Subject: Fitness for Duty Performance Data Reports - Second Period – 2002

In accordance with 10 CFR 26.71(d), "Recordkeeping requirements," Exelon Generation Company, LLC (EGC) is providing the compiled fitness-for-duty program performance data for our Corporate and Mid-Atlantic Operating Group Headquarters, the Nuclear Generation Group Warrenville, corporate support employees, and the Mid-Atlantic and Mid-West Regional Operating Group nuclear power stations within the scope of the rule for the six month period ending December 31, 2002.

As required by 10 CFR 26.71(d), management actions and reported events are also provided as attachments. The information is being provided as required within 60 days of December 31, 2002, i.e., by March 3, 2003. This performance data is reported on the January 1992 revised Fitness-For Duty (FFD) Performance Data Form developed by Nuclear Management and Resources Council (NUMARC).

Should you have any questions concerning this letter, please contact Mr. Thomas G. Roddey at (630) 657-2811.

Respectfully,

Patrick R. Simpson
Manager - Licensing
Mid-West Regional Operating Group

CORPORATE AND MID-ATLANTIC ROG HEADQUARTERS

Management Actions and Sanctions

One (1) positive test resulted in the denial or revocation of unescorted access.

Events Reported

There were no 24-hour reportable events during this reporting period.

Additional Information

On December 31, 2002, thirty-two (32), "common" Fitness for Duty procedures were implemented in the Mid-Atlantic Regional Operating Group (MAROG).

On November 11, 2002, the Integrated Nuclear Security System (INSS) was implemented in the MAROG. This computer system replaced the Plant Information Management System (PIMS) utilized for Exelon Nuclear Security FFD data.

During this reporting period the Exelon Nuclear MAROG Corporate Office, Limerick Generating Station, and Peach Bottom Atomic Power Station maintained common population pools for licensee employees and contractors. The common pools are reflected in the populations listed in the performance data for the three locations.

During the current reporting period, i.e., July-December, 2002, fourteen (14) specimens in the MAROG were reported as presumptive positive for cocaine as a result of on-site screening. All fourteen (14) specimens were confirmed as positive by the laboratory and were verified as positive by the Medical Review Officer for a confirmation rate of 100%.

During the current reporting period, i.e., July-December, 2002, twenty-eight (28) specimens in the MAROG were reported as presumptive positive for marijuana as a result of on-site screening. Twenty-two (22) of the twenty-eight (28) specimens were confirmed as positive by the laboratory and were verified as positive by the Medical Review Officer for a confirmation rate of 78.6%.

LIMERICK GENERATING STATION

Management Actions and Sanctions

Seven (7) positive tests resulted in the denial or revocation of unescorted access.

Events Reported

There were no 24-hour reportable events during this reporting period.

OYSTER CREEK GENERATING STATION

Management Actions and Sanctions

Fifteen (15) positive tests resulted in the denial or revocation of unescorted access.

One (1) short-term contractor refused to report for random testing and was denied unescorted access.

Events Reported

There were no 24-hour reportable events during this reporting period.

PEACH BOTTOM ATOMIC POWER STATION

Management Actions and Sanctions

Twenty-three (23) positive tests resulted in the denial or revocation of unescorted access.

Events Reported

There were no 24-hour reportable events during this reporting period.

THREE MILE ISLAND NUCLEAR GENERATING STATION

Management Actions and Sanctions

One (1) positive test resulted in the denial or revocation of unescorted access.

Events Reported

There were no 24-hour reportable events during this reporting period.

BRAIDWOOD STATION

Management Actions and Sanctions

Three (3) positive tests resulted in the denial or revocation of unescorted access.

Events Reported

There were no 24-hour reportable events during this reporting period.

BYRON STATION

Management Actions and Sanctions

Five (5) positive tests resulted in the denial or revocation of unescorted access.

Events Reported

There were no 24-hour reportable events during this reporting period.

CLINTON POWER STATION

Management Actions and Sanctions

Three (3) positive tests resulted in the denial or revocation of unescorted access.

Note on Cutoffs

On May 1, 2001, the initial cutoff for marijuana was changed to 50 ng/ml for all individuals except for licensee bargaining unit personnel whose initial cutoff remains at 100 ng/ml.

Events Reported

There were no 24-hour reportable events during this reporting period.

DRESDEN NUCLEAR POWER STATION

Management Actions and Sanctions

Thirty-two (32) positive tests resulted in the denial or revocation of unescorted access.

One (1) short-term contractor refused to undergo a test for cause after an initial test specimen registered a temperature outside of the acceptable range. One (1) short-term contractor refused to complete a pre-access test after the initial breath specimen registered a positive alcohol result. Unescorted access was denied to both individuals after the refusals to complete testing.

It was determined that three (3) short-term contractors submitted adulterated or substitute specimens during pre-access testing. (Adulterants and substitutions are not delineated on the performance data form.) Unescorted access was denied to all three (3) individuals.

Events Reported

A test for cause conducted on a short-term contractor supervisor on October 11, 2002, resulted in a positive alcohol test. The individual's unescorted access was revoked and a work performance investigation was completed. A 24-hour reportable event notification was made to the NRC Operations Center in accordance with 10CFR26.73(a)(2).

LASALLE COUNTY STATION

Management Actions and Sanctions

Two (2) positive tests resulted in the denial or revocation of unescorted access.

Events Reported

There were no 24-hour reportable events during this reporting period.

QUAD CITIES NUCLEAR POWER STATION

Management Actions and Sanctions

Nineteen (19) positive tests resulted in the denial or revocation of unescorted access.

Events Reported

There were no 24-hour reportable events during this reporting period.

Additional Information

During this reporting period a contract FFD technician/collector was overheard instructing a donor to provide a 40 ml urine specimen instead of the 60 ml called for in 10CFR26. An investigation determined that the technician/collector had discussed DOT collections with a supervisor a few weeks earlier, the 40 ml specimen requirement was discussed, and the technician/collector mistakenly applied this 40 ml requirement to collections performed under 10CFR26. The contract FFD collection company took immediate actions with the employee in question and ensured that no other employees were working under this misconception. The Substance Abuse and Mental Health Services Administration laboratory was consulted on this issue. The Laboratory Forensic Testing Director stated that 40 ml specimens would not have compromised the accuracy of test results. The 40 ml amount allowed for complete testing with enough left over for storage of any positive tests for the purpose of potential appeals.

NUCLEAR GENERATION GROUP WARRENVILLE

Management Actions and Sanctions

One (1) positive test resulted in the denial or revocation of unescorted access.

Five hundred one (501) negative quality control specimens tested on-site were submitted to the Substance Abuse and Mental Health Services Administration laboratory during this period. Five hundred (500) specimens were confirmed as negative by the laboratory. One (1) specimen confirmed as positive at the laboratory. The Laboratory Forensic Testing Director noted that the specimen was properly reported as negative at the site because it tested just under the positive threshold. The overall accuracy of the on-site specimen-screening program is acceptable under instrument accuracy standards. It was confirmed that the on-site immunoassay test instrument was calibrated according to the manufacturer's recommendations. The false negative test result may have been attributed to variability of reagents and/or differences in on-site and laboratory test equipment. Statistically, specimens that are very close to the threshold level may screen both above and below the cutoff if the testing is repeated. In this instance, the medical review officer determined the donor to be in violation of the FFD program and unescorted access was denied.

Blind performance testing was conducted at a rate of ten (10) percent. Thirty-eight (38) specimens were submitted to the laboratory. All results were reported correctly.

Events Reported

There were no 24-hour reportable events during the period.

Additional Information

During the current reporting period, i.e., July-December, 2002, nineteen (19) specimens in the Midwest Regional Operating Group (MWROG) were reported as presumptive positive for cocaine as a result of on-site screening. Eighteen (18) of the nineteen (19) specimens were confirmed as positive by the laboratory and were verified as positive by the Medical Review Officer for a confirmation rate of 94.7%.

During the current reporting period, i.e., July-December, 2002, thirty-six (36) specimens in the MWROG were reported as presumptive positive for marijuana as a result of on-site screening. Thirty-one (31) of the thirty-six (36) specimens were confirmed as positive by the laboratory and were verified as positive by the Medical Review Officer for a confirmation rate of 86.1%.
