

NCR wants to go out w/ a RIS to require  
NMSS has to do it division by division

Alternatives to keeping from public  
- redacted version

- rewrite

- attachment

NMSS feels they will not be able to exclude categories  
(new docs such as Records will be written as "white")

Each office will have an "expert"

We will issue guidance + re-write (+ update H.D.)

Incorporate the proprietary review process that already exists  
NCR has an office instruction

Don't re-write what already exists

1st out guidance w/ categories (Sfsgd upo  
proprietary  
SUTH)

B-77

IDR may now be a filter - would we ensure the IDR  
stops making good judgments about what should or  
should not be reviewed.

Right now once they get a request we give them the whole  
box of  
material

PDR / Review required on a continuing basis

What indiv / group performs review

What is the process / time frame for accomplishing?
