Dear Mr. Johnson:

I would like to take this opportunity to thank you for taking the time to attend our information meetings regarding the uranium enrichment facility which may locate here. Your expertise in this area did much to alleviate many of the concerns our citizens have expressed regarding this facility.

As you might expect, there are still a lot of concerns regarding the process and the storage issues. Hopefully, as LES goes through the licensing process and more public hearings are held, we can get these concerns resolved as well.

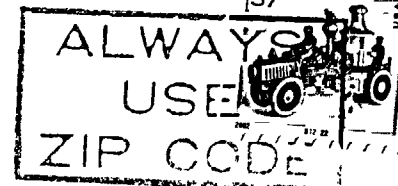

The information you have provided has been a great help to the local officials who will be responsible for making the important decisions regarding this facility.

Sincerely,

Jerry Clift  
County Executive
