RE: Comments of the North American Water Office regarding  
 Louisiana Energy Service (LES) "White Papers"  
 Notice Published as 67 Federal Register 61932-61933

Hard copy to  
 follow, via the  
 U.S. Mail

Dear Mr. Lesar:

With its "white papers," LES wants to preempt the established decision-making process required to adjudicate contentions resulting from its proposed uranium enrichment facility near Hartsville, Tennessee. Allowing LES to define pre-hearing decisions, as it is attempting to do, will expose the NRC as a thoughtless puppet of the nuclear industry, devoid of integrity. The North American Water Office therefore affirms and endorses the comments made by the Nuclear Information and Resource Service in this matter, in their entirety. We will not be redundant.

The brazen arrogance of LES is evident not only in its presumption of dictatorial control over NRC licensing proceedings. This arrogance is also manifest by its treatment of the community chosen to host its facility. As a matter of public record, Jim Lech, employed by the State of Tennessee in the Economic and Community Development Department and on assignment for the Trousdale County project, resigned on or about November 5, 2002 because LES was not providing local officials with adequate information.

Many people, all across this nation, are paying attention to this unconscionable, despicable, and utterly unacceptable corporate lust for dominion. This is a terrifying breakdown of law and order in the making. Cast us all into that world of chaos and abuse at your own peril.

Most Sincerely,

  
 George Crocker  
 Executive Director

Dear Mr. Lesar:

With its "white papers," LES wants to preempt the established decision-making process required to adjudicate contentions resulting from its proposed uranium enrichment facility near Hartselle, Tennessee. Allowing LES to define pre-hearing decisions, as it is attempting to do, will expose the NRC as a thoughtless puppet of the nuclear industry, devoid of integrity. The North American Water Office therefore affirms and endorses the comments made by the Nuclear Information and Resource Service in this matter, in their entirety. We will not be redundant.

The brazen arrogance of LES is evident not only in its presumption of dictatorial control over NRC licensing proceedings. This arrogance is also manifest by its treatment of the community chosen to host its facility. As a matter of public record, Jim Lech, employed by the State of Tennessee in the Economic and Community Development Department and on assignment for the Trousdale County project, resigned on or about November 5, 2002 because LES was not providing local officials with adequate information.

Many people, all across this nation, are paying attention to this unconscionable, despicable, and utterly unacceptable corporate lust for dominion. This is a terrifying breakdown of law and order in the making. Cast us all into that world of chaos and abuse at your own peril.

Most Sincerely,

George Crocker  
Executive Director
