Subject: comments for NRC on releasing radioactive materials

DOCKETED
USNRC

118

June 6, 2003 (3:06PM)

OFFICE OF SECRETARY
RULEMAKINGS AND
ADJUDICATIONS STAFF

Regarding NRC's proposed rulemaking on the release and reuse of radioactive materials, I urge that no materials be released and reused that have radioactive levels above background level.

Since no amount of ionizing radiation is safe, the NRC should contain and control all radioactive materials unless the exposure is below background level.

Thanks for your time.
