U.S. Nuclear Regulatory Commission
Washington, DC 20555

In the Matter of
Private Fuel Storage L.L.C.
(Independent Spent Fuel Storage Installation)
Docket No. 72-22-ISFSI

Dear Administrative Judges:

Enclosed for your information is a letter from Mark S. Delligatti (NRC) to John D. Parkyn (Chairman, PFS), [incorrectly] dated December 19, 2002 (with attachments), concerning the NRC Staff (Staff) review of information pertaining to the U.S. Air Force's removal of the 1,000-ft above ground level (AGL) minimum altitude restriction in the Sevier B Military Operating Area (MOA) over Skull Valley, Utah. Please note that the enclosed letter should have been dated January 9, 2003.

As indicated in the enclosed letter, the Staff had requested by letter dated August 13, 2002, that PFS review its aircraft crash hazard analysis and determine whether the new information may affect and/or require revisions in that analysis, to which PFS responded by letters dated August 23 and September 30, 2002 (attached). As further indicated in the enclosed letter, based on its review of the information provided by PFS and the analyses that have been conducted to date, the Staff has concluded that the change in minimum flight altitude in Skull Valley does not warrant any change in the findings set forth in the Staff's Consolidated SER for the PFS Facility.

Sincerely,

/RA/

Sherwin E. Turk
Counsel for NRC Staff
