Subject: Another Weld Data sheet for the Davis-Besse Reactor Head

Tony,

I spoke with recently about putting in an RAI to FENOC for the Davis-Besse head weld data sheets. I e-mailed you a list of weld data sheets that we were interested in. I would like to add one more request to that list. Weld number one is the manually applied cladding to the center of the head that may include the cladding adjacent to nozzle 3:

Weld #1: W.D.S. WH-1, Rev. 0 PQ# 2578

This would be in addition to the following weld data sheets that we previously requested. The Contract # is: 620-0014-52. Weld number 8 appears to be the cladding weld number, weld number 25 is the j-groove number and weld number 13 is the buttering under the cladding:

Weld # 8: W.D.S.'s WH-8, Rev. 0 and WH-8 Alt. 1, Rev. 3 PQ#2237
Weld # 25 W.D.S. WH-25 Rev. 1
Weld # 13 W.D.S. WH-13 Rev. 1

I apologize for the confusion.
