Linda,

I have made the necessary changes to the profiles and the documents should be replicated to the public server today.

The NRR review team has determined that NUREG-1738 can be made available to the public again. See attached email.

NUREG-1738 was formerly available on the external public web site, but was removed last year.

NUREG-1738 was also formerly available on the public ADAMS server. Accession numbers are:

ML010430066

ML003762963 package and contents

ML010160522 package and contents

The PDR has only a paper copy, which we have returned to the Reading Room for viewing and copying for a fee.
