RE: UniTech Services Group, Inc.
Royersford, Pennsylvania Facility
Completion Request – Water Quality Management Program Part II Permit
Application dated June 3, 2002

Dear Ms. Fields:

UniTech respectfully requests that the Pennsylvania Department of Environmental Protection (PADEP) complete their review on the referenced application no later than September 6, 2002; thus providing notice to the Delaware River Basin Commission (DRBC) of PADEP's intent to approve the same.

Please consider the following in support of UniTech's request.

- The next two scheduled public meetings of the DRBC are August 28 and October 16, 2002.
- DRBC staff has requested the PADEP notice of intent to approve at least 30 days prior to the meeting date.
- The requested completion date would allow the DRBC to conduct their review and provide the required public notice to include this action in their October 16th meeting.
- Since DRBC public meetings are scheduled approximately every 6 weeks, UniTech expects the next DRBC public meeting after October will not occur until early December.
- UniTech's efforts to install equipment is likely to be delayed by winter weather if final approvals are not received immediately after the October 16th meeting. Please note that such delay is possible even with the requested approval schedule.
- UniTech's NPDES project was initiated in response to discussions dating back several years between PADEP, the US Nuclear Regulatory Commission, the Borough of Royersford, and UniTech.

NMSS/RGNI MATERIALS-002

- Completion of this project in a timely manner is in the best interest of all parties.

If you have questions regarding this request or UniTech's application, please do not hesitate to contact us. UniTech appreciates PADEP's consideration in this matter.

Sincerely,

UniTech services Group, Inc.
