REQUEST FOR CHANGES TO THE SPENT FUEL POOL LOADING RESTRICTIONS  
ARKANSAS NUCLEAR ONE, UNIT 2 (ANO-2)

20. In sections 4.5.1, 4.6.1, 4.7.1, and 4.8.3 of Attachment 4, the licensee repeatedly identifies/misstates the regulatory limit for criticality analysis of the spent fuel pool as "[less than or equal to] 1.0" when no soluble boron is present. The limit is correctly identified in the technical specification marked up pages. Is this an editorial error in Attachment 4 of the amendment request?
