Subject: Nuclear Waste

DOCKET NUMBER  
PROPOSED RULE PR 20  
(68FR 09595)

DOCKETED  
USNRC

June 6, 2003 (4:03PM)

OFFICE OF SECRETARY  
RULEMAKINGS AND  
ADJUDICATIONS STAFF

I believe that nuclear waste no matter what the strength of radiation is a health hazard and must be contained. As a scientist I am aware that radiation causes damage to our genetic material. To safeguard future generations this waste must be treated with great care and the public should have no exposure to it. In addition, we should begin to dismantle nuclear power stations and use alternative energy instead.
