

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555-0001

July 8, 2003

Mr. Douglas Walters
Director of Emergency Planning and Security
Nuclear Energy Institute
1776 I Street, NW, Suite 400
Washington, DC 20006-3708

Dear Mr. Walters:

The purpose of this letter is to provide the Nuclear Energy Institute a copy of the enclosed update to NUREG/CR 6190, "Update of NUREG/CR-6190 Material to Reflect Postulated Threat Requirements," dated March 27, 2003. This update contains safeguards information (SGI) and requires commensurate handling. The update is provided for your information and to share with nuclear power reactor licensees, as appropriate.

This update does not impose any new requirements for licensees. The information provided by the curves and standoff distances in the update will allow power reactor licensees to ascertain the impact on their sites due to considerations associated with specific vehicle bomb sizes, extending beyond the current design basis threat for power reactor facilities.

If you have any questions concerning the update or its intended use, please direct them to Jesse Arildsen at (301) 415-7779.

Sincerely,

/RA/

Glenn M. Tracy, Director
Division of Nuclear Security
Office of Nuclear Security
and Incident Response

Upon Removal of Enclosure, This
Document is DECONTROLLED
