

Date: April 10, 2003

SUMMARY OF INFORMATION COLLECTION REQUEST

Title: 10 CFR Part 40, Domestic Licensing of Source Material and NRC Form 484, Detection Monitoring Data Report
NRC Form 244, Registration Certificate - Use of Depleted Uranium Under General License

Current Burden/Responses: 10 CFR 40 and NRC 484: 72,549 hours/758 responses
NRC 244: 60 hours/ 60 responses

Proposed Burden/Responses: 10 CFR 40 and NRC 484: 59,367 hours/598 responses
NRC 244: 60 hours/ 60 responses

Total Burden/Responses: 59,427 hours/929 responses (271 recordkeepers)

Frequency of Response: One-time, every 5 years, on occasion and bi-annually

Number of Respondents: 10 CFR 40 and NRC 484: 271
NRC 244: 60

Reasons for Changes in Burden/Responses: NRC Licensees - The overall burden for NRC Licensees decreased by 18,182 hours from 35,068 to 21,886 because of license terminations and licensee consolidations. The number of respondents decreased by 57 from 156 to 99 respondents, thereby reducing the number of responses from 447 to 287, and the reporting burden by 9,867 hours from 26,049 to 16,182 hours. The number of recordkeepers decreased from 156 to 99, thereby reducing the recordkeeping burden by 8,315 hours from 9,019 to 5,704 hours. The decreases are due to the smaller number of current 10 CFR Part 40 licensees with approximately 30% of the decreases resulting from license terminations and 5% from licensee consolidation since the last clearance renewal.

Agreement State Licensees -The overall burden for Agreement State licensees has remained unchanged.

NRC Form 244 - There was no change in burden for this form.

There was an increased in the cost for professional staff from \$143 to \$152 per hour.

Licensing & International Safeguards Branch
Fuel Cycle Safety and Safeguards Division
Office of Nuclear Material Safety and Safeguards

Recordkeeping Requirements in Accordance with the Retention Periods for Records/Rule: N/A

Search of the Information Requirements Control Automated System (IRCAS):
IRCAS was searched, no duplication was found.

Abstract: 10 CFR Part 40 establishes requirements for licenses for the receipt, possession, use, and transfer of radioactive source and byproduct material. NRC Form 244 is used to report receipt and transfer of depleted uranium under general license, as

required by 10 CFR Part 40. NRC Form 484 is used to report certain groundwater monitoring data required by 10 CFR Part 40 for uranium recovery licensees. The application, reporting, and recordkeeping requirements are necessary to permit the NRC to make a determination on whether the possession, use, and transfer of source and byproduct material is in conformance with the Commission's regulations for protection of public health and safety.
