USNRC

I am deeply concerned about the possibility of a plutonium MOX fuel factory at the Savannah River site nuclear facility. As a resident of the general area (Georgia) I am concerned about the safety of this factory, particularly in light of possible terrorist actions at the site. Also, I am concerned about the safety of transportation of plutonium to the site and wastes from the site. I urge you to consider safer and cheaper options and not allow this dangerous scheme to go forth. I would certainly not travel to the area and

E-REDS = ADM-03

all = J. Harris (TEH)
A. Lester (ACK)

would consider moving out
of Georgia if it is implemented.
Thank you for consideration
of my concerns.

Sincerely,

Diane F. Matesic
