Chris Lugo

My name is Chris Lugo and I am a

concerned citizen who lives 40 miles downstream
from the proposed uranium enrichment facility in
Hartsville, Tennessee. I do not think there is a need
for yet another uranium enrichment facility in the United
States. In addition, I am concerned about LES-Financial
regulation and the fact that the major investors are
all foreign corporations. I went to a public hearing
last week in Hartsville and I was not persuaded
that LES is going to get rid of depleted uranium
in a timely manner from the facility. I do not
think that the NRC should not consider any request
by LES-Uranco to limit public comment in any way,
additionally you should allow plenty of time for study
the position and full and extend comment and allow
more comment periods on this issue.
