SUBJECT: RESPONSE TO REQUEST FOR INFORMATION ON THE INTERNATIONAL
WORKING GROUP FOR SABOTAGE CONCERNS OF TRANSPORT AND
STORAGE CASKS

Dear Mr. Faranda:

I am responding to your letter, dated March 6, 2003, regarding the International Working Group for Sabotage Concerns of Transport and Storage Casks (WGSTSC), which was referred to me for response.

The U.S. Nuclear Regulatory Commission (NRC) is working with the U.S. Department of Energy (DOE) to develop a multilateral agreement (MLA) governing the international cooperation under the WGSTSC. DOE has the U.S. lead for developing this MLA. The MLA establishes a framework for cooperation among the Parties to understand the potential public health effects and environmental impacts of radiological sabotage associated with the transport and storage of civilian radioactive material and identifies the protocol for exchanging sensitive information among the Parties related to this collaborative research project. Currently, this MLA is still under development, and, thus, we cannot share any specific details of the MLA with the public.

While the results of the WGSTSC research will be sensitive and cannot be shared with the public, a non-sensitive overview of the research project will be presented at the Annual Meeting of the Institute of Nuclear Materials Management (INMM) on July 13-17, 2003. The INMM annual meeting will be held at the JW Marriott Desert Ridge Resort & Spa in Phoenix, Arizona, and is open to the public. INMM requires a registration fee to attend. You can obtain further information on the annual meeting at the INMM web site at <http://www.inmm.org>.

Thank you for your interest in the WGSTSC research. If you have any additional question regarding this project, please contact Mr. Francis (Skip) Young of my staff at (301) 415-6396.

Sincerely,

/RA/

Roy P. Zimmerman, Director
Office of Nuclear Security
and Incident Response
