SUBJECT: End-of-Cycle Public Meeting for the Columbia Generating Station between the NRC and Energy Northwest Officials

Dear Mr. Parrish:

This refers to our meeting conducted at the Richland Public Library Gallery, 955 Northgate Drive Richland, Washington, on April 10, 2002, at 6:30 p.m. (PST). At this meeting, the NRC met with you and your management staff to discuss the NRC's independent reactor oversight process and the results of the NRC's implementation of the oversight process at the Columbia Generating Station for the period April 1 through December 29, 2001. This included inspection findings related to not meeting an emergency planning standard for members of the public, and a potential adverse trend in the crosscutting area of human performance. In addition, the NRC discussed one issue of regional and national interest. This issue involved plant security.

The NRC and Energy Northwest responded to questions from the audience following the presentation. No questions remained to be addressed following the meeting.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosures will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/NRC/ADAMS/index.html> (the Public Electronic Reading Room).

Should you have any questions concerning this meeting, we will be pleased to discuss them with you.

Sincerely,

William B. Jones, Chief
Project Branch E
Division of Reactor Projects
