	Outline IN	Wednesday	November 20, 2002	Blamey
	120 day letter	Thursday	November 14, 2002	Blamey

NOTES

11/13/02 Spoke to Rich Chin and verified the above dates. The exam day is Wednesday, December 11, 2002, because the simulator was open on that day. I plan to validate the JPMs the Sunday after Thanksgiving and have the final exam with changes on Tuesday December 3, 2002. The assignment letter will be approved Thursday December 5, 2002.

The outline consists of 3 JPMs in the simulator and 2 JPMs in the plant. I believe that there will be enough time if Joe wants to review the layout of the control room and tour the plant quick before the test. Rich Chin is aware of this and will be available to support this activity.

I have verified that there is no overlap between the retake outline and the exam administered several months ago.

Change Summaries

Outline Added K/A numbers and importance ratings on the exam outline.

JPMs **55.OP.007.001, Shift CRD Flow Control Station.**

This was changed to a Unit 2 JPM.

Minor additions to the evaluator cues

Changed step 14 to a critical task
