Subject: Appeal to NRC

Statement of a San Luis Obispo County resident living within 10 miles of Diablo Canyon.

As a 25 year resident of Los Osos in San Luis Obispo County, California, I wish to declare my opposition to the expansion and continued operation of the Diablo Canyon Nuclear Power Plant. The reckless accumulation of nuclear waste in pools, vulnerable to natural disasters and now, more immediately horrifying, terrorist attack by missiles or other explosives, makes it both a logical and patriotic imperative to shut down operations until the federal government has a safe and secured method of disposal or neutralization of the highly radioactive fuel rods.

DOCKETED
USNRC

April 2, 2003 (9:34AM)

OFFICE OF SECRETARY
RULEMAKINGS AND
ADJUDICATIONS STAFF

We can't wait. The danger is now and imminent. Diablo Canyon has been named by our leaders as a target that must be defended. The safety of the citizens of central California is compromised by the continued operation of the plant which will add to the stacks of radioactive rods that cannot be secured against attack. This clear and present danger could cost us our homes, our livelihoods, and yes, so unnecessarily, our lives. We have no options. Please dismantle Diablo Canyon. I appeal to you in the name of our land and our people and our nation whose mandate it is to protect the health and welfare of all. Nancy Laurie, Los Osos CA
