Subject: Recycled radioactive materials

Dear NRC,
Please listen to the voices of the Sierra Club and the NIRS in the matter of what to do with deregulated nuclear waste. Please both recapture all nuclear waste and prohibit release of radioactive wastes and materials from nuclear power plants and weapons into the market place, for any use. I feel strongly that nuclear waste is extremely dangerous, so please take into consideration the voices warning against using it too freely.

Thank you,
Renee Lepreau
