additional 10 years from date of original maturity.

⁽²⁾ \$258 million—Dominion Resources, Inc. 7.83% Debentures due 12/1/2027.

⁽³⁾ \$309 million—Dominion Resources, Inc. 8.4% Debentures due 1/30/2041.

⁽⁴⁾ \$258 million—Dominion Resources, Inc. 8.4% Debentures due 1/15/2031.

⁽⁵⁾ \$206 million—CNG 7.8% Debentures due 10/31/2041.

Note 23 Preferred Stock

Dominion is authorized to issue up to 20 million shares of preferred stock. See Note 29 for a discussion of Dominion's issuance of 665,000 shares of Series A Mandatorily Convertible Preferred Stock, liquidation preference \$1,000 per share (Preferred Stock), to Piedmont Share Trust (Piedmont Trust). Dominion is the beneficial owner of the Piedmont Trust which is consolidated in the preparation of Dominion's consolidated financial statements, thus eliminating the Preferred Stock.

Virginia Power is authorized to issue up to 10 million shares of preferred stock, \$100 liquidation preference. Upon involuntary liquidation, dissolution or winding-up of Virginia Power, each share is entitled to receive \$100 per share plus accrued dividends. Dividends are cumulative.

During the fourth quarter of 2001, Virginia Power purchased and redeemed, at par, all shares of its January 1987 and June 1987 series of money market preferred stock for \$125 million.

As of December 31, 2001 and 2000, there were no outstanding issues of Virginia Power preferred stock subject to mandatory redemption. Shown below are the series of Virginia Power preferred stock not subject to mandatory redemption that were outstanding as of December 31, 2001.

	Issued and Outstanding Dividend Shares ⁽¹⁾	Entitled Per Share Upon Liquidation
\$5.00	107	\$112.50
4.04	13	102.27
4.20	15	102.50
4.12	32	103.73
4.80	73	101.00
7.05	500	105.00 ⁽²⁾
6.98	600	105.00 ⁽³⁾
MMP 10/88 ⁽⁴⁾	750	100.00
MMP 6/89 ⁽⁴⁾	750	100.00
MMP 9/92, Series A ⁽⁴⁾	500	100.00
MMP 9/92, Series B ⁽⁴⁾	500	100.00
Total	3,840	

(1) Shares are presented in thousands.

(2) Through 7/31/03; amounts decline in steps thereafter to \$100.00 after 7/31/13.

(3) Through 8/31/03; amounts decline in steps thereafter to \$100.00 after 8/31/13.

(4) Money Market Preferred (MMP) dividend rates are variable and are set every 49 days via an auction process. The combined weighted average rates for all series outstanding during 2001, 2000, and 1999, including fees for broker/dealer agreements, were 4.32 percent, 5.71 percent and 4.82 percent, respectively.

Note 24 Common Stock

Dominion is authorized by its Board of Directors to repurchase up to \$650 million of Dominion common stock outstanding. As of December 31, 2001, Dominion had repurchased approximately 11 million shares for \$471 million. Dominion has not repurchased any shares since January 2000.

Immediately before the CNG merger in January 2000, Dominion concluded a first step transaction in which 33 million shares of Dominion common stock were exchanged for approximately \$1.4 billion. Dominion also repurchased approximately 3.2 million shares of stock in 2000 through a total return swap facility at a cost of approximately \$145 million. The transactions were independent of the general repurchase authority described above.

Note 25 Stock Compensation Plans

Dominion sponsors two stock plans that provide stock-based awards to directors, executives and other key employees. Under the plans, Dominion grants stock options and restricted stock awards that vest from three to five years, and in the case of options, have contractual terms that range from seven to 10 years. Forty million shares of common stock may be issued

under the plans and 15 million of those are available for new grants as of December 31, 2001.

Dominion recognized compensation expense of \$13 million, \$8 million, and \$2 million in 2001, 2000, and 1999, respectively, for the issuance of stock-based awards, primarily restricted stock. If compensation cost associated with the stock-based awards had been measured based on the fair market value of the options at the date of grant, 2001 net income, basic EPS, and diluted EPS would have been \$520 million, \$2.08 and \$2.06, respectively; 2000 net income, basic EPS, and diluted EPS would have been \$430 million, \$1.82 and \$1.82, respectively; and 1999 net income, basic EPS, and diluted EPS would have been \$277 million, \$1.45 and \$1.38.

The adjacent table provides a summary of changes in amounts of Dominion stock options outstanding as of and for the years ended December 31, 2001, 2000, and 1999. In connection with the acquisition of Louis Dreyfus, employee stock options of Louis Dreyfus were converted into employee stock options of Dominion. Based on the conversion formula, certain converted stock options had exercise prices that either exceeded or were less than the market price of Dominion common stock on the date of grant. The fair value of all converted stock options were included in the purchase price of Louis Dreyfus, see Note 5. Generally, the exercise price of Dominion employee

stock options equals the market price of Dominion common stock on the date of grant.

	Stock Options	Weighted- average Exercise Price	Weighted- average Fair Value
	(thousands)		
Outstanding at December 31, 1998	2	\$29.49	
Granted—1999	7,146	\$41.38	\$4.35 ⁽²⁾
Exercised, cancelled and forfeited	(1)	\$29.37	
Outstanding at December 31, 1999	7,147	\$41.37	
Exercisable at December 31, 1999	7,147	\$41.37	
Granted—2000	5,389	\$43.87	\$6.86 ⁽²⁾
Exercised, cancelled and forfeited	(2,205)	\$40.07	
Outstanding at December 31, 2000	10,331	\$41.77	
Exercisable at December 31, 2000	6,967	\$41.51	
Granted—2001	480 ⁽¹⁾	\$33.21 ⁽¹⁾	\$23.69 ⁽¹⁾
	11,471 ⁽²⁾	\$61.20 ⁽²⁾	\$11.24 ⁽²⁾
	194 ⁽³⁾	\$62.27 ⁽³⁾	\$ 9.43 ⁽³⁾
Exercised, cancelled and forfeited	(1,484)	\$41.23	
Outstanding at December 31, 2001	20,992	\$52.90	
Exercisable at December 31, 2001	7,955	\$42.68	

(1), (2), (3) The exercise price for these stock options (1) was less than, (2) equaled, or (3) exceeded the market price on the date of grant.

The following table provides certain information about stock options outstanding as of December 31, 2001:

Exercise Price	Options Outstanding			Options Exercisable	
	Shares Outstanding	Weighted-average Remaining Contractual Life	Weighted-average Exercise Price	Shares Exercisable	Weighted-average Exercise Price
	(thousands)			(thousands)	
\$ 0-\$19.99	13	7.0	\$19.15	13	\$19.15
\$20-\$30.99	186	5.8	\$25.76	186	\$25.76
\$31-\$40.99	266	7.5	\$38.42	165	\$38.16
\$41-\$50.99	8,537	7.5	\$42.40	7,070	\$41.87
\$51-\$60.99	9,546	7.1	\$59.91	216	\$58.83
\$61-\$69	2,444	9.3	\$66.00	305	\$63.90
Total	20,992	7.5	\$52.90	7,955	\$42.68

The fair value of the options was estimated on the dates of grant using the Black-Scholes option pricing model with the following weighed-average assumptions for 2001, 2000, and 1999, respectively: expected dividend yield of 4.22 percent, 5.22 percent, 6.25 percent; expected volatility of 22.19 percent, 21.54 percent, 15.14 percent; contractual life of 10 years (all periods); risk free interest rate of 5.15 percent, 5.18 percent, 6.52 percent; and expected lives of six years (all periods).

In the fourth quarter of 2001, Dominion modified the stock options of certain executives in connection with the restructuring activities discussed in Note 7. The options were

modified to extend the period, after separation from employment, that the executives may exercise their options but not beyond the options' original contractual lives. Dominion re-measured compensation expense associated with these options on the modification date and recognized a pre-tax charge of \$18 million included in restructuring charges in 2001.

During 2001, 2000, and 1999, respectively, Dominion awarded 332,884 shares, 169,886 shares and 24,758 shares of restricted stock with weighted-average fair values of \$63.49, \$41.88 and \$43.51.

Note 26 Employee Benefit Plans

Dominion and its subsidiaries provide certain benefits to eligible active employees, retirees and qualifying dependents. Under the terms of its benefit plans, Dominion and its subsidiaries reserve the right to change, modify or terminate the plans. From time to time in the past, benefits have changed, and some of these changes have reduced benefits.

Dominion and its subsidiaries maintain qualified noncontributory defined benefit retirement plans covering virtually all employees. Retirement benefits are based primarily on years of service, age, and compensation. Dominion's funding policy is to contribute annually an amount that is in accordance with the provisions of the Employment Retirement Income Security Act of 1974. The pension program also provides benefits to certain retired executives under company-sponsored nonqualified employee benefit plans. Certain of these nonqualified plans are funded through contributions to a grantor trust.

Dominion and its subsidiaries provide retiree health care and life insurance benefits with annual premiums based on several factors such as age, retirement date, and years of service.

In 2000, Dominion offered an early retirement program (ERP). The ERP provided up to three additional years of age and three additional years of employee service for benefit

formula purposes, subject to age and service maximums under Dominion and its subsidiaries' postretirement medical and pension plans. Certain employees who satisfied certain minimum age and years of service requirements were eligible under the ERP. The effect of the ERP on Dominion's pension plan and post retirement benefit expenses was \$81 million and \$33 million, respectively. These expenses were offset, in part, by curtailment gains of approximately \$20 million and \$6 million from pension plans and other postretirement benefit plans, respectively, attributable to reductions in expected future years of service as a result of ERP participation and involuntary employee terminations.

In November 2001, Dominion eliminated certain senior management positions. Dominion paid these individuals special termination benefits and accelerated the payment of benefits under Dominion's nonqualified pension plans. Dominion recognized special termination benefits expense of \$15 million, a loss of \$7 million related to the settlement of the related non-qualified pension obligation and a curtailment loss of \$2 million.

In addition, effective January 1, 2000, Dominion adopted a change in the method of calculating the market-related value of pension plan assets. The change was reported as a change in accounting principle. See Note 3.

The following tables summarize the changes in Dominion's pension and other postretirement benefit plan obligations and plan assets for each of the years ended December 31, 2001 and 2000, and a statement of the plans' funded status as of December 31, 2001 and 2000:

(millions)	Pension Benefits		Other Postretirement Benefits	
Year ended December 31,	2001	2000	2001	2000
Expected benefit obligation at beginning of year	\$2,304	\$1,097	\$ 799	\$ 401
Acquisition of CNG	—	1,002	—	297
Acquisition of Millstone	66	—	21	—
Actual benefit obligation at beginning of year	2,370	2,099	820	698
Additional benefit obligation due to change in control	—	10	—	—
Service cost	71	65	39	30
Interest cost	173	161	63	52
Benefits paid	(153)	(141)	(51)	(43)
Actuarial loss during the year	114	112	107	82
ERP benefit costs	—	81	—	33
Change in benefit obligation	(5)	—	—	—
Special termination benefits	15	—	—	—
Sale of VNG	—	(45)	—	(20)
Change in APBO due to curtailment	—	(20)	—	(6)
Plan amendments	8	(18)	18	(27)
Expected benefit obligation at end of year	2,593	2,304	996	799
Fair value of plan assets at beginning of year	3,557	1,305	417	272
Acquisition of CNG	—	2,332	—	128
Actual return on plan assets	(91)	64	(11)	3
Contributions	39	34	65	45
Benefits paid from plan assets	(153)	(141)	(25)	(20)
Sale of VNG	—	(37)	—	(11)
Fair value of plan assets at end of year	3,352	3,557	446	417
Funded status	759	1,253	(550)	(382)
Unrecognized net actuarial loss	698	177	164	13
Unrecognized prior service cost	3	(1)	11	(7)
Unrecognized net transition (asset) obligation	(5)	(9)	115	125
Prepaid (accrued) benefit cost	1,455	1,420	(260)	(251)
Amounts recognized in the consolidated balance sheets at December 31:				
Prepaid benefit cost	1,511	1,455	—	—
Accrued benefit liability	(89)	(77)	(260)	(251)
Intangible asset	12	14	—	—
Accumulated other comprehensive income	21	28	—	—
Net amount recognized	\$1,455	\$1,420	\$(260)	\$(251)

Dominion has nonqualified pension and supplemental pension plans which do not have "plan assets" as defined by generally accepted accounting principles. The total projected benefit obligation for these plans was \$103 million and \$93 million at December 31, 2001 and 2000, respectively, and is included in the table above. The additional minimum liability recognized relating to these plans was \$33 million and \$42 million at December 31, 2001 and 2000. The related intangible asset recognized as of

those dates amounted to \$12 million and \$14 million, respectively. Adjustments of the additional minimum liability and intangible asset due to changes in assumptions or the financial status of these plans resulted in a pre-tax credit to other comprehensive income of \$7 million for 2001 and a pre-tax charge to other comprehensive income of \$24 million for 2000.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

The components of the provision for net periodic benefit cost were as follows:

(millions) Year ended December 31,	2001	2000	1999
Pension Benefits			
Service cost	\$ 71	\$ 65	\$ 40
Interest cost	173	161	76
Expected return on plan assets	(331)	(298)	(93)
Recognized loss	3	6	—
Amortization of prior service cost	2	3	—
Amortization of transition obligation	(4)	(4)	—
Curtailment gains	—	(20)	—
ERP benefit costs	—	81	—
Settlement loss	7	—	—
Special termination benefits	15	—	—
Curtailment loss	2	—	—
Net periodic benefit cost	\$ (62)	\$ (6)	\$ 23
Other Postretirement Benefits			
Service cost	\$ 40	\$ 30	\$ 17
Interest cost	63	52	28
Expected return on plan assets	(32)	(31)	(20)
Amortization of prior service cost	(1)	—	—
Amortization of transition obligation	10	13	12
Curtailment gains	—	(6)	—
ERP benefit costs	—	33	—
Net amortization and deferral	—	(2)	—
Net periodic benefit cost	\$ 80	\$ 89	\$ 37

Significant assumptions used in determining net periodic pension cost, the projected benefit obligation, and postretirement benefit obligations were:

	Pension Benefits		Other Benefits	
	2001	2000	2001	2000
Discount rates	7.25%	7.50%	7.25%	7.50%
Expected return on plan assets	9.50%	9.50%	7.88%	6.50%
Rate of increase for compensation	4.60%	5.00%	4.60%	5.00%
Medical cost trend rate			9.00%	9.00%
			Decreasing to 4.75% in 2006 and years thereafter	

Assumed health care cost trend rates have a significant effect on the amounts reported for the health care plans. A one-percentage-point change in assumed health care cost trend rates would have the following effects:

Other Postretirement Benefits

(millions)	One percentage point increase	One percentage point decrease
Effect on total service and interest costs components for 2001	\$15	\$(12)
Effect on postretirement benefit obligation at December 31, 2001	\$118	\$(97)

In addition, Dominion sponsors defined contribution thrift-type savings plans. During 2001, 2000 and 1999, Dominion recognized \$27 million, \$30 million and \$29 million, respectively, as contributions to these plans.

The funds collected for other postretirement benefits in regulated utility rates, in excess of other postretirement benefits actually paid during the year, are contributed to external benefit trusts.

Note 27 Commitments and Contingencies

As the result of issues generated in the course of daily business, Dominion and its subsidiaries are involved in legal, tax and regulatory proceedings before various courts, regulatory commissions and governmental agencies, some of which involve substantial amounts of money. Management believes that the final disposition of these proceedings will not have an adverse material effect on its operations or the financial position, liquidity or results of operations.

Utility Rate Regulation

Dominion's retail gas distribution companies are subject to price regulation in the states of Ohio, Pennsylvania and West Virginia. Dominion's gas transmission business is subject to federal rate regulation.

Dominion currently faces competition as a result of utility industry deregulation. Under Virginia's electric utility industry deregulation legislation, Dominion's base rates will remain capped until July 2007 unless Dominion petitions for, and the Virginia Commission approves, an earlier termination any time after January 1, 2004. The capped rates will provide recovery of certain generation-related costs. Dominion remains exposed to numerous risks, including, among others, exposure to potentially stranded costs, future environmental compliance requirements, changes in tax laws, inflation and increased capital costs. At December 31, 2001, Dominion's exposure to potentially stranded costs was comprised of the following: long-term purchased power contracts that could ultimately be determined to be above market (see Power Purchase Contracts below); generating plants that could possibly become uneconomic in a deregulated environment; and unfunded obligations for nuclear plant decommissioning and postretirement benefits not yet recognized in the financial statements (see Notes 16 and 26).

Capital Expenditures

Dominion has made substantial commitments in connection with its capital expenditures program. Those expenditures are estimated to total approximately \$2.4 billion, \$3.1 billion and \$3.2 for 2002, 2003 and 2004 respectively. Purchases of nuclear fuel are included in *Fuel Purchase Commitments* below. Dominion expects that these expenditures will be met through

cash flow from operations and through a combination of sales of securities and short-term borrowings.

Power Purchase Contracts

Dominion has entered into contracts for the long-term purchases of capacity and energy from other utilities, qualifying facilities and independent power producers. As of December 31, 2001, Dominion had 43 non-utility purchase contracts with a combined dependable summer capacity of 3,770 megawatts. The table below reflects Dominion's minimum commitments as of December 31, 2001 under these contracts.

(millions)	Commitment	
	Capacity	Other
2002	\$ 688	\$ 33
2003	635	20
2004	634	17
2005	627	12
2006	613	12
Later years	5,856	128
Total	\$9,053	\$222
Present value of the total	\$5,094	\$116

In addition to the minimum commitments in the table above, under some of these contracts Dominion may purchase, at its option, energy as needed. Purchased power expenditures, subject to cost of service rate regulation, (including economy, emergency, limited term, short-term and long-term purchases) for the years 2001, 2000 and 1999 were \$1.1 billion, \$1.1 billion, and \$1.2 billion, respectively.

In 2001, Dominion completed the purchase of three generating facilities and the termination of seven long-term power purchase contracts with non-utility generators (NUG). Dominion recorded an after-tax charge of \$136 million in connection with the purchase and termination of long-term power purchase contracts. Cash payments related to the purchase of three generating facilities totaled \$207 million. The allocation of the purchase price was assigned to the assets and liabilities acquired based upon estimated fair values as of the date of acquisition. Substantially all of the value was attributed to the power purchase contracts which were terminated and resulted in a charge included in operation and maintenance expense.

See Note 9 for additional disclosure regarding the evaluation of Dominion's potential exposure under its long-term power purchase commitments.

Fuel Purchase Commitments

Dominion enters into long-term purchase commitments for fuel used in electric generation and natural gas for purposes other than trading. Estimated payments under these commitments for the next five years are as follows: 2002—\$549 million; 2003—\$321 million; 2004—\$212 million; 2005—\$241 million;

2006—\$143 million and years beyond 2006—\$288 million. These purchase commitments include those required for regulated operations. Dominion recovers the costs of those purchases through regulated rates. The natural gas purchase commitments of Dominion's field services operations are also included, net of related sales commitments. In addition, Dominion has committed to purchase certain volumes of natural gas at market index prices determined in the period the natural gas is delivered. These transactions have been designated as normal purchases and sales under SFAS No. 133.

Natural Gas Pipeline and Storage Capacity Commitments

Dominion enters into long-term commitments for the purchase of natural gas pipeline and storage for purposes other than trading. Estimated payments under these commitments for the next five years are as follows: 2002—\$43 million; 2003—\$38 million; 2004—\$23 million; 2005—\$6 million; and 2006—\$1 million. There were no commitments beyond 2006.

Leases

Dominion leases various facilities, vehicles, aircraft, and equipment under both operating and capital leases. Future minimum lease payments under operating and capital leases that have initial or remaining lease terms in excess of one year as of December 31, 2001 are: 2002—\$70 million; 2003—\$95 million; 2004—\$100 million; 2005—\$91 million; 2006—\$72 million; and years after 2006—\$166 million. Rental expense included in other operations and maintenance expense was \$63 million, \$107 million, and \$31 million for 2001, 2000, and 1999, respectively.

As of December 31, 2001, Dominion, through certain subsidiaries, has entered into agreements with special purpose entities (Lessors) in order to finance and lease several new power generation projects, as well as its corporate headquarters and aircraft. The Lessors have an aggregate financing commitment from equity and debt participants (Investors) of \$2.2 billion, of which \$817 million has been used for total project costs to date. Dominion, in its role as construction agent for the Lessors, is responsible for completing construction by a specified date. In the event a project is terminated before completion, Dominion has the option to either purchase the project for 100 percent of project costs or terminate the project and make a payment to the Lessor of approximately but no more than 89.9 percent of project costs. Upon completion of each individual project, Dominion has use of the project assets subject to an operating lease. Dominion's lease payments to the Lessors are sufficient to provide a return to the Investors. At the end of each individual project's lease term, Dominion may renew the lease at negotiated amounts based on project costs and current market conditions, subject to Investors' approval; purchase the project at its original construction cost; or sell the project, on behalf of the Lessor, to

an independent third party. If the project is sold and the proceeds from the sale are insufficient to repay the Investors, Dominion may be required to make a payment to the Lessor, ranging from 81 percent to 85 percent of the project cost depending on the individual project and applicable agreement. Dominion has guaranteed a portion of the obligations of its subsidiaries to the Lessors during the construction and post-construction periods. These transactions do not contain any type of credit rating or stock price trigger events.

As noted above, as of December 31, 2001, amounts subject to these agreements totaled \$817 million, and the total amount, upon completion of all projects, is projected to be approximately \$2.2 billion. The projects are accounted for as operating leases for financial accounting purposes. Accordingly, neither the project assets nor related obligations are reported on Dominion's balance sheets. The future minimum lease payments described above include annual payments of approximately \$6 million associated with these projects representing minimum payments under leases for which the leased assets are currently in use. Projects currently under development are scheduled for completion during the period 2002 through 2004. Annual lease payments for the projects are estimated to be \$33 million in 2002, increasing to \$133 million by 2004.

Energy Trading

Subsidiaries of Dominion enter into purchases and sales of commodity-based contracts in the energy-related markets, including natural gas, electricity, coal and oil. These agreements may cover current and future periods. The volume of these transactions varies from day to day, based on market conditions. See Note 15 for a discussion of Dominion's energy trading activities and risk management policies.

Environmental Matters

Dominion is subject to rising costs resulting from a steadily increasing number of federal, state and local laws and regulations designed to protect human health and the environment. These laws and regulations can result in increased capital, operating and other costs as a result of compliance, remediation, containment and monitoring obligations.

Historically, Dominion recovered such costs arising from regulated electric operations through utility rates. However, to the extent environmental costs are incurred in connection with operations regulated by the Virginia State Corporation Commission, during the period ending June 30, 2007, in excess of the level currently included in Virginia jurisdictional rates, Dominion's results of operations will decrease. After that date, Dominion may seek recovery from customers through utility rates of only those environmental costs related to transmission and distribution operations.

Superfund Sites—In 1987, the Environmental Protection Agency (EPA) identified Dominion and a number of other entities as Potentially Responsible Parties (PRPs) at two Superfund sites located in Kentucky and Pennsylvania. Current cost studies estimate total remediation costs for the sites to range from \$98 million to \$153 million. Dominion's proportionate share of the total cost is expected to be in the range of \$2 million to \$3 million, based upon allocation formulas and the volume of waste shipped to the sites. The majority of remediation activities at the Kentucky site are complete and remediation design is ongoing for the Pennsylvania site. Dominion has accrued a reserve of \$2 million to meet its obligations at these two sites. Based on a financial assessment of the PRPs involved at these sites, Dominion has determined that it is probable that the PRPs will fully pay their share of the costs. Dominion generally seeks to recover its costs associated with environmental remediation from third party insurers. At December 31, 2001, any pending or possible claims were not recognized as an asset or offset against such obligations.

Other EPA Matters—In 1999, the Department of Justice (DOJ) notified Dominion of an alleged noncompliance with the EPA's oil spill prevention, control and countermeasures (SPCC) plans and facility response plan (FRP) requirements at one of Dominion's power stations. In December 2001, Dominion reached a settlement agreement with the DOJ and EPA covering all alleged noncompliance issues. The settlement will not have a material impact on Dominion's financial condition or results of operations. Dominion also identified matters at other power stations that the EPA might view as not in compliance with the SPCC and FRP requirements and reported these matters to the EPA. Dominion also reported its plans for correcting the issues. Dominion does not believe that the settlement of these self-reported matters, if any, will be material to its results of operations or financial conditions.

During 2000, Virginia Power received a Notice of Violation from the EPA alleging that the company failed to obtain New Source Review permits under the Clean Air Act prior to undertaking specified construction projects at the Mt. Storm Power Station in West Virginia. The Attorney General of New York filed a suit against Virginia Power alleging similar violations of the Clean Air Act at the Mt. Storm Power Station. Virginia Power also received notices from the Attorneys General of Connecticut and New Jersey of their intentions to file suit for similar violations. Management believes that Virginia Power has obtained the necessary permits for its generating facilities. Virginia Power has reached an agreement in principle with the federal government and the state of New York to resolve this situation. The agreement in principle includes payment of a \$5 million civil penalty, a commitment of \$14 million for environmental projects in Virginia, West Virginia, Connecticut, New

Jersey and New York, and a 12-year, \$1.2 billion capital investment program for environmental improvements at Virginia Power's coal-fired generating stations in Virginia and West Virginia. Dominion had already committed to a substantial portion of the \$1.2 billion expenditures for sulfur dioxide and nitrogen oxide emissions controls. The negotiations over the terms of a binding settlement have expanded beyond the basic agreement in principle and are ongoing. As of December 31, 2001, Dominion has recorded, on a discounted basis, \$18 million for the civil penalty and environmental projects.

Other—Before being acquired by Dominion, Louis Dreyfus was one of numerous defendants in several lawsuits pending in the Texas 93rd Judicial District Court in Hildago County, Texas. The lawsuit alleges that gas wells and related pipeline facilities operated by Louis Dreyfus and facilities operated by other defendants caused an underground hydrocarbon plume in McAllen, Texas. The plaintiffs claim that they have suffered damages, including property damage and lost profits as a result of the plume. Although the results of litigation are inherently unpredictable, Dominion does not expect the ultimate outcome of the case to have a material adverse impact on its financial position or results of operations.

Spent Nuclear Fuel

Under provisions of the Nuclear Waste Policy Act of 1982, Dominion has entered into contracts with the DOE for the disposal of spent nuclear fuel. The DOE failed to begin accepting the spent nuclear fuel on January 31, 1998, the date provided by the Nuclear Waste Policy Act and by Dominion's contract with the DOE. Dominion will continue to safely manage its spent fuel until accepted by the DOE.

Retrospective Premium Assessments

Under several of Dominion's nuclear insurance policies, Dominion is subject to retrospective premium assessments in any policy year in which losses exceed the funds available to these insurance companies. For additional information, see Note 16.

Related Party Transactions

For a discussion of Dominion's commitments to related parties, see Note 29.

Note 28 Fair Value of Financial Instruments

Substantially all of Dominion's financial instruments are recorded at fair value, with the exception of the instruments described below. Fair value amounts have been determined using available market information and valuation methodologies considered appropriate by management. Dominion reports the following financial instruments based on historical cost rather than

fair value. The financial instruments' carrying amounts and fair values as of December 31 were as follows:

(millions)	2001		2000	
	Carrying Amount	Estimated Fair Value	Carrying Amount	Estimated Fair Value
Long-term debt ⁽¹⁾	\$13,455	\$13,725	\$10,491	\$10,555
Preferred securities of subsidiary trusts ⁽²⁾⁽³⁾	\$ 1,132	\$ 1,154	385	\$ 383
Loan commitments ⁽⁴⁾	—	—	—	\$ 230
Unrecognized financial instruments ⁽⁵⁾ :				
Interest rate swaps ⁽⁶⁾	—	—	—	\$ 17
Swaps, collars and options—hedging ⁽⁷⁾	—	—	—	\$ (277)

(1) Fair value is estimated using market prices, where available, and interest rates currently available for issuance of debt with similar terms and remaining maturities are used to estimate fair value. The carrying amount of debt issues with short-term maturities and variable rates refinanced at current market rates is a reasonable estimate of their fair value.

(2) Fair value is based on market quotations.

(3) The 2001 carrying value of \$1,132 million represents principal outstanding of \$1,135 million less an unamortized discount of \$3 million.

(4) The fair value of commitments was estimated using the fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the present creditworthiness of the counterparties.

(5) Upon adoption of SFAS No. 133 on January 1, 2001, all derivatives are reported at fair value. The fair value of unrecognized financial instruments at December 31, 2000 was recognized as a component of the January 1, 2001 SFAS No. 133 transition adjustment. See Note 15 for discussion of Dominion's derivatives and hedge accounting activities.

(6) Fair value was based upon the present value of all estimated net future cash flows, taking into account current interest rates and the creditworthiness of the swap counterparties.

(7) Fair value reflected Dominion's best estimates considering over-the-counter quotations, time value and volatility factors of the underlying commitments.

Note 29 Related Party Transactions

Dominion Fibers Ventures, LLC

In December 2000, Dominion formed Dominion Fiber Ventures, LLC (DFV). In 2001, Dominion contributed all of the outstanding shares of its telecommunications subsidiary, Dominion Telecom, Inc. (DTI), with an equity value of \$110 million, in exchange for 100 percent of Class B managing membership interests in DFV. A third-party investor trust contributed \$60 million for 100 percent of the Class A membership interests in DFV. DFV is the sole owner of DTI. As a result of the Class A membership interests having substantive minority veto rights, DTI is no longer consolidated, and Dominion's investment in DFV is accounted for using the equity method and is reported in investment in affiliates on the 2001 consolidated balance sheet.

In 2001, DFV issued \$665 million of 7.05 percent Senior Secured Notes due March 2005 (DFV Senior Notes). The DFV Senior Notes are redeemable at any time at the option of DFV or upon occurrence of certain events. DFV contributed \$712 million net cash proceeds from the issuance of DFV Senior Notes and the sale of the Class A membership interests to DTI and Monument Overfund Trust (Overfund Trust), approximately \$518 million and \$194 million, respectively. Overfund Trust

is owned by DFV. The DFV Senior Notes are secured by the stock of DTI, the Overfund Trust, and certain rights with respect to the Dominion Preferred Stock held by Piedmont Share Trust (Piedmont Trust) as described below. Pending the need for cash to fund capital expenditures in the expansion of its telecommunications network, the unused cash was loaned to Dominion and was used by it to repay commercial paper. The amount in Overfund Trust will be invested in Dominion debt securities or other financial investments. The interest and principal payments on such investments are expected to generate amounts sufficient to make interest payments on the DFV Senior Notes through maturity and make return requirements payments on Investor Trust's membership interests in DFV. At the end of 2001, Dominion owed \$367 million under these affiliated loans. This amount is reported as notes payable—affiliates and securities due within one year on the consolidated balance sheet. In 2001, Dominion paid \$22 million of interest on the loans and approximately \$1 million for rental charges for use of fiber lines owned by DTI.

As a result of the formation of DFV and the issuance of the DFV Senior Notes, Dominion issued 665,000 shares of its Series A Mandatorily Convertible Preferred Stock, liquidation preference \$1,000 per share, (Preferred Stock) to Piedmont Trust at closing. Dominion is the beneficial owner of the Piedmont Trust which is consolidated in the preparation of the consolidated financial statements of Dominion. The right to cause remarketing of the Preferred Stock is part of the security for the DFV Senior Notes. Piedmont Trust is established with the intention of allowing for the remarketing of the Preferred Stock in an amount sufficient to retire the DFV Senior Notes if those notes are not otherwise paid at maturity, or in the event there is a downgrade of Dominion Resources, Inc. senior unsecured debt to BBB— or Baa3 and the closing price of Dominion's common stock is below \$45.97 for ten consecutive trading days. If the remarketing of the Preferred Stock were to occur, the Preferred Stock, as convertible securities, would be considered in the calculation of diluted earnings per share of Dominion's common stock or could result in the issuance of additional shares of Dominion common stock, if converted. At March 1, 2001, Dominion Resources, Inc. senior unsecured debt was rated BBB+ by Standard & Poor's Corporation and Baa1 by Moody's Investors Service.

Amounts Due from Affiliates

Dominion's equity method investments include its 50 percent interest in both Elwood Energy and Morgantown Energy Associates, each of which operates independent power generating facilities. As of December 31, 2001 and 2000, amounts due from affiliates totaled \$13 million and \$122 million, respectively. The balance at December 31, 2000, included an advance to Elwood

Energy of \$121 million which was repaid in 2001. The remainder of these receivables generally relates to services provided to Elwood Energy, Morgantown Energy Associates and DTI. Revenues recognized for these services for 2001, 2000, and 1999 were not material. In addition, Dominion leases fiber optic capacity to DTI. During 2001, Dominion received approximately \$4 million under the lease and related support and maintenance services. Balances due to or from affiliates are settled based on contractual terms or on a monthly basis, depending on the nature of the underlying transactions.

Related Party Guarantees

Dominion has issued guarantees to various third parties in relation to payment obligations by certain of its subsidiaries and officers. At December 31, 2001, Dominion had issued \$3.3 billion of guarantees, subsidiary debt subject to such guarantees totaled \$1.1 billion and officers' borrowings under the executive stock loan program totaled \$84 million.

Note 30 Operating Segments

Dominion manages its operations along three primary business lines:

Dominion Energy manages Dominion's generation portfolio, consisting primarily of generating units and power purchase agreements. It also manages Dominion's generation growth strategy; energy trading, marketing, hedging and arbitrage activities; and gas pipeline and certain gas production and storage operations.

Dominion Delivery manages Dominion's electric and gas distribution systems, as well as customer service and electric transmission.

Dominion Exploration & Production manages Dominion's onshore and offshore gas and oil exploration, development and production operations. Operations are located on the outer continental shelf and deep water areas of the Gulf of Mexico and in selected regions in the lower 48 states and Canada.

In addition, Dominion also reports the operations of DCI and Dominion's corporate and other operations as operating segments. Amounts included in the Corporate and Other category include:

1. corporate expenses of the Dominion and CNG holding companies (including interest not allocated to other segments);
2. the operations of Corby (UK), prior to its sale on September 29, 2000 (see Note 6); and
3. the following unusual or extraordinary items:
 - 2001 restructuring costs and 2000 restructuring and acquisition-related costs (see Note 7);
 - 2001 costs associated with restructuring long-term NUG contracts (see Note 27);

- 2001 provision for credit exposure in connection with Enron bankruptcy (see Note 15);
- 2001 and 2000 impairment and re-valuation of DCI's assets (see Note 8);

- 2000 cumulative effect of a change in accounting principle (see Note 3); and
- 1999 extraordinary item—discontinuance of SFAS No. 71 (see Note 9).

The following table presents segment information pertaining to Dominion's operations:

(millions, except total assets)	Dominion Energy	Dominion Delivery	Dominion E&P	Dominion Capital	Corporate and Other	Eliminations	Consolidated Total
2001

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

As of December 31, 2001 and 2000, and for the years ended December 31, 2001, 2000, and 1999, approximately 2 percent of Dominion's total long-lived assets and revenue, respectively, were associated with international operations. As of December 31, 1999, approximately 8 percent of Dominion's total long-lived assets were associated with international operations. Long-lived assets at December 31, 1999 included Dominion's investments in Latin America and in the U.K., which were divested in 2000.

Note 31 Gas and Oil Producing Activities (unaudited)

Capitalized Costs

The aggregate amounts of costs capitalized for gas and oil producing activities, and related aggregate amounts of accumulated depreciation and amortization, follow:

(millions) At December 31	2001	2000
Capitalized costs of:		
Proved properties	\$7,303	\$5,210
Unproved properties	1,689	550
	8,992	5,760
Accumulated depreciation of:		
Proved properties	3,043	2,959
Unproved properties	301	233
	3,344	3,192
Net capitalized costs	\$5,648	\$2,568

Total Costs Incurred

The following costs were incurred in gas and oil producing activities during the years 1999 through 2001:

(millions) Year Ended December 31,	2001			2000			1999		
	Total	United States	Canada	Total	United States	Canada	Total	United States	Canada
Property acquisition costs:									
Proved properties	\$1,586	\$1,586	—	\$1,475	\$1,459	\$16	\$280	\$121	\$159
Unproved properties	908	897	\$ 11	125	125	—	33	3	30
	2,494	2,483	11	1,600	1,584	16	313	124	189
Exploration costs	305	305	—	159	115	44	4	2	2
Development costs ⁽¹⁾	512	395	117	261	236	25	85	34	51
Total	\$3,311	\$3,183	\$128	\$2,020	\$1,935	\$85	\$402	\$160	\$242

(1) Development costs incurred for proved undeveloped reserves were \$133 million and \$82 million for 2001 and 2000, respectively. Dominion did not incur development costs for proved undeveloped reserves in 1999.

Results of Operations

Dominion cautions that the following standardized disclosures required by the FASB do not represent the results of operations based on its historical financial statements. In addition to requiring different determinations of revenue and costs, the disclosures exclude the impact of interest expense and corporate overhead.

(millions) Year Ended December 31,	2001			2000			1999		
	Total	United States	Canada	Total	United States	Canada	Total	United States	Canada
Revenue (net of royalties) from:									
Sales to nonaffiliated companies	\$1,144	\$ 920	\$224	\$861	\$691	\$170	\$229	\$142	\$87
Transfers to other operations	114	114	—	93	93	—	—	—	—
Total	1,258	1,034	224	954	784	170	229	142	87
Less:

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

Standardized Measure of Discounted Future Net Cash Flows and Changes Therein

The following tabulation has been prepared in accordance with the FASB's rules for disclosure of a standardized measure of discounted future net cash flows relating to proved gas and oil reserve quantities owned by Dominion.

(millions) Year Ended December 31,	2001			2000			1999		
	Total	United States	Canada	Total	United States	Canada	Total	United States	Canada
Future cash inflows	\$12,350	\$11,161	\$1,189	\$23,602	\$19,117	\$4,485	\$2,401	\$1,282	\$1,119
Less:									
Future development cost ⁽¹⁾	845	770	75	503	405	98	110	—	110
Future production cost	3,571	3,091	480	2,055	1,540	515	987	497	490
Future income tax expense	1,917	2,026	(109)	7,145	5,591	1,554	209	125	84
Future cash flows	6,017	5,274	743	13,899	11,581	2,318	1,095	660	435
Less annual discount (10% a year)	2,804	2,513	291	5,723	4,622	1,101	546	310	236
Standardized measure of discounted future net cash flows ⁽²⁾	\$ 3,213	\$ 2,761	\$ 452	\$ 8,176	\$ 6,959	\$ 1,217	\$ 549	\$ 350	\$ 199

(1) Estimated future development costs, excluding abandonment, for proven undeveloped reserves are estimated to be \$241 million, \$272 million and \$85 million for 2002, 2003, and 2004, respectively.

(2) Amounts exclude the effect of contracts designated as hedges of future sales of production at year end.

In the foregoing determination of future cash inflows, sales prices for gas and oil were based on contractual arrangements or market prices at year-end. Future costs of developing and producing the proved gas and oil reserves reported at the end of each year shown were based on costs determined at each such year end, assuming the continuation of existing economic conditions. Future income taxes were computed by applying the appropriate year-end or future statutory tax rate to future pretax net cash flows, less the tax basis of the properties involved, and giving effect to tax deductions, or permanent differences and tax credits.

It is not intended that the FASB's standardized measure of discounted future net cash flows represent the fair market value of Dominion's proved reserves. Dominion cautions that the disclosures shown are based on estimates of proved reserve quantities and future production schedules which are inherently imprecise and subject to revision, and the 10% discount rate is arbitrary. In addition, present costs and prices are used in the determinations and no value may be assigned to probable or possible reserves.

The following tabulation is a summary of changes between the total standardized measure of discounted future net cash flows at the beginning and end of each year.

(millions) Year Ended December 31,	2001	2000	1999
Standardized measure of discounted future net cash flows at January 1	\$ 8,176	\$ 549	\$ 382
Changes in the year resulting from:			
Sales and transfers of gas and oil produced during the year, less production costs	(1,038)	(796)	(152)
Prices and production and development costs related to future production	(9,793)	9,544	(110)
Extensions, discoveries and other additions, less production and development costs	767	1,602	103
Previously estimated development costs incurred during the year	134	82	57
Revisions of previous quantity estimates	62	(778)	34
Accretion of discount	1,117	259	44
Income taxes	2,949	(3,309)	(44)
Acquisition of Louis Dreyfus and CNG	1,347	1,322	—
Other purchases and sales of proved reserves in place	102	994	245
Other (principally timing of production)	(610)	(1,293)	(10)
Standardized measure of discounted future net cash flows at December 31	\$ 3,213	\$ 8,176	\$ 549

Note 32 Quarterly Financial and Common Stock Data (unaudited)

A summary of the quarterly results of operations for the years 2001 and 2000 follows. Amounts reflect all adjustments, consisting of only normal recurring accruals (except as discussed below), necessary in the opinion of management for a fair statement of the results for the interim periods. Results for interim periods may fluctuate as a result of weather conditions, changes in rates and other factors. Amounts for 2000 reflect certain reclassifications to conform to the 2001 presentation.

(millions, except per share amounts)	First Qtr.	Second Qtr.	Third Qtr.	Fourth Qtr.	Total
2001					
Operating revenue	\$3,198	\$2,309	\$2,544	\$2,507	\$10,558
Income from operations	496	518	780	(9)	1,785

REPORT OF MANAGEMENT'S RESPONSIBILITIES

The management of Dominion Resources, Inc. is responsible for all information and representations contained in the Consolidated Financial Statements and other sections of the annual report. The Consolidated Financial Statements, which include amounts based on estimates and judgments of management, have been prepared in conformity with generally accepted accounting principles. Other financial information in the annual report is consistent with that in the Consolidated Financial Statements.

Management maintains a system of internal accounting controls designed to provide reasonable assurance, at a reasonable cost, that Dominion's and its subsidiaries' assets are safeguarded against loss from unauthorized use or disposition and that transactions are executed and recorded in accordance with established procedures. Management recognizes the inherent limitations of any system of internal accounting control, and therefore cannot provide absolute assurance that the objectives of the established internal accounting controls will be met.

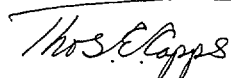

This system includes written policies, an organizational structure designed to ensure appropriate segregation of responsibilities, careful selection and training of qualified personnel, and internal audits. Management believes that during 2001 the system of internal control was adequate to accomplish the intended objectives.

The Consolidated Financial Statements have been audited by Deloitte & Touche LLP, independent auditors, who were designated by the Board. Their audits were conducted in accordance with auditing standards generally accepted in the United States of America and include a review of Dominion's and its subsidiaries' accounting systems, procedures and internal controls, and the performance of tests and other auditing procedures sufficient to provide reasonable assurance that the Consolidated Financial Statements are not materially misleading and do not contain material errors.

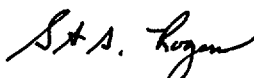

The Audit Committee of the Board of Directors of Dominion Resources, Inc., composed entirely of directors who are not officers or employees of Dominion Resources, Inc. or its subsidiaries, meets periodically with the independent auditors, the internal auditors and management to discuss auditing, internal accounting control and financial reporting matters of Dominion and to ensure that each is properly discharging its responsibilities. Both independent auditors and the internal auditors periodically meet alone with the Audit Committee and have free access to the Committee at any time.

Management recognizes its responsibility for fostering a strong ethical climate so that Dominion's affairs are conducted according to the highest standards of personal corporate conduct. This responsibility is characterized and reflected in Dominion's Code of Ethics, which addresses potential conflicts of interest, compliance with all domestic and foreign laws, the confidentiality of proprietary information, and full disclosure of public information.

INDEPENDENT AUDITORS' REPORT

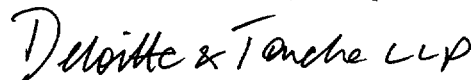

To the Shareholders and Board of Directors of
Dominion Resources, Inc.
Richmond, Virginia

We have audited the accompanying consolidated balance sheets of Dominion Resources, Inc. and subsidiaries as of December 31, 2001 and 2000, and the related consolidated statements of income, comprehensive income, common shareholders' equity, and cash flows for each of the three years in the period ended December 31, 2001. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of Dominion Resources, Inc. and subsidiaries as of December 31, 2001 and 2000, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2001, in conformity with accounting principles generally accepted in the United States of America.

As discussed in Note 15 to the consolidated financial statements, effective January 1, 2001, the Company adopted Statement of Financial Accounting Standards No. 133, *Accounting for Derivative Instruments and Hedging Activities*, as amended. Also, as discussed in Note 3 to the consolidated financial statements, the Company changed its method of accounting used to develop the market-related value of pension plan assets in 2000.

Richmond, Virginia
