Bob Weston / Don Hassell - 2.790 - high "2" internal practices of commission on use as exemptions

Licensees need a legal basis to withhold certain parts of a doc.

FSARs, STR, some in EIS

## NRC

case by case

amendments - outside of license renewal → no vulnerability info

Go thru info to assess:

Ease of information to be acquired by other means.. (location, nearby industrial, military, etc) - Duplicative

Vulnerability → to what level? Terrorist Act or widespread panic?

Objective - restrict <sup>internal</sup> info in NRC public documents which could facilitate onset of terrorism that would result in public fatalities (at what level?)  
(or significant offsite consequences)
