The Honorable Nils J. Diaz,
Chairman
U.S. Nuclear Regulatory Commission
Washington, DC 20555-0001

Dear Chairman Diaz:

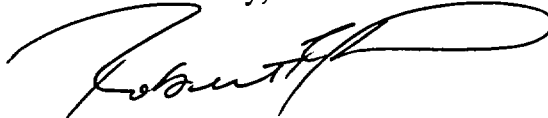

The Nuclear Regulatory Commission (NRC) is already reviewing intensively the core of the Department of Energy's ("DOE's") application for a construction authorization for the proposed high-level radioactive waste repository at Yucca Mountain, Nevada: DOE's Total System Performance Assessment or "TSPA." This is an extraordinarily complex computer model that is supposed to provide the radioactive dosage to nearby populations for the next 10,000 years and beyond. Nevada needs to begin its review of the DOE model and the NRC's Staff's counterpart model *now* so that Nevada's scientific reviews can be made available to the citizens of Nevada, DOE, and the NRC on a timely basis. It may take a good two years for Nevada's technical experts to get sufficiently familiar just with DOE's enormous model—the culmination of DOE's many year and billion-dollar effort—to review it competently.

Section 117 of the Nuclear Waste Policy Act of 1982, as amended, requires the NRC to provide Nevada with "timely and complete information regarding determinations or plans made with respect to the ... licensing [or] regulation" of Yucca Mountain. However, in our recent dealings with the NRC staff on this subject, we have found that the Staff appears to be apprehensive over Nevada's efforts to obtain this detailed model information on a timely basis. For example, in trying to set up a meeting on the Staff's counterpart to DOE's TSPA model--which we still have not been able to arrange--the Staff said they would prefer not to talk to us about DOE's model, even in a public meeting. But NRC Staff obviously talks to DOE about DOE's model and, given Nevada's obvious interest in this matter, there is no basis for treating Nevada any differently. And

there is no reason why NRC Staff's counterpart model cannot be provided to Nevada so that it, like NRC Staff, may use it in assessing DOE's model.

It is vital that the Commission step in to clarify the situation, and to ensure Nevada's access to information essential to its scientific reviews. I look forward to hearing from you. Should you have any questions, please do not hesitate to contact me.

Sincerely,

A handwritten signature in black ink, appearing to read "Robert R. Loux", with a large, sweeping loop at the end.

Robert R. Loux
