2.2 PLANT LEVEL SCOPING RESULTS

RAI 2.2.2-2: During the system scoping inspection at the plant site (May 12 - 16, 2003) the team noted several inconsistencies between the system entries in the license renewal application (LRA) and the actual systems in-use at the plant. Many of these systems never existed at the plant. Provide a complete listing of systems in-use at the plant, and correct Tables 2.2-1, 2.2-2, and 2.2-3 of the LRA.
