John A. Grobe
United States Nuclear Regulatory
Commission (U.S.N.R.C.)
801 Warrenville Road
Lisle, Illinois 60532

Dear Mr. Grobe:

The Ohio State Board of Registration for Professional Engineers and Surveyors has been monitoring the situation involving the Davis-Besse nuclear reactor. It appears that several of the issues at Davis-Besse may affect the health, safety and welfare of the citizens of Ohio and could possibly involve the practice of engineering. The Board recognizes that the Nuclear Regulatory Commission is the proper authority to investigate; however, we would like to be appraised of the investigation and notified if it appears that any Ohio Professional Engineers have acted inappropriately.

If the Board can be of any assistance please contact Enforcement Officer John F. Greenhalge at 614-466-9106.

Sincerely,

OHIO STATE BOARD OF REGISTRATION FOR
PROFESSIONAL ENGINEERS & SURVEYORS

Mark T. Jones, P. S.
Executive Director
